Intracranial aneurysms in early childhood, 536
Intracranial aneurysms: characteristics of aneurysms in siblings. (Letter to the editor), 85
Intracranial arterial aneurysms in infancy and childhood, 85
Intracranial saccular aneurysms in the first three decades, 608
Iron-acryl compound for stereotaxic aneurysm thrombosis, 78
Late morbidity and mortality of common carotid ligation for posterior communicating aneurysms. A comparison to conservative treatment, 276
Les indications et les conditions opératoires des anévrismes chez les gens âgés. Indications and operative conditions of aneurysms in old patients, 607
The management of ruptured intracranial aneurysm in sickle cell anemia. Case report, 608
Meningiomas and aneurysms of the cavernous sinus. Neuroophthalmologic features, 532
Microangiographic study of cerebral and ocular aneurysms in hypertensive rabbits, 613
Microsurgical treatment of cerebral aneurysms at the bifurcation of the internal carotid artery, 617
A model study of why some intracranial aneurysms thrombose but others rupture, 583
Mooyama disease associated with aneurysm, 526
Multiple aneurysm formation as a complication of interventional angiography, 411
Multiple intracranial aneurysms: identifying the ruptured lesion, 608
Prolonged antifibrinolysis: an effective non-surgical treatment for ruptured intracranial aneurysms? 537
Reinforcement with gauze wrapping for ruptured aneurysms of the middle cerebral artery, 279
Saccular aneurysm of infancy and early childhood, 414
The significance for diagnosis and for surgical technique of multiple aneurysms of the same internal carotid artery, 616
Significance of vasospasm in the treatment of ruptured intracranial aneurysms, 89
Spontaneous healing of intracranial aneurysms after subarachnoid hemorrhage. Case report, 528
Stereotaxic thrombosis of inaccessible intracranial aneurysms, 279
Subdural hematomas due to ruptured cerebral aneurysms: angiographic diagnosis and potential pitfall for CT, 530
Surgery of ruptured intracranial aneurysm. Timing and grading, 618
Timing and indication of surgery for ruptured intracranial aneurysms with regard to cerebral vasospasm, 616
The treatment of intracranial aneurysms by injection with a tissue adhesive, 180
Treatment of subarachnoid hemorrhage from ruptured intracranial aneurysm with tranexamic acid: a double-blind clinical trial, 616
Unruptured intracranial aneurysms — an unusual source of epilepsy, 542
Aneurysm clips
Interrelationship of aneurysm clips and vascular tissue, 620
Aneurysm, mycotic
Cerebral hemorrhage from a mycotic aneurysm developing during appropriate antibiotic therapy, 267
Intracranial hemorrhage and infarction in anticoagulated patients with prosthetic heart valves, 18
Multiple mycotic aneurysms due to candida endocarditis, 85
Angiography
Amaurosis fugax and carotid artery disease: indications for angiography, 88
The angiographic diagnosis of occlusions of the posterior cerebral artery, 280
Angiographic findings in giant cell arteritis, 90
The angiographically occult cerebrovascular malformation. Report of three cases, 413
Bilateral cerebral angiography with catheterization of only one carotid artery, 417
Cerebral angiography with non-ionic (metrizamide) and ionic (meclumine metrizoate) watersoluble contrast media. A comparative study with double blind technic, 179
Cerebral arterial revascularization: the value of repeated angiography in selection of patients for operation, 604
Cerebral ischemia. I. Current angiographic techniques, complications, and safety, 615
Cerebrovascular disease in sickle cell anemia: a clinical, pathological and radiological correlation, 45
Clinical and arteriographic comparison of amaurosis fugax with hemispheric transient ischemic attacks, 254
Clinical testing of Amipaque for cerebral angiography, 614
Comparative angiographic and histological evaluations of intracranial atherosclerosis in hypertensive and normotensive subjects, 364
Complications of cerebral angiography, 416
Complications of cerebral angiography and pneumography, 186
Computed tomography in a transient brain stem disorder, 417
Correlation between angiographic findings and the ischemia of head injury, 530
Direct serial magnification angiography applied to cerebral aneurysms, 411
Disappearing carotid defects, 258
Electromagnetic rheoangiometry: an extension of selective angiography, 409
Experimental cerebral vasospasm: comparison of perfusion deficits with angiography, 288
Impact of computed tomography on utilization of cerebral angiograms, 88
Leptomeningeal artery atherosclerosis visualized by angiography: clinical correlates, 262
Multiple aneurysm formation as a complication of interventional angiography, 411
Routine operative arteriography during carotid endarterectomy: a reassessment, 411
Sequential angiographic studies demonstrating delayed development of an acute epidural hematoma. Case report, 536
Subdural hematomas due to ruptured cerebral aneurysms: angiographic diagnosis and potential pitfall for CT, 530
Technique for multi-view radionuclide angiography, 566
Tolosa-Hunt syndrome. Arteriographic evidence of improvement in carotid narrowing, 553
The value of repeat pan-angiography in cases of unexplained subarachnoid hemorrhage, 610
Angioma
Cavernous angiomas of the brain. Account of fourteen personal cases and review of the literature, 542
Intracerebral venous angioma. Case report and review, 611
Surgical treatment of arteriovenous angiomas localised in the corpus callosum, basal ganglia and near the brain stem, 542
Angiotsin
Vasoconstrictor effect of angiotensin on pial arteries, 487
Anoxic myelopathy
Diffuse “anoxic” myelopathy, 264
Electroencephalographic prediction of anoxic brain damage after resuscitation from cardiac arrest in patients with acute myocardial infarction, 543
Anticoagulant therapy
Anticoagulant therapy and central nervous system complications in patients with prosthetic valve endocarditis, 606
Carotid and vertebral-basilar transient ischemic attacks: effect of anticoagulants, hypertension, and cardiac disorders on survival and stroke occurrence — a population study, 527
Carotid endarterectomy. Temporal profile of the healing process and effects of anticoagulation therapy, 412
Discontinuing anticoagulant therapy in surgical patients with cardiac valve prostheses. Observations in 180 operations, 423
Effects of anticoagulants in an animal model of septic cerebral embolization, 573
In vivo assessment of anticoagulation, 285
Incidence of emboli with cloth-covered Starr-Edwards valve without anticoagulation and with varying forms of anticoagulation. Analysis of 183 patients followed for 3½ years, 416
Intracranial hemorrhage and infarction in anticoagulated patients with prosthetic heart valves, 18
One year of heparin anticoagulation. An ambulatory subject using a totally implantable infusion pump, 184
Artery, carotid internal

