Coumarin
  dermal gangrene complication of, 718

Cyclic AMP
  AMP inhibition of reactions of ADP with washed platelets
  from humans and rabbits, 93
  effect on rCBF in baboons, 357

Cyclobenzaprine
  in treatment of spasticity, 477

Cyclopropene
  effect on canine cerebral blood flow and metabolism, 87

Cytoid bodies
  retinal cotton wool spots and, 488

Death, cerebral
  angiography of, 258
  rapid and reliable diagnostic adjunct using radioisotopes,
  718
  spinal reflexes in, 997

Depression
  time course of cerebral circulatory response to metabolic
  depression, 361

Dermal gangrene
  complication of coumarin therapy, 718

Detergents
  effect on platelet electrophoresis and aggregation, 822

Dexamethasone
  in CVD
    controlled study in acute cerebral infarction, 547
    controlled study in intracerebral hemorrhage, 541
  effect on edema of focal cerebral ischemia, 148
  effect on experimental cerebral infarction in gerbil, 240
  effect on stroke, 250
  rCBF and vasomotor response in brain tumors following,
  354

Dextran 40
  management of completed strokes with, 895

Diabetes mellitus
  effects on coronary sclerosis, 90
  epidemiology of in-hospital deaths among Blacks, 923
  intracranial vascular lesions in, 996
  optic nerve involvement in, 699
  risk factor in stroke patients, 751
  stroke and blood coagulation, 400
  TIAs and risk of stroke in elderly, 980

Diagnosis
  aneurysms, 878
  arterial thrombosis, 875
  arteriovenous malformations, 877
  in children, 875
  hemorrhage, 877
  neuroradiology, 1008
  intracranial hemorrhage, 306
  retinal ischemic symptoms, 249
  transient attacks of neurological dysfunction, 278
  venous occlusion, 876

Diastasis membranes
  hemostatic changes associated with thrombus formation
  on, 480
  method for measurement of platelet adhesiveness by use
  of, 872
  reduction of thrombus formation by aspirin and RA 233, 478

Dibozane
  alpha blocked vasoconstriction, 30

Diet and nutrition
  lipid and lipoprotein responses of hypertriglyceridemia to
  low-carbohydrate modifications of AHA fat-controlled
diet, 245

Diphenylhydantoin
  effects on local CBF, 357

Dipyridamole
  failure in reducing infarct size following experimental
  coronary occlusion, 710

Diurnal variations
  in onset of stroke, 773

Dopamine
  species difference in carotid body response of cat and dog
  to serotonin and, 476

Dorsal sagittal sinus
  canine cerebral circulation, 65

Drop attacks
  affliction of women, 817

Drug abuse
  stroke in children, 843

Drug-induced seizures
  temporary alteration of cerebrovascular permeability to
  plasma protein during, 93

Drug interactions
  in oral anticoagulant and antihypertensive adrenergic
  neuron-blocking drugs, 473
  sodium warfarin and disulfiram, 484

Echocardiography
  left atrial myxoma, 451

Echoencephalography
  midline, 130

Edema
  of cerebral ischemia
    effect of dexamethasone, 148
    following carotid artery ligation in gerbils, 988
    steroid therapy, 95
  intracranial pressure gradients caused by cerebral ischemia
    and, 694
  measurement of cerebral infarction edema with sodium
    22, 461
  See also Focal lesions

Education of child with stroke, 1046
  teaching/learning process, 1048
  training programs, 1049
  See also Training and education

Elastin layer
  experimental arterial thrombosis formation in vivo by
  proteolytic enzyme perfusion and role of, 819

Elderly persons
  ergot alkaloid preparation vs. papaverine in treating
    common complaints, 829
  latent cerebral venous thrombosis, 419
  motor response time and task difficulty, 248
  systemic lupus erythematosus in, 253
  TIAs and risk of stroke in elderly poor population, 980

Electrical activity
  alterations in cerebral energy metabolism, CBF during
    indolok-induced seizures, 350
  cerebral blood flow and, 358
  mechanism of cerebral hyperemia in electrically induced
    epileptic seizures, 359
  rCBF and focal cortical epilepsy, 359

