AHA Meetings

Many of these meetings are sponsored by the American Heart Association (AHA) and its Scientific Councils. For information, contact AHA, Scientific Meetings, 7272 Greenville Avenue, Dallas, TX 75231-4596; Fax 214-373-3406; E-mail scientificconferences@heart.org; or visit the Web site http://my.americanheart.org/portal/professional/conferences/events

2007

July 30–Aug 2: 4th Annual Symposium of the American Heart Association Council on Basic Cardiovascular Sciences: Cardiovascular Repair and Regeneration: Structural and Molecular Approaches in the Cellular Era. Keystone, Colo. This 3.5-day conference is a multifaceted symposium highlighting research under development in the cardiovascular community targeted at slowing and/or reversing the pathogenesis of disease. The conference will focus on how cellular-based approaches are being manipulated to enhance the repair and regeneration capabilities of the cardiovascular system with the goal of therapeutic based interventions. See Web site: http://www.heart.org/presenter.jhtml?identifier=3044056

Sept 26–29: 61st Annual High Blood Pressure Research Conference 2007. Tucson, Ariz. The 2.5-day scientific program gives physicians and research investigators an opportunity to enhance their knowledge, advance their skills, and learn about the latest developments in research pertaining to hypertension, stroke, kidney function, obesity, and genetics. The program will include state-of-the-art lectures and more than 350 oral and poster abstract presentations and discussions led by authorities. See Web site: http://www.heart.org/presenter.jhtml?identifier=3043476

Nov 4–7: Scientific Sessions 2007. Orlando, Fla. Scientific Sessions encompasses 4 days of invited lectures and investigative reports. Simultaneous presentations represent all fields of cardiovascular and related disciplines. The program will include more than 4,000 basic, clinical, and population science abstract presentations; plenary, special, and how-to sessions, morning programs and cardiovascular seminars; clinical practice sessions focusing on current standards of care for practicing clinicians; translational science sessions that bring together basic scientists and clinicians; and Ask the Experts luncheons and in-depth subspecialty updates. There will also be 7 pre-Sessions symposia. See Web site: http://scientificsessions.americanheart.org

Other Meetings of Interest—Domestic

2007

Other Meetings of Interest—International

2007

Sept 17–20: 4th European Meeting on Vascular Biology and Medicine. Bristol, United Kingdom. Keynote and plenary speakers' topics include atherosclerosis treatment, heart disease treatment, clinical modula-
tion of angiogenesis, vulnerable plaque, and phenotype of vascular cells. Tracks include atherosclerosis, endothelium and angiogenesis, and cellular dysfunction. For more information, contact wheldonevents@btconnect.com, phone +44-1922-457-984, or fax +44-1922-455-238. See Web site: http://2007.emvmb.org

Oct 7–10: **7th International Congress on Coronary Artery Disease–From Prevention to Intervention (ICCAD 7)**. Venice, Italy. The meeting will follow the format of the very successful previous ICCAD Coronary Artery Disease meetings and will provide a comprehensive update on coronary disease in all its aspects. Keynote lectures will be delivered by a distinguished international faculty, while a large number of selected free communications will report new data from basic research laboratories and clinical centers around the globe. The program will include sessions on molecular mechanisms, gene therapy and cell therapy, epidemiology and prevention, and clinical aspects. There will be a major focus on new frontiers in interventional cardiology and to the surgical management of coronary disease. A new feature will be a fast track for recent and “about to break” clinical trials. For more information, contact coronary@kenes.com or phone +41-22-908-0488. See Web site: http://www.kenes.com/cad7

Oct 7–10: **20th Annual Congress of the European Society of Intensive Care Medicine**. Berlin, Germany. A series of thematic lectures will run throughout the congress that describe progresses and innovations from 14 separate topics. Pre-conference meetings are also offered. Educational sessions will take the form of lectures, round tables, pro-con debates, clinical presentations, core competencies, tutorials, and interactive education. For more information, contact public@esicm.org, phone +32-2-559-03-55, or fax +32-2-527-00-62. See Web site: http://www.esicm.org

Oct 14–16: **5th International Meeting on Intensive Cardiac Care**. Tel Aviv, Israel. Three parallel sessions, with more 100 presentations, will be featured. A parallel nursing stream will also be provided. For details, contact seminars@isas.co.il. See Web site: http://isas.co.il/cardiaccare2007

Nov 8–11: **Fifth International Congress on Vascular Dementia**. Budapest, Hungary. Attendees shall have an opportunity to deliberate on large and small vessel brain diseases and how they contribute to cognitive decline. There will also be an opportunity to identify the specific psychological markers, if any, of vascular dementia, and also the genetic factors involved. The overlap with Alzheimer’s disease will be a central issue, as will be the white matter changes frequently seen in vascular dementia. For details, contact vascular@kenes.com. See Web site: http://www.kenes.com/vascular