Arterial injury

Arterial pressure

Arteriosclerosis

Artery, anterior spinal

Aphasia

Arterial pressure

Central depression of carotid baroreceptor pressor response, arterial pressure and heart rate by 5-hydroxytryptophan: influence of supracircular areas of the brain, 189

Arteriosclerosis

Acute cerebrovascular and myocardial ischemia superimposed upon chronically hypertensive and arteriosclerotic male Sprague-Dawley rats, 183

Combined effects of acute cerebrovascular ischemia and myocardial infarction in arteriosclerotic, male Sprague-Dawley rats, 183

Intracranial arterial aneurysms in infancy and childhood, 85

Platelet aggregation and cyclic nucleotide phosphodiesterase activity in arteriosclerotic patients, 540

Arteritis

Angiographic findings in giant cell arteritis, 90

Anterior segment ischemia in temporal arteritis, 417

Hemorrhagic complications of cerebral arteritis, 91

Intracranial involvement of giant-cell arteritis, 77

Artery, anterior spinal

Intradural extramedullary spinal arterial-venous malformations fed by the anterior spinal artery, 81

Artery, azygos

Aneurysm of the azygos artery, 282

Artery, basilar

Basilar artery migraine. A review of 30 cases, 531

Bilateral occlusion of basilar artery branches, 415

Eight-year follow-up of experimental carotid-middle cerebral and carotid-basilar arterial bypass grafts and anastomoses, 606

Increased sensitivity of the basilar artery to norepinephrine and 5-hydroxytryptamine following experimental subarachnoid hemorrhage, 176

The microsurgical anatomy of the basilar artery bifurcation, 181

Vasoactive properties of prostaglandin compounds on the in vitro human basilar artery, 81

Artery, carotid external

Amaurosis fugax from disease of the external carotid artery, 87

Crossed external carotid ligation for giant aneurysms, 614

Detection of atherosclerotic plaques in carotid arteries by the use of 123I-fibrinogen, 416

ICA back pressures: importance of external carotid measures, 273

Importance of the external carotid artery in extracranial cerebrovascular occlusive disease, 88