Electrocardiography
  changes after spinal subarachnoid hemorrhage, 156
  intracranial hemorrhage, hypokalemia and, 867
  patterns useful in diagnosis of intermittent heart block,
    256

Electroencephalography
  arteriographic and EEG findings in carotid artery TIA, 7
  changes after transient cerebral ischemia due to cardiac
    arrest, 251
  EEG and CBF measurements during carotid endarterectomy,
    674

INDEX

[ Hemorrhages—Hypertriglyceridemia]

5-Hydroxytryptamine

catecholamines and, in carotid body in vascular diseases,

effects of adrenergic drugs on cerebral circulation, 50
and platelet aggregation responses in subjects with acute
migraine headaches, 246

Hyperbaric oxygenation

blood flow changes in carotid and vertebral arteries by,

823

Hyperbilirubinemia

in acute hemorrhagic stroke, 999

Hyperbradykininism

new orthostatic syndrome, 475

Hypercapnia

canine cerebral circulation, 65
rCBF determination by hydrogen clearance technique,

904
effect on CSF turnover and blood-CSF barrier to protein,

712
quantitative determination of cortical microflow and EEG

in graded hypercapnia, 260
regional autoregulation in cerebral circulation to increased
perfusion pressure in normocapnia and, 139

Hypercholesterolemia

early central nervous system lesions in experimental,
in normal and subdiabetic rats, 245
neurogenic, relationship to endocrine function, 98

Hyperemia

coating of catheters against thromboembolism in percuta-
necous catheterization for angiography, 490
laboratory control of simultaneous treatment with oral
anticoagulants and, 258
modified whole blood partial thromboplastin test for,

995
plasma heparin: unique, practical, submicrogram-sensitive
assay, 711
polybrene neutralization for monitoring blood levels of,

95
premise management of heparin therapy, 477
protection for brain during carotid artery reconstruction,

89
simultaneous use of multiple fibrometers for coagulation
factor and heparin assays, 241
systemic heparinization for angiography, 260
value of monitoring heparin treatment with activated
partial thromboplastin time, 103

Heparin

coating of catheters against thromboembolism in percuta-
necous catheterization for angiography, 490
laboratory control of simultaneous treatment with oral
anticoagulants and, 258
modified whole blood partial thromboplastin test for,

995
plasma heparin: unique, practical, submicrogram-sensitive
assay, 711
polybrene neutralization for monitoring blood levels of,

95
premise management of heparin therapy, 477
protection for brain during carotid artery reconstruction,

89
simultaneous use of multiple fibrometers for coagulation
factor and heparin assays, 241
systemic heparinization for angiography, 260
value of monitoring heparin treatment with activated
partial thromboplastin time, 103

Hepatomegaly

cryptic hemangioma of choroid plexus, 486
in new born, 846
massive brain, 946
neurosurgical management in children, 1022
nonaneurysmal intracranial, and stroke mortality in
Blacks, 928
plasma renin activity in acute CVD, 160
primary pontine
revealed by pneumoencephalo-RouIette tomography,

258
pulmonary edema and, resulting from cerebral compres-
sion, 714
retinal
intracranial aneurysms and, 103
subarachnoid
EKG changes after, 156
formation of cerebrospinal fluid xanthochromia after,

100
pulmonary edema secondary to, 104
regional cerebral blood flow studies, 85
See also Subarachnoid hemorrhages
subarachnoid
clinical grade, rCBF and angiographical spasm in
monkey after, 431
traheostomies and stroke, 459

Hemostasis

fibrinolysis and, 90

Heroin addiction

favorable experience with bacterial endocarditis in, 484

Histamine

effects of intra-arterial histamine on blood flow in internal
and external carotid artery, 46
Homonymous hemianopia

review of 104 cases, 988
visual field defects and prognosis of stroke, 163

Hospitals

cardiac monitoring of acute stroke patients, 88
classification of health care centers, 522
epidemiology of in-hospital deaths among Blacks, 923
evaluation of stroke intensive care, 737
example of written procedures for physicians and nurses,

