Current Concepts of Cerebrovascular Disease — Stroke, helps the practicing physician keep abreast of recent developments in research and treatment of cerebrovascular disease and stroke. Each issue contains a single original article or review of current findings by authorities in the field. Articles generally emphasize the clinical aspects of treatment and rehabilitation.

Articles planned for publication in 1971 include:

Cerebral Autoregulation and "Dysautoregulation" and Their Relation to Cerebral Vascular Symptoms . . . J. S. Meyer and Peter Marx

Rehabilitation to Improve Function in Stroke Patients . . . V. Nickel

Cranial Arteritis . . . Arnold Greenhouse

Auscultation of the Neck, Head, and Orbits . . . R. Janeway

Apply to your local Heart Association to receive bi-monthly issues of Current Concepts of Cerebrovascular Disease-Stroke.
