In Support of Science...

Official Journals of the American Heart Association

Circulation
John Ross Jr., M.D., Editor
ISSN: 0009-7322
Presents clinical and laboratory research relevant to cardiovascular disease. For Cardiologists and primary care physicians. Includes Clinical Progress Series, Research Advances Series, Editorials, Point of View, Editorial Comments, Letters to the Editor, and the AHA News and Meetings Calendar. Monthly.

Circulation Research
Harry A. Fozzard, M.D., Editor
ISSN: 0009-7330
Documents research advances in basic science, research, and experimental medicine. For researchers and clinicians. Includes Original Contributions, Brief Communications, Letters to the Editor, and the AHA News and Meetings Calendar. Monthly.

Hypertension
Allyn L. Mark, M.D., Editor
ISSN: 0194-911X
Reports clinical and laboratory investigations in hypertension. For cardiologists, primary care physicians, and researchers. Includes Original Investigations, Brief Reviews, Symposia, Case Reports, and the AHA News and Meetings Calendar. Monthly.

Stroke
A Journal of Cerebral Circulation
Oscar M. Reinmuth, M.D., Editor
ISSN: 0039-2499
Includes articles on prevention, diagnosis, treatment and rehabilitation. For cardiologists, neurologists, and primary care physicians. Progress Reviews, Original Contributions, Case Reports, Abstracts of Literature, Comments, Opinions, Reviews, Letters to the Editor, and the AHA News and Meetings Calendar. Monthly.

Arteriosclerosis
A Journal of Vascular Biology and Thrombosis
Edwin L. Bierman, M.D., Editor
ISSN: 0276-5047
Relates original research and reviews on the biology, prevention, and impact of vascular diseases. Designed for physicians and investigators. Original Contributions, Editorials, Reviews, Meeting Summaries, Special Reports, and the AHA News and Meetings Calendar. Bimonthly.

Recurring Bibliography of Hypertension
ISSN: 0090-1326
Surveys current published developments in hypertension. For researchers and librarians. Bimonthly. Published by the AHA in cooperation with the National Library of Medicine.

Announcement

30th Annual Conference on Cardiovascular Disease Epidemiology

March 29-30, 1990

Third Day Program:
Workshop on Obesity and Blood Pressure
March 31, 1990

San Diego Marriott
Hotel and Marina
San Diego, California

Information may be obtained through:
American Heart Association
30th Annual Conference on Cardiovascular Disease Epidemiology
Scientific and Corporate Meetings
7320 Greenville Avenue
Dallas, TX 75231
(214) 706-1511

American Heart Association
Pharmaceutical Roundtable
March 30, 1990

The member companies of the AHA Pharmaceutical Roundtable offer new hope for the future of vital cardiovascular research. With their unprecedented commitment of time, expertise and funding, these pharmaceutical leaders have the opportunity to exchange ideas and information relevant to heart research, while also supporting promising projects. Altogether, cardiovascular researchers couldn't hope for a more dedicated circle of friends and supporters.

Founding Members
Bristol-Myers Company
CIBA-GEIGY Corporation
Genentech, Inc.
Sandoz Pharmaceuticals Corporation
Squibb Corporation
Wyeth-Ayerst Laboratories
Winthrop Pharmaceuticals/Division of Sterling Drug, Inc.

Regular Members
Boehringer Ingelheim Pharmaceuticals, Inc.

Sponsored by the American Heart Association Council on Epidemiology

American Heart Association

Cerebral Vascular Disease Specialist

Marshfield Clinic is seeking a second fellowship-trained cerebral vascular disease subspecialist to join its Neurosciences Cerebral Vascular Disease unit and 15-member Neurology Section. State-of-the-art practice. Full range of neurologic lab and support services including duplex scanning, transcranial doppler, Spect, MRI and CAT scanning and invasive neuroradiology. Clinical research opportunities with possibilities for both individual and multicentered national projects. Marshfield Clinic is a private group practice consisting of 350 physicians representing all surgical and medical specialties. The Clinic is physically adjacent to a 525-bed acute care teaching hospital. University of Wisconsin Medical School affiliation, a large Medical Research Foundation, plus a major secondary and tertiary level patient referral base. Contact:
Mr. John P. Folz
Assistant Director
1000 N. Oak Avenue
Marshfield, WI 54449
or call collect at
(715) 387-5181

When NASA decided to carry out transcranial Doppler examinations (TCD) on the “Discovery” Space Shuttle in Spring (1989), they set the highest standards on the instrumentation they used. It had to provide precise and reproducible data under less than ideal conditions, travelling almost 2.8 million miles in five days. Ease of operation, portability and — above all — reliability were the qualities which made NASA select EME’s TC2-64 Transcranial Doppler following extensive testing. After all, when it costs 350 million dollars to get your patient on the examination couch you can’t afford to be let down by second-rate equipment!

Having developed and constructed the world’s first TCD equipment, EME were able to put their unique seven years experience at the disposal of the “Discovery” mission and to assist in the post-processing of the data obtained from the five astronauts during five days of weightlessness. It is hoped that this information will shed light on the role of cerebrovascular changes in space adaptation syndrome. “Everything functioned perfectly!”, commented mission specialist, Dr. James Bagian on his return to earth. So pleased were the astronauts and scientists at NASA, that the TC2-64 was approved to be on the “Atlantis” space mission in the fall, making the world’s number one TCD system not only the first — but also the second — in space.

EME is proud to be part of NASA’s scientific space missions. But also equally proud to be providing the same high standards of accuracy, reproducibility and reliability to the practicing physicians on ‘terra firma’.

EME IS TCD
(also in space)
