In the article by Tsantilas et al, “Short Time Interval Between Neurologic Event and Carotid Surgery Is Not Associated With an Increased Procedural Risk,” which published online on October 13, 2016, and appeared in the November 2016 issue of the journal (Stroke. 2016;47:2783–2790. DOI: 10.1161/STROKEAHA.116.014058), a correction is needed.

On page 2783, in the Key Words, “systolic time interval” is changed to read, “time interval.”

This correction has been made to the current online version of the article, which is available at http://stroke.ahajournals.org/content/47/11/2783.