Internal and external carotid vascular responses to vasoactive agents in the monkey, 416

Planned extra-anatomic cerebral revascularization for carotid artery ligation, 534

Artery, carotid internal

Carotid-axillary bypass: clinical and experimental evaluation, 288

Cerebrovascular disease in sickle cell anemia: a clinical, pathological and radiological correlation, 45

Cerebrovascular evaluation: assessment of Doppler scanning of carotid arteries, ophthalmic Doppler flow and cervical bruits, 563

Comparison of noninvasive diagnostic techniques in carotid artery occlusive disease, 78

Detection of atherosclerotic plaques in carotid arteries by the use of 123I-fibrinogen, 416

Dilated episcleral arteries — a significant physical finding in assessment of patients with cerebrovascular insufficiency, 42

Direct attack on carotid ophthalmic and large internal carotid aneurysms, 81

Doppler ultrasound and supraorbital photoplethysmography for noninvasive screening of carotid occlusive disease, 85

Extra-intracranial arterial anastomosis previous to carotid ligation. Case report for a cervical internal carotid aneurysm from traumatic origin, 289

Fibromuscular dysplasia of the cervico-cephalic arteries, 535

Hypoglossal paralysis due to compression by a tortuous internal carotid artery in the neck, 543

Internal and external carotid vascular responses to vasoactive agents in the monkey, 416

Internal carotid back pressure, intraoperative shunting, ulcerated atheroma, and the incidence of stroke during carotid endarterectomy, 533

Intracranial arterial aneurysms and carotid endarterectomy, 78

Kinking of the internal carotid artery. Clinical significance and surgical management, 84

Microsurgical treatment of cerebral aneurysms at the bifurcation of the internal carotid artery, 617

Non-penetrating atheroma to the carotid artery with secondary thrombosis and embolism: treatment by thrombolysis, 83

Observations on simultaneous internal carotid artery and total cerebral blood flow measurements in man, 282

Pseudo-occlusion of the internal carotid artery, 408

Relationship between ophthalmic artery blood flow and re-canalization of occluded carotid artery. Ultrasound Doppler study, 360

The significance for diagnosis and for surgical technique of multiple aneurysms of the same internal carotid artery, 616

Spontaneous dissection of cervico-cerebral arteries, 538

“Stump” of internal carotid artery — a source for further cerebral embolic ischemia, 448

Superficial temporal-middle cerebral artery aneurysm for internal carotid occlusion, 82

Surgical management of the totally occluded carotid artery, 275

Thromboendarterectomy for total occlusion of the internal carotid artery: a reappraisal of risks, success rate and potential benefits, 34

The use of velocity wave form analysis in the diagnosis of carotid artery occlusive disease, 275

Artery, cerebral

Cerebral arterial revascularization: the value of repeated angiography in selection of patients for operation, 604

Cerebral artery spasm. A histological study at necropsy of the cerebral arterial revascularization, common carotid to distal middle cerebral artery bypass, 540

Clinicopathological study of cerebral aneurysms. Origin, rupture, repair, and growth, 525

Experiences of surgical treatment of 400 consecutive ruptured cerebral arterial aneurysms, 542

Responses of isolated dog cerebral and peripheral arteries to prostaglandins after application of aspirin and polyphloretin phosphate, 490

Artery, common carotid

Brain metabolism and arterial acid-base balance following bilateral carotid occlusion in normotensive and experimental hypertensive rats, 538

Carotid embolization presenting as total monocular blindness, 186

Cerebral revascularization: common carotid to distal middle cerebral artery bypass, 340

Clinicopathological study of cerebral aneurysms. Origin, rupture, repair, and growth, 525

Experiences of surgical treatment of 400 consecutive ruptured cerebral arterial aneurysms, 542

Responses of isolated dog cerebral and peripheral arteries to prostaglandins after application of aspirin and polyphloretin phosphate, 490

Artery, common carotid

Brain metabolism and arterial acid-base balance following bilateral carotid occlusion in normotensive and experimental hypertensive rats, 538

Carotid embolization presenting as total monocular blindness, 186

Cerebral revascularization: common carotid to distal middle cerebral artery bypass, 340

Common carotid artery stenosis due to subintimal hematoma following blunt trauma to the neck. Report of a case, 84

Late morbidity and mortality of common carotid ligation for posterior communicating aneurysms. A comparison to conservative treatment, 276