594
illustration of community hospital stroke program, 520
neurovascular care units, 933
organization of local stroke program, 528
outcome of stroke at hospital discharge in New York City
Blacks, 782

Hydrgine

use of ergot preparation in convalescent phase of stroke,

813
versus papaverine in treating aged, 820

Hydrogen clearance method

assessment of blood flow in cortex, white matter and deep
nuclei of baboons, 556
rCBF determination by, and comparison with oxygen
availability in rabbits, 904
physiological responses of cerebral circulation, 632
6-Hydroxydopamine

intracisternally administered, 474

Obesity. See Overweight and obesity

Oclusions

alterations in cerebrospinal fluid flow dynamics in cerebrovascular occlusive disease, 91

carotid artery
detecting by thermography, 57
diagnosis by Doppler sonography of ophthalmic artery, 104

EEG and arteriographical findings in TIA, 7

changes in radioisotope cisternogram in cerebrovascular-occlusive disease, 103

in children, 1013

extracranial occlusive disease, 1013

intracranial occlusive disease

in children, 1014

EEG and arteriographical findings in carotid artery TIA, 7

multiple progressive intracranial arterial occlusions, 380

stenosis of internal carotid artery, 1013

Occlusive disease
treated by enzymatic clot lysis, 478

Occlusive disorders

neurosurgical management in children, 1021

Ocular blood flow

autoregulation of, 707

Ocular fundus

morbidity and survivorship of patients with embolic cholesterol crystals in, 718

Omenum

brain vascularity by intact omentum, 988

Ophthalmic artery

occlusion, ischemic ophthalmia secondary to, 261

reversed flow through as cause of rubecia iridis, 485

Ophthalmodiaphotometry (ODM)

procedures and equipment, 115

Ophthalmological examination

procedures and equipment, 115

Ophthalmoplegia, painful

angiographic findings in, 479

Optic disc vasculitis

in young adults, 487

Optic nerve

involvement in diabetes, 699

Optic neuropathy

nonprogressive glaucoma and, 821

Oral contraceptives

cerebral arterial occlusive disease with telangiectasia associated with, 995

cerebrovascular incidents while taking, 815

effect of blood cloting and platelets, 703

effects on renin-angiotensin system and blood pressure, 819

and increased risk of cerebral ischemia or thrombosis, 987

and platelet function, 717

Orthostatic syndrome

hyperbradydininism, 475

Overweight and obesity

platelet adhesiveness, coagulation, and fibrinolytic activity, 106

risk factors in coronary heart disease, 99

risk factors in stroke in Mexican patients, 773

Oxygen

correlation of regional CBF with regional oxygen uptake using 50 method, 102

evidence for direct control of coronary vascular tone by, 712

plasma proteins, oxygen transport and atherosclerosis, 97

post-ischemic oxygen availability and consumption of isolated perfused brain of dogs, 94

