Effect of Superficial Temporal-Middle Cerebral Artery Anastomosis on the Course of Experimental Acute Middle Cerebral Artery Embolic Occlusion .......................... 371
Robert Levinthal, John I. Moxey, W. Jann Brown, and W. Eugene Stern

Role of Adrenergic Nerves in Blood-Induced Cerebral Vasospasm .......................... 375
Frederick A. Simeone, Phillip E. Vinall, J. L. Alderman, and John D. Irvin

Results of Electroencephalographic Monitoring During 367 Carotid Endarterectomies. Use of a Dedicated Minicomputer ..................... 381
Keith H. Chiappa, Stephanie R. Burke, and Robert R. Young

Autopsy Study of Cerebrovascular Disease in Japanese Men Who Lived in Hiroshima, Japan, and Honolulu, Hawaii ..................... 389
Yoshio Misuyama, Lawrence R. Thompson, Takuiji Hayashi, Kelvin K. Lee, Robert J. Keehn, Joseph A. Resch, and Arthur Steer

Ineffectiveness of the Doppler Ophthalmic Test (DOT) in Post-Endarterectomy Evaluation .................. 396
Shirley M. Otis, Richard A. Smith, Donald J. Dalessio, Alan D. Kroll, Michael Rush, and Ralph B. Dilley

Topical Prostacyclin (PGI₂) Inhibits Platelet Aggregation in Pial Venules of the Mouse .................. 399
William I. Rosenblum and Farouk El-Sabban

Effect of Phenoxymenzamine on Cerebral Blood Flow and Metabolism in the Baboon During Hemorrhagic Shock .................. 401
János Harmar, Arisstid G. G. Kovács, Martin Reivich, István Nyáry, and Felix Durity

Modification of Cerebrovascular CO₂ Reactivity by Inhibition of Dopamine β-Hydroxylase .................. 407

Cerebral Artery Thrombosis and Intramural Hemorrhage .................. 411
Seizo Sadoshima, Takeo Fukushima, and Kenzo Tanaka

A New Canine Model of Proximal Internal Carotid Embolism .................. 415
Howard H. Kaufman, James H. Anderson, John D. Hutchon, and Jannie Woo

A Simplified Method of Measuring Regional Blood Flow .................. 419
Adelbert Ames III and Edwin G. Fischer

Cerebral Blood Flow Immediately Following Brief Circulatory Stasis .................. 423
Edwin G. Fischer, Adelbert Ames III and Antonio V. Lorenzo

Critical Appraisal of Cerebral Blood Flow Measured from Brain Stem and Cerebellar Regions After 133Xe Inhalation in Humans .................. 428
Olivier Juge, John S. Meyer, Fumihiko Sakai, Fumie Yamaguchi, Masahiro Yamamoto and Terry Shaw

Recovery of Brain Mitochondrial Function in the Rat after Complete and Incomplete Cerebral Ischemia .................. 437
Stig Rehncrona, Leena Mela, and Bo K. Siesjö

Treatment of Acute Focal Ischemia with Continuous CSF Drainage and Mannitol .................. 446
John R. Little and Donald O'Shaughnessy

External Carotid Artery in Internal Carotid Artery Occlusion. Angiographic, Therapeutic, and Prognostic Considerations .................. 450
Roger W. Countee and Thurairasah Vijayanathan

Reversed Ophthalmic Artery Flow in Internal Carotid Artery Occlusion. A Re-Appraisal Based on Ultrasonic Doppler Investigations .................. 461
Vjuka Hodek-Demarin and Hans R. Müller

Circulating Platelet Aggregates in Sickle Cell Disease Patients with and without Vaso-Occlusion .................. 464
Paulette Mehta and Jawahar Mehta

FIFTH INTERNATIONAL JOINT CONFERENCE ON STROKE AND CEREBRAL CIRCULATION

February 21-23 1980
Dutch Inn Resort Hotel, Walt Disney World, Lake Buena Vista, Florida

The Stroke Council of the American Heart Association in association with the Cerebrovascular Surgery Section of the American Association of Neurological Surgeons, The Canadian Stroke Society of The Canadian Heart Foundation and The Society for Vascular Surgery is pleased to announce the 5th International Joint Conference on Stroke and Cerebral Circulation.

This is an open meeting, whose purpose is to provide a common forum for the presentation of material relating to all aspects of cerebrovascular disease and the physiology and pathology of the cerebral circulation. Abstracts dealing with the clinical or experimental aspects of the pathogenesis, diagnosis, medical and surgical management of vascular disease of the brain and spinal cord are welcome.

Physicians and investigators interested in diseases of the cerebral circulation and the physiology and pathological changes in the cerebral circulation are encouraged to submit abstracts to the Program Committee for consideration to be presented at that meeting. Abstracts accepted for presentation will be published in the January 1980 issue of the journal Stroke of the American Heart Association.

Guidelines and further information may be obtained by writing: Administrator, Postgraduate Programs, American Heart Association, 7320 Greenville Avenue, Dallas, Texas 75231. Phone (214) 750-5441. Robert G. Siekert, M.D. of the Mayo Clinic and J. Donald Easton, M.D. of the University of Missouri, are serving as Conference Co-Chairmen.

Deadline for abstract submission must be postmarked by August 31, 1979
DOPSCAN™ is an ultrasonic, Doppler, arterial scanning system for early detection of potential stroke conditions. It provides a noninvasive evaluation of the carotid bifurcation and other peripheral arteries to indicate the location and severity of arterial insufficiency and plaquing. It is a valuable supplement to X-ray angiography.

The simplicity and safety permit a physician to easily follow the process of plaquing or a patient's progress after arterial surgery.

The DOPSCAN™ system is unique in that it provides a set of permanent exam records consisting of:

1. Mapped image of the carotid bifurcation,
2. Strip chart recordings showing pulsatile velocity waveforms in forward or reverse flow, and
3. Magnetic tape recordings of the customary Doppler flow sounds, which present the flow information in aural form along with the operator's commentary.

(Left) DOPSCAN™ image showing stenosis. The physician also observes abnormal velocity waveforms and hears high frequency fluttering sounds that are recorded simultaneously.

(Right) X-ray angiogram of same point.