The use of velocity wave form analysis in the diagnosis of carotid artery occlusive disease, 275

Artery, epicardial

Dilated epicardial arteries — a significant physical finding in
Artery, innominate
Innominate artery endarterectomy. A 16-year experience, 274

Artery, leptomeningeal
Leptomeningeal artery athrosclerosis visualized by angiography: clinical correlates, 262

Artery, mesencephalic
Thrombosis of the mesencephalic artery. A clinicopathological study of two cases and its correlation with the arterial vascularisation, 82

Artery, middle cerebral
Bilateral temporal-middle cerebral artery anastomosis for moyamoya syndrome, 81
Cerebral blood flow determined by hydrogen clearance during middle cerebral artery occlusion in unanesthetized monkeys, 143
Cerebral revascularization: common carotid to distal middle cerebral artery bypass, 540
Correlation between the clinical picture, the EEG and cerebral blood flow after partial occlusion of the middle cerebral artery in man, 91
Eight-year follow-up of experimental carotid-middle cerebral and carotid-basilar arterial bypass grafts and anastomoses, 606
Experimental regional cerebral ischemia in the middle cerebral artery territory in primates. Part 3: effects on brain water and electrolytes in the late phase of acute MCA stroke, 387
A fluorescent histochemical study of changes in noradrenergic neurons following experimental cerebral infarction in the rat, 296
Intracerebellar hematoma following microsurgical STA — cortical MCA bypass surgery, 188
Ipsilateral subclavian to external carotid and STA-MCA bypasses for retinal ischemia, 418
Modification of acute focal ischemia by treatment with mannitol, 4
Non-penetrating trauma to the carotid artery with secondary thrombosis and embolism: treatment by thrombolyisin, 83
Observations on moyamoya disease: a case treated with superficial temporal-middle cerebral artery anastomosis, 539
Prevention of cerebral infarction in the monkey by omental transposition to the brain, 224
Reinforcement with gauze wrapping for ruptured aneurysms of the middle cerebral artery, 279
SEM evaluation of endothelial damage following temporary middle cerebral artery occlusion in dogs, 410
Staged intracranial and extracranial revascularization, 285
Superficial temporal-middle cerebral artery anastomosis for internal carotid occlusion, 82

Artery, occipital
The occipital artery. Anatomy-normal arteriographic aspects-embryological significance, 613
Occipital to posterior inferior cerebellar artery bypass surgery, 609
Syndrome of agitated delirium and visual impairment: a manifestation of medial tempo-occipital infarction, 284

Artery, ophthalmic
Direct attack on carotid ophthalmic and large internal carotid aneurysms, 81
Doppler ultrasound and suprarenal photopletysmography for noninvasive screening of carotid occlusive disease, 85
Relationship between ophthalmic artery blood flow and revascularization of occluded carotid artery. Ultrasonic Doppler study, 360

Artery, posterior cerebral
Aneurysms of the posterior cerebral artery. Locations and clinical pictures, 91
The angiographic diagnosis of occlusions of the posterior cerebral artery, 280
Microsurgical anatomy of the posterior cerebral artery, 323

Artery, posterior inferior cerebellar
Occipital to posterior inferior cerebellar artery bypass surgery, 609
Posterior fossa revascularization: anastomosis of vertebral artery to PICA with interposed radial artery graft, 607

Artery, subclavian
Cardiac cycle-dependent alternating flow in vertebral arteries with subclavian artery stenoses, 229
Carotid-axillary bypass: clinical and experimental evaluation, 288
Ipsilateral subclavian to external carotid and STA-MCA bypasses for retinal ischemia, 415

Artery, superficial temporal
Bilateral temporal-middle cerebral artery anastomosis for moyamoya syndrome, 81
Intracranial dissection of the superficial temporal artery, 536
Observations on moyamoya disease: a case treated with superficial temporal-middle cerebral artery anastomosis, 539
Superficial temporal-middle cerebral artery anastomosis for internal carotid occlusion, 82