rate of turnover in cerebrospinal fluid, 87

Oxygen saturation

blood gases and canine cerebral circulation, 65

Oxygen uptake

effect of pH on metabolism and ultrastructure, 221

Oxygenation

arterial

in central nervous system trauma patients, 999

hyperbaric

blood flow changes in carotid and vertebral arteries by, 823

size of infarct and, 483

P

pH adaptation

CSF changes by hyperventilation in stroke, 620

effect on metabolism and ultrastructure of cerebral cortex slices, 221

lactate in cerebrospinal fluid, 207

Pacing, ventricular

effect on long-term survival, 247

Papaverine

effects in experimental vasospasm, 706

effects of adrenergic drugs on cerebral circulation, 50

ergot alkaloid preparation (Hydergine) versus, in treating aged, 820

Papilloedema

associated with ruptured intracranial aneurysms, 817

Paraformaldehyde technique

increased binding of norepinephrine, 42, 813

Parapharyngeal space

penetrating injuries of, 93

Pathophysiology

research needs, 516

Pelletier effect probe

autoregulation and hyperemia of CBF as evaluated by thermal diffusion, 917

Percutaneous puncture

microaneurysms of carotid artery after, 479

Perfusion pressure

clinical effect of hyperventilation in stroke, 568

effect of increased intracranial pressure, 795

effects of alpha adrenergic blockade, 187

physiological responses of cerebral circulation, 632

quantitative evaluation of CBF to perfusion pressure, 712

regional autoregulation in cerebral circulation, 139

regional cerebrovascular CO2 reactivity, blood pressure, and regional resting flow, 725

rCBF during stimulation of seventh cranial nerve, 213

Peritonectomy

autogenous peritoneum as arterial patch graft, 715

Perivascular osmolality

effect on diameter of pial arteries, 713

Periventricular atherosclerotic leukoencephalopathy, 257

Periventricular leukomalacia

pathogenesis and evolution in infancy, 94

Permeability

pathophysiology of increased cerebrovascular permeability in acute arterial hypertenion, 90

temporary alteration of cerebrovascular permeability to plasma protein during drug-induced seizures, 93

Persantine

for preventing thromboembolism following valve replacement, 100

Phenformin

plus ethyloestrenol in survivors of myocardial infarction: three-year pilot study, 245

INDEX

Retinal hemorrhages
and intracranial aneurysms, 105
Retinal ischemic symptoms
in cardiovascular diagnosis, 249
Retinal strokes
incidence of carotid atheromata, 487
Retinal vessels
alterations in experimental hypertension, 95
Rheoencephalography
procedures and equipment, 132
Rheumatoid arthritis
aspirin and MI in, 260
Risk factors
blood coagulation and fibrinolysis in 788 males, 262
clinical study in Mexican patients, 773
clotting and thrombolytic abnormalities, 643
coronary heart disease; overweight and obesity, 99
diabetes and hypertension, 751
strokes in children, 840
TIA and risk of stroke in elderly, 980
Rostral superior sagittal sinus
atresia of, 993
Rubeosis iridis
reversed flow through ophthalmic artery as cause of, 485
S
Sagittal sinus
atresia of rostral superior sagittal sinus, 993
Doppler ultrasound measurements of superior sagittal sinus blood velocity, 255
Salzburg Conference on Cerebral Vascular Disease
summary of Sixth Conference (1972), 1
Saphenous vein grafts
atherosclerosis and aneurysm formation in, 827
noninvasive technique for determining patency of, 241
Scans and scanning
brain scans in autopsy proved cases of intracerebral hemorrhage, 818
of platelets in hemostasis, 998
Sclerosis
rCBF abnormalities in, 353
Scintigraphy
angiography in neurological lesions of vascular origin, 499
arterial peaks in regional cerebral blood flow, 73
procedures and equipment, 120
Screening methods
Atlanta Community High Blood Pressure Program, 240
Screening tests
detecting carotid occlusive disease by thermography, 57
Segmental vascular narrowing
unusual CV changes, 481
Seizures
induced seizures as therapy for experimental stroke in monkeys, 702
Senile dementia
anticoagulant therapy for, 472
Steroids
ischemic anoxia and cerebral serotonin levels, 105
differences in carotid dogy response of cat and dog to dopamine and, 476
Sex differences
stroke in Jerusalem district (1960-67), 465
Shy-Drager syndrome
cerebral dysautoregulation in, 820
cerebrovascular regulation in preganglionic and postganglionic autonomic insufficiency, 12
treated with levodopa and MAO inhibitor, 96
Sick sinus syndrome
assessment of sinus node function, 251
Sickle-cell anemia
massive intracranial hemorrhage in, 816
occlusion of large cerebral vessels, 259
strokes in children, 841

Stroke, Vol. 4, November-December 1973

Sinuses
narrow and atretic transverse dural sinuses, 995
Smoking
association between atherosclerotic diseases and carboxyhemoglobin levels in, 824
and warfarin dosage, 488
Snake venom
plasma fibrinogen recovery rate after administration of, 263
Sodium
measurement of cerebral infarction edema with sodium, 82, 461
Sodium deoxycorticosterone
effect on serum cholesterol in cardiac patients, 998
Sodium nitroprusside
hemodynamic effects of, 708
Sodium perchlorate
quantitative cerebral circulation studies with, 821
rCBF studies with, 353
Spasms
cerebral arterial modification by inhibition of platelet function, 988
relationship of neurological status and angiographic evidence of spasm to prognosis, 973
Spasticity. See Muscle spasticity
Spectrography
direct mass spectrographic measurement of regional intracerebral oxygen, CO2 and argon, 702
Spinal canal
angiography of, 249
blood flow in dogs, 826
effect of blood gases, 826
"normal" flow, 826
circulation disorders, 703
complications, following surgery for coarctation of the aorta, 257
descending pathways in cervical cord of cats affecting blood pressure and sympathetic activity, 249
emboli in dogs and monkeys and their relevance to aortic atheroma, 716
experimental ischemia, histologic studies after anterior spinal artery occlusion, 820
injuries
arterial oxygenation, 999
local hypothermia in treatment of, 485
lumbomeningeal anatomical observation on arterial supply to, 485
microangiography of human fetal, 998
neurosurgical management in children, 1024
occlusion
infarction secondary to, 704
in posttraumatic myelomalacia, 704
radioisotope angiography, 102
reversible trauma in cats, 473
surgical treatment of vascular anomalies, 99
use of Fogarty catheter in AV malformations, 241
vascular lesions, in children, 1017
Spinal reflexes
in cerebral death, 997
Spine, cervical
vertebral artery obstruction by hyperextension of neck, 997
Staunonol
fibrinolytic enhancement by, 101
Stapedial artery
theoretical anomalies of, 719
Starr-Edwards cloth-covered prosthesis
composite seat, 820
long-term evaluation, 256
pregnancy in six patients with, 248
Stenotic arterial thrombosis
progress in magnetically controlled, of intracranial aneurysms, 822
Steroid therapy
of brain edema, 95
dexamethasone in CVD, 541, 547

Downloaded from http://stroke.ahajournals.org/ by guest on September 12, 2017
Streptokinase
biochemical evaluation in treatment of AMI, 104

Stress
risk factors in stroke in Mexican patients, 773

Stroke
and blood coagulation, 400
cardiac monitoring of acute stroke patient, 88
in central Harlem, 406
convalescent phase
use of ergot preparation (Hydergine) in, 815
diagnostic procedures, 129
epidemiological study in Jerusalem (1960-67), 465
impaired neurogenic CV control and dysautoregulation
after stroke, 169
latent cerebral venous thrombosis syndrome, 419
natural history of stroke in Rochester, Minn., 20
outcome of stroke at hospital discharge in New York City
Blacks, 782
prognosis
in patients with TIA, 666
visual field defects and, 163
retinal, 487
tracheostomies and, 459
treatment of CVD with clofibrate, 684
on wrong side: use of Doppler ophthalmic test in cerebral
vascular screening, 478

Stroke centers
visual field defects and prognosis of stroke, 163

Stroke prevention
research needs, 516

Stroke programs
establishing local program, 528
example of written procedures for physicians and nurses,
534
North Carolina Comprehensive Stroke Program, 531

Stroke registry
in Göteborg, Sweden, 102
prospective method of studying stroke, 705