Aspirin
Aspirin, hyperventilation, and cerebellar infarction in sickle cell disease, 407
Controlled trial of aspirin on cerebral ischemia. Part II: surgical group, 309
Editorial: aspirin — effective in males threatened with stroke, 295
Failure of aspirin to prevent postoperative deep vein thrombosis in patients undergoing total hip replacement, 618
Inhibition of platelet prostaglandin synthetase by oral aspirin, 417
Responses of isolated dog cerebral and peripheral arteries to prostaglandins after application of aspirin and polyphloretin phosphate, 490
Studies on platelet plasma membranes. III. Membrane glycoprotein loss from circulating platelets in rabbits: inhibition by aspirin-dipyramide and acceleration by thrombin, 419
Thromboembolic complications after mitral valve replacement with Hancock xenograft, 612
Treatment of transient ischemic attacks, 299
Trial of aspirin during weaning patients with transient ischaemic attacks from anticoagulants, 617

Atheroma
Internal carotid back pressure, intraoperative shunting, ulcerated atheroma, and the incidence of stroke during carotid endarterectomy, 533
Pathogenesis and prevention of trauma-provoked atheromas, 185
Regression of atheroma in the rabbit, 409

Atherosclerosis
Amaurosis fugax due to isolated atherosclerotic carotid artery disease in a young woman, 422
Biochemical effects of moderate diet and clofibrate on swine atherosclerosis, 608
Carbon monoxide-induced arterial wall hypoxia and atherosclerosis, 614
Comparative angiographic and histological evaluations of intracranial atherosclerosis in hypertensive and normotensive subjects, 364
Detection of atherosclerotic plaques in carotid arteries by the use of 18F-fluorine, 416
Diet-induced atherosclerosis and experimental hypertension in stump tail macaques (Macaca arctoides). Effects of antihypertensive drugs and a non-atherogenic diet in the evolution of lesions, 610
Editorial: noninvasive techniques for diagnosis of carotid artery disease, 427
Failure of regression of atherosclerosis in dogs with moderate cholesterolemia, 82
Leptomeningeal artery atherosclerosis visualized by angiography: clinical correlates, 262
Morphological effects of moderate diet and clofibrate on swine atherosclerosis, 608
Platelet aggregation in patients with severe atherosclerosis, 541
Prostaglandins and the arterial wall: an avenue for research in the pathogenesis of atherosclerosis (editorial), 287
The rate of atherosclerosis change during treatment of hyperlipoproteinemia, 415
Scintigraphic detection of atherosclerotic lesions and venous
thrombi in man by indium-111-labelled autologous platelets, 604
Smoking, carbon monoxide, and atherosclerotic diseases, 419

Atropine
Effect of atropine on cerebrovascular responsiveness to carbon dioxide, 528

Autoregulation
Autoregulation of cerebral blood flow during early experimental renal hypertension in the conscious dog, 413
Brain blood flow autoregulation and metabolism during halothane anesthesia in monkeys, 412
Cerebral arterial blood flow and aneurysm surgery. Part 2: induced hypotension and autoregulatory capacity, 279
Cerebral blood flow autoregulation in the rat, 150
Experimental studies on the neurogenic factors in autoregulation of regional circulation in dogs' brains, 86
Hyperemia, CO₂ responsiveness, and autoregulation in the white matter following experimental spinal cord injury, 413

Baboon studies
Barrier and uptake mechanisms in the cerebrovascular response to noradrenaline, 185
The capacity for computed tomography diagnosis of cerebral infarction. An experimental study in the nonhuman primate, 275
Cerebral circulation: effect of stimulation and blockade of dopamine receptors, 177
Cerebral circulatory and metabolic effects of 5-hydroxytryptamine in anaesthetized baboons, 183
Effect of atropine on cerebrovascular responsiveness to carbon dioxide, 528
Extracellular potassium activity, evoked potential and tissue blood flow. Relationships during progressive ischemia in baboon cerebral cortex, 79
Systemic vascular responses to increased intracranial pressure. 2. The 'Cushing' response in the presence of intracranial space-occupying lesions: systemic and cerebral haemodynamic studies in the dog and the baboon, 277
Time course of the cerebral circulatory response to metabolic depression, 414
Xenon enhanced CT for analysis of cerebral integrity, perfusion, and blood flow, 123

Balloon catheterization
Complete obliteration of a carotid cavernous fistula with sparing of carotid blood flow using a detachable balloon catheter, 607
Embolization of cerebral vessels with inflatable and detachable balloons. Technical note, 413
Experimental embolization with inflatable and releasable balloons in dogs, 287
Systemic vascular responses to increased intracranial pressure. 1. Effects of progressive epidual balloon expansion on intracranial pressure and systemic circulation, 277