Subarachnoid hemorrhages
clinical grade rCBF, and angiographic spasm after
subdural and, 431
delayed arterial spasm following, 704
due to ruptured aneurysms, 242
effect of glycerol and intracarotid phenoxybenzamine after
SAH: ultrastructural study, 987
effect of increased intracranial pressure, 795
EKG changes after, 156, 488
experimental
cerebral hemodynamic and metabolic changes after, 264
changes in cerebral vasomotor reactivity to CO2 and
autoregulation, 263
effect of glycerol and intracarotid phenoxybenzamine on
cerebral hemodynamics and metabolism, 263
fibrinolytic activity of CSP after SAH, 815
formation of CSF xanthochromia after, 100
life-threatening arrhythmias in, 826
middle cerebral artery embolometry and vasospasm,
446
monitoring antifibrinolytic therapy, 818
natural history of stroke in Rochester, Minn., 20
primary, in Iceland, 764
pulmonary edema secondary to, 104
regional cerebral blood flow studies, 85
relationship of neurological status and angiographical
evidence of spasm to prognosis, 973
serial changes in acid-base values in blood and CSF, 820
structural changes of intradural arteries following, 701
treatment of cerebral vasospasm with isoproterenol and
lidocaine hydrochloride, 994
“twin” intracranial aneurysms causing, in identical twins,
702
use of antifibrinolytic drugs to prevent early recurrent
aneurysmal SAH, 992
validity of intravenous isotope technique in CBF studies,
251

ventriculotomy for treatment of acute hydrocephalus
following SAH, 990
Subclavian artery
revascularization, by subcutaneous axillary-axillary graft, 700
Subclavian-carotid bypass
for cerebrovascular insufficiency, 95, 474
Subclavian steal
joint study of extracranial arterial occlusion, 485
Subdural hygroma
following head injury, 703
Superior sagital sinus blood velocity
Doppler ultrasound measurements, 255
Surgery
aortic valve replacement with Starr-Edwards prosthesis,
820
arterial microautografts, 828
arterial vascular, use of Doppler ultrasonic flowmeter
during, 89
cannulation of jugular bulb, 955
carotid and vertebral artery occlusive disease
physiological monitoring, 487
carotid artery
heparin protection for brain during, 89
carotid bruit; significance in patients undergoing abdomi
dinal aortic operation, 993
carotid endarterectomy
extraluminal, 93
carotid sinus syndrome, 990
carotid-subclavian bypass
effect of peripheral resistance on carotid blood flow
after, 95, 474
carotid thromboendarterectomy
intraoperative arteriography, 991
endarterectomies, 93
EEG and CBF measurements during, 674
of external carotid artery, 993
extracranial-intracranial bypass grafts, 243
intracranial
arterial aneurysms, disturbances of serum electrolytes
after, 96
repeated measurements of cerebral blood flow during, 93
intracranial arterial embolism, 1001
intracranial hemorrhage, 309
medical and surgical management, 273
microsurgical cerebral revascularization
anatomy of middle cerebral artery, 412
neurological status and angiographical evidence of spasm,
973
neurosurgical management of strokes in children, 1021
arterial occlusive disease, 1022
extracranial vascular disorders, 1021
hemorrhagic disorders, 1023
intracranial vascular disorders, 1022
spinal cord disorders, 1024
tortuosity, 1022
traumatic occlusive disorders, 1021
venous occlusion, 1023
physiological monitoring
occlusive disease, 487
postnephrectomy arteriovenous fistula causing "stroke"
and congestive heart failure, 993
prosthetic replacement of mitral valve, 816
research needs, 518
revascularization with autogenous grafts, 814
spinal cord, vascular anomalies of, 99
subclavian-carotid bypass graft for cerebrovascular in
sufficiency, 95
subdural hematomas, 93
TIA and stenotic lesions of neck vessels, 295
tracheostomies and stroke, 459
valve replacement
use of persantine in preventing thromboembolism
following, 100
Survival
outcome of stroke at hospital discharge in New York City
Blacks, 782
stroke in central Harlem, 406
**Symposium Abstracts**

Cerebral Circulation and Metabolism: Sixth International CBF Symposium, 321

**autoregulation, 323**

**CBF and electrical activity, 339**

**chemical control, 326**

**clinical miscellaneous, 352**

**clinical stroke, 349**

**diffuse ischemia, 339**

**focal lesions, 329**

**increased intracranial pressure and CBF, 345**

**methodology, 335**

**neurogenic control, 366**

**pharmacology and anesthesia, 356**

Systemic lupus erythematosus
cyclophosphamide in treatment of, 991

in the elderly, 253

ocular findings in, 821

procaainamide-induced, 249

Takayasu’s arteritis
total aortography in diagnosis of, 260

Teaching Scholar program
promise of better patient care, 492

Technetium
cerebral transit time of 99m technetium sodium pertechnetate before and after cerebral arteriography, 990

scanning of subdural hematomas, 989

Temporal arteries
detecting carotid occlusive disease by thermography, 57

observations on, 488

Tenorial herniation
clinical effect of hyperventilation in stroke, 568

Therapists
current availability of, 527

Thermal diffusion
autoregulation and hyperemia of CBF as evaluated by, 917

Thermography
detecting carotid occlusive disease by, 57

use with children, 1011

Thrombocytopenia
in children, 842

Thrombocytosis
in children, 842

Thromboembolism
complications during anticoagulant therapy, 89

perinate in preventing, following valve replacement, 100

Thrombolysis
abnormalities as risk factor for stroke, 643

Thromboplastin
abnormalities in clotting and thrombolysis as risk factors, 643

value of monitoring heparin treatment with activated partial thromboplastin time, 105

Thrombolysis generation test
stroke and blood coagulation, 400

Thrombosis
anatomy of middle cerebral artery, 412

carotid TIA associated with antiplatelet aggregation therapy, 732

cerebral atherosclerosis in Japanese, 768

in child with stroke, 1013

effect of aspirin on, 387

estrogen in treatment of, 987

effect of aspirin on thrombolysis, 387

microcirculatory relation to thrombus in proximal coronary artery: effect of aspirin, dipyridamole and thrombolysis, 999

stroke and blood coagulation, 400

tracheotomies and stroke, 459

venous effect of aspirin on postoperative, 99

massive brain hemorrhages, 946

visual field defects and prognosis of stroke, 163

Thrombus formation
effect of aspirin on vascular catheters in cats, 481

experimental arterial, 819

reduction of, on dialysis membranes by aspirin and RA, 233, 478

Tissues
response to arterial substitute of bovine origin, 249

ToIosa-Hunt syndrome
angiographic findings in, 479

Tomography
clinical experience with circular angiotomography, 482

Tortuosity
neurosurgical management in children, 1022

Tracheotomies
control of common carotid and innominate artery hemorrhage complicating, 826

and stroke, 459

Training and education
dieticians, 510

speech pathologists, 510

survey of predoctoral stroke education, 512

vocational rehabilitation counselors, 512

Transit focal cerebral ischemia
in cardiac dysrhythmia, 711

Transient ischemic attacks
in cardiac dysrhythmia and, 899

differences in occurrence of carotid TIA associated with antplatelet aggregation therapy, 732

effect of aspirin on thrombosis, 387

ECG changes, 999

EEG and arteriographical findings in carotid artery TIs, 7

extracranial arterial reconstruction for, 995

impaired neurogenic CV control and dysautoregulation after stroke, 169

indicators of extracranial carotid artery disease, 537

medical treatment, 294

monocular Tls and external carotid artery, 991

prevalence and prognosis in biracial rural community, 1000

prognosis, 666

and risk of stroke in elderly poor population, 980

in Rochester, Minn. (1955-69), 816

and stenotic lesions of neck vessels, 294

surgical treatment, 295

treatment of CVD with clofibrate, 684

ulcerated atheromatous plaques of the carotid artery bifurcation, 912

Stroke, Vol. 4, November-December 1973
INDEX

Transverse dural sinuses
- narrow and atretic, 995

Trauma
- rCBF in brain and cervical cord in experimental head trauma, 334
- stroke in children, 844

Tumors, cerebral
- remitting signs in cerebral mass lesions, 989

U

Urethan anesthesia
- cholinergic control of cortical blood flow, 232

Urokinase
- radioactive, for blood clot scanning, 100
- therapy: dosage schedules and coagulant side effects, 101