Baroreceptors
Carotid baroreceptor function in hypertensive patients, 285
Central depression of carotid baroreceptor pressor response, arterial pressure and heart rate by 5-hydroxytryptophan: influence of suprapontine areas of the brain, 189
Circulatory reflexes from carotid and extracarotid baroreceptor areas in man, 186
Time course of baroreceptor resetting in short-term hypotension in the rat, 609

Beta-histidine
Comparative responses of the carotid and vertebral arterial systems of rhesus monkeys to betahistine, 382

Bifurcation, carotid
Imaging the carotid bifurcation using continuous-wave Doppler-shift ultrasound and spectral analysis, 465
Microsurgical treatment of cerebral aneurysms at the bifurcation of the internal carotid artery, 617
A new look at emergency carotid artery operations for the treatment of cerebrovascular insufficiency, 599

Ultramicroscopic ulcerations and thrombi of the carotid bifurcation, 274

Bird studies
Cerebral blood flow in birds: effect of hypoxia, 531
Blindness
Carotid embolization presenting as total monocular blindness, 186
Ipsilateral blindness. A complication of carotid endarterectomy, 78
Syndrome of agitated delirium and visual impairment: a manifestation of medial temporal-occipital infarction, 294

Blood-brain barrier
Effect of an acute increase of the intravascular pressure on the blood-brain barrier, 388
Effect of non-respiratory alkalosis on brain tissue and cerebral blood flow in rats with damaged blood-brain barrier, 354
Intra-arterial basic dye studies of the blood-CSF and blood-brain barriers, 92
Isoprotenerol and propranolol: ability to cross the blood-brain barrier and effects on cerebral circulation in man, 344

Blood-CSF barrier
Intra-arterial basic dye studies of the blood-CSF and blood-brain barriers, 92

Blood flow, cerebral
Analysis of the effect of bilateral sympathetic stimulation on cerebral and cephalic blood flow in the dog, 29
Assessment of regional cerebral blood flow by continuous carotid infusion of krypton-81m, 189
An automated cerebral blood flow analyzer: concise communication, 77
Autoregulation of cerebral blood flow during early experimental renal hypertension in the conscious dog, 413
Barrier and uptake mechanisms in the cerebrovascular response to noradrenaline, 185
Blood flow and oxygen consumption of the focally traumatized monkey brain, 92
Cerebral blood flow autoregulation and metabolism during halothane anesthesia in monkeys, 412
Cerebral arterial blood flow and aneurysm surgery. Part 1: local arterial flow dynamics, 278
Cerebral arterial blood flow and aneurysm surgery. Part 2: induced hypotension and autoregulatory capacity, 279
Cerebral blood flow and metabolic changes from induction to onset of anesthesia with halothane or pentobarbitol, 179
Cerebral blood flow and metabolism during morphine — nitrous oxide anesthesia in man, 77
Cerebral blood flow and metabolism in synchronously hyperammonemic rats: effect of an acute ammonia challenge, 539
Cerebral blood flow and metabolism in man following cardiac arrest, 569
Cerebral blood flow and oxygen consumption in the newborn dog, 609
Cerebral blood flow and vascular reactivity after removal of the superior cervical sympathetic ganglion in the goat, 178
Cerebral blood flow autoregulation in the rat, 150
Cerebral blood flow determined by hydrogen clearance during middle cerebral artery occlusion in unanesthetized monkeys, 143
Cerebral blood flow in birds: effect of hypoxia, 531
Cerebral blood flow in migraine, 177
Cerebral blood flow in the monkey after focal cryogenic injury, 509
Cerebral blood flow, oxygen utilization, and blood volume in dementia, 185
Cerebral blood-flow in polycythemia, 83
Cerebral circulation: effect of stimulation and blockade of dopamine receptors, 177
Cerebral circulatory and metabolic effects of 5-hydroxytryptamine in anaesthetized baboons, 183
Cerebral circulatory responses to arterial hypoxia in normal and chemodenervated dogs, 621
Cerebral hemodynamics in migraine, 276
Cerebral hemodynamics in Shy-Drager syndrome. Variability of cerebral blood flow dysautoregulation and the compensatory role of chemical control in dysautoregulation, 304
Cerebrovascular CO₂ reactivity: role of a cholinergic mechanism modulated by anesthesia, 160
Comparative responses of the carotid and vertebral arterial systems of rhesus monkeys to betahistine, 382
Correlation between the clinical picture, the EEG and cerebral blood flow after partial occlusion of the middle cerebral artery in man, 91
Critical cerebral blood flow for production of hemiparesis after unilateral carotid occlusion in the gerbil, 175
Diffuse cerebral ischemia in the cat: I. Local blood flow during severe ischemia and recirculation, 613
Distribution of cerebral blood flow in the dominant hemisphere during motor ideation and motor performance, 174
Effect of haematocrit on cerebral blood flow in man, 284
The effect of lesions in the locus coeruleus on the physiological responses of the cerebral blood vessels in cats, 278
Effect of norepinephrine on cerebral blood flow, 182
Effect of non-respiratory alkalosis on brain tissue and cerebral blood flow in rats with damaged blood-brain barrier, 354
Effect of sympathetic nerve stimulation on cerebral blood flow and on large cerebral arteries of dogs, 791
Effect of topically applied serotonin on local cerebral blood flow, 25
Effect on canine cerebral blood flow of two common pressor agents during prolonged halothane anesthesia, 540
The effects of sodium nitroprusside and trimethaphan camyslate on cerebral blood flow in rhesus monkeys, 414
Electromagnetic rhaeocangiography: an extension of selective angiography, 409
 Ergotamine and cerebral blood flow, 594
 Evidence that neural mechanisms do not have important effects on cerebral blood flow, 536
 Experimental head injury in the rat. Part 3: cerebral blood flow and oxygen consumption after concussive impact acceleration, 79
 Improved method for noninvasive measurement of regional cerebral blood flow by 133Xenon inhalation. Part I: description of method and normal values obtained in healthy volunteers, 195
 Improved method for noninvasive measurement of regional cerebral blood flow by 133Xenon inhalation. Part II: measurements in health and disease, 205
 Isoproterenol and propranolol: ability to cross the blood-brain barrier and effects on cerebral circulation in man, 344
 Long-term prognosis in stroke related to cerebral blood flow, 285
 Measurement of cerebral blood flow with microspheres, 274
 Measurement of local cerebral blood flow with iodine [131I] antipyrine, 413
 A method for continuous monitoring of pial vessel diameter changes and its value for dynamic studies of the regulation of cerebral circulation. A preliminary report, 534
 Observations on simultaneous internal carotid artery and total cerebral blood flow measurements in man, 282
 On the theory of an intravenous isotope method for cerebral blood flow measurements, 87
 Phenytoin and cerebral blood flow. Possible involvement of phenylethylamine in migraine, 175
 Rat brain osmolality during barbiturate anesthesia and global brain ischemia, 249
 Role of tissue hypoxia in local regulation of cerebral microcirculation, 621
 Spastic constriction of cerebral vessels after electric convulsive treatment, 284
 Study of regional cerebral metabolism and blood flow relationships in man using the method of continuously inhaling oxygen-15 and oxygen-15 labelled carbon dioxide, 540
 4th Tbilisi Symposium on Brain Blood Supply, 440
 A technique for recording local blood flow and neuronal activity with a single microelectrode, 83
 Time course of the cerebral circulatory response to metabolic depression, 414
 Total and regional cerebral blood flow during hypotension, hyperventilation, and hypocapnia. Effect of sympathetic denervation in dogs, 178
 The validity of an intravenous isotope method for cerebral blood flow measurements. An experimental study, 87
 Xenon enhanced CT for analysis of cerebral integrity, perfusion, and blood flow, 123
 133Xenon inhalation method: significance of indicator maldistribution for distinguishing brain areas with impaired perfusion. An index for total flow, 57
 Blood flow, cortical
 Regional cortical blood flow at craniotomy, 603
 Blood flow, orbital
 Dilated episcleral arteries — a significant physical finding in assessment of patients with cerebrovascular insufficiency, 42
 Thrombosis of the intraorbital veins and cavernous sinus, 85
 Blood flow, regional cerebral
 Chromo-memo-flow technique for rapid sequential analysis of regional cerebral blood flow (rCBF) responses, 538
 Compartmental analysis of regional cerebral blood flow in patients with acute severe head injuries, 283
 Computed tomographic measurement of the xenon brain-blood partition coefficient and implications for regional cerebral blood flow: a preliminary report, 612
 The effect of vincamine on the regional cerebral blood flow in man, 612
 Effects of electrical stimulation of superior cervical ganglion on the regional cerebral blood flow, 180
 Experimental studies on the neurogenic factors in autoregulation of regional circulation in dogs' brains, 86
 Functional responses of the human brain studied by regional cerebral blood flow techniques, 181
 Normal and abnormal patterns of cerebrovascular reserve tested by 133Xe inhalation, 603
 Regional brain blood flow in the conscious gerbil, 67
 Regional cerebral blood flow in stroke patients, 181
 Xenon-133 inhalation method for regional cerebral blood flow measurements: normal values and test-retest results, 396
 Blood flow, spinal cord
 The effect of norepinephrine on the spinal cord circulation and its possible implications in the pathogenesis of acute spinal trauma, 182
 An improved technique for measurement of spinal cord blood flow, 620
 Measurement of spinal cord blood flow by the microsphere technique, 414
 Regulation of total and regional spinal cord blood flow, 79
 Blood gases
 Arterial blood gases during raised intracranial pressure in anesthetized cats under controlled ventilation, 327
 Blood pressure
 Effect of an acute increase of the intravascular pressure on the blood-brain barrier, 588
 Long term changes in blood pressure and risk of cerebrovascular disease, 319
 Predicting risk of ischemic heart disease and cerebrovascular disease from systolic and diastolic blood pressures, 529
 Vasonepressor effect of angiotensin on pial arteries, 487
 Blood volume, cerebral
 Cerebral blood flow, oxygen utilization, and blood volume in dementia, 185
 Measurement of mean circulatory filling pressure and vascular capacitance in the rat, 414
 Blood, whole
 Prevention of persistent cerebral smooth muscle contraction in response to whole blood, 472
 Body temperature
 Effects of reduced regional or body temperatures on responses of pial arterioles, 580
 Brain damage
 Electroencephalographic prediction of anoxic brain damage after resuscitation from cardiac arrest in patients with acute myocardial infarction, 543
 Brain death
 Computerized axial tomography in brain death, 597
 Brain stem
 Arteriovenous malformations of the brain stem in childhood, 175
[Brain stem-Cerebrospinal fluid] SUBJECT INDEX