Valsalva maneuver
- and CBF velocity, 247

Vascular resistance
- See Cerebral vascular resistance

Vasculitis
- stroke in children, 842

Vasoconstriction
- absence with hyperventilation in tetraplegic man, 98
- of basilar artery, 760
- evidence of vasoconstrictor sympathetic nerves in brain vessels of mice, 713
- middle cerebral artery embolectomy and prolonged widespread vasospasm, 446
- modification with hyperventilation in normal man by thymoxamine, 98
- sympathetic cerebral vasoconstriction blocked by adrenergic alpha receptor antagonists, 30
- sympathetic neural influence on norepinephrine vasoconstriction in brain vessels, 474

Vasodilation
- rCBF during stimulation of seventh cranial nerve, 213
- effects of intra-hemispheric ataxia, 46

Vasomotor nervous control
- autoregulation, 742
- mechanism of chemical control of cerebral vasomotor activity, 823

Vasoparalysis
- clinical effect of hyperventilation in stroke, 568

Vasopressor pathways
- electrophysiological studies on organization of, 714

Vasospasm, cerebral
- alteration by adrenergic blockade, 255
- CBF evaluation of prolonged experimental, 255
- middle cerebral artery embolectomy and prolonged widespread vasospasm, 446
- reversal of, 1001
- role of prostaglandin -F<sub>1</sub> in genesis of, 248
- treatment with isoproterenol and lidocaine hydrochloride, 357, 994

Venous occlusion
- neurosurgical management in children, 1023

Venous outflow
- regional autoregulation in cerebral circulation, 139

Ventilation
- clinical effect of hyperventilation in stroke, 568

Ventricular drainage
- extracranal hemorrhage and, 87

Ventricular pacing
- effect on long-term survival, 247

Ventriculography
- localization of intraventricular arteriovenous malformations, 814

Verebral artery
- bypass anomaly associated with cerebral aneurysm and arteriovenous malformation, 96
- extracranial and intracranial structures, 250
- giant cell arteritis, 709
- obstruction by hypertension of the neck, 997
- post-angiographic vertebral arteriovenous fistulae, 263

Vertebral-basilar arteries
- impaired neurogenic cerebrovascular control and dysautoregulation after stroke, 169
- occlusions, study with post-mortem data, 819

Vertigo
- prognosis in TIA, 666

Veterans Administration Cooperative Study Group
- treatment of CVD with clofibrate, 684

Viguidil
- increase in CBF by, 218

Visual field defects
- prognosis of stroke and, 163

Volume
- cardiovascular dimensions in intracranial arteriovenous malformation, 787
- quantitative isotope studies of cerebral vascular volume, 827

W

Wall/lumen ratio
- effects of increased intracranial pressure, 795

Warfarin
- interaction of benzodiazepines with, 244
- interaction of sodium warfarin and dapsone, 484
- prothrombin levels maintained with meprobamate and, 101
- smoking and warfarin dosage, 488

Water areas
- clinical and biochemical indicators of CVD among men living in hard and soft water areas, 704

White matter
- degeneration in hypoxia, acidosis and edema, 718
- hydrogen clearance method in assessment of, 556
- physiological responses of cerebral circulation, 632

Women
- cryptogenic drop attacks: an affliction of women, 817

X

Xenon-133
- arterial peaks in rCBF, 73
- cerebral complications following rCBF measurements, 658

CBF measurements
- differences between "81-key and 31-key" decay curves, 364
- inhalation technique, 363
- in carotid endarterectomy, 363
- pitfalls in studies in head-injured patients, 364
- quantitating local CBF in 144 subdivisions of human brain, 365
- diffusion bypass of xenon in brain circulation, 817
- EEG and CBF measurements during carotid endarterectomy, 674
- inhalation technique for measuring CBF, 363
- regional cerebrovascular CO<sub>2</sub> reactivity, blood pressure, and regional resting flow, 725
- X-ray fluorescence
- effects of arterial blood pressure on CBF, 390

Young people
- multiple progressive intracranial arterial occlusions, 380
- occlusion of basilar artery, 258
- pathoanatomical changes in older child, 864