Embolization of an arteriovenous malformation of the brain stem, 81
Surgical treatment of arteriovenous angiomas localised in the corpus callosum, basal ganglia and near the brain stem, 542

Carotid defects

The asymptomatic bruit, 288
The asymptomatic carotid bruit and the oculomotor palsy, 274
The asymptomatic carotid bruit — operate or not? 269
The bruit of carotid stenosis versus radiated basal heart murmur. Differentiation by phonoangiography, 606
Carotid bruits: their significance in the cervical radicular syndrome, 280
Questions arising in carotid bruit, Letter, 523
The significance of asymptomatic unilateral carotid bruits in preoperative patients, 610
Supraclavicular and carotid bruits in hemodialysis patients, 407

Bypass surgery

Bypass in carotid siphon disease. Letter and response, 76
Carotid-axillary bypass: clinical and experimental evaluation, 288
Cerebral revascularization: common carotid to distal middle cerebral artery bypass, 540
Concomitant coronary artery bypass and major noncardiac surgery, 534
Eight-year follow-up of experimental carotid-middle cerebral and carotid-basilar arterial bypass grafts and anastomoses, 606
Extracranial-intracranial bypass in experimental cerebral infarction in dogs, 461
Intracerebellar hematomata following microsurgical STA — cortical MCA bypass surgery, 188
Intracranial bypass grafts for vertebral-basilar ischemia, 283
Epipodial subbelian to external carotid and STA-MCA bypasses for retinal ischemia, 418
Microvascular anastomosis for cerebral ischemia in 19 patients: a preliminary report, 538
Occipital to posterior inferior cerebellar artery bypass surgery, 609
A planned approach to coexistent cerebrovascular disease in coronary artery bypass candidates, 274
Planned extra-anatomic cerebral revascularization for carotid artery ligation, 534
Results of microsurgical extra-intracranial arterial bypass in the treatment of cerebral ischemia, 180
Staged intracranial and extracranial revascularization, 285

Carbon dioxide

Cerebrovascular CO2 reactivity: role of a cholinergic mechanism modulated by anesthetics, 160
Effect of atropine on cerebrovascular responsiveness to carbon dioxide, 528
Hyperemia, CO2 responsiveness, and autoregulation in the white matter following experimental spinal cord injury, 413

Cardiac arrest

Cerebral blood flow and metabolism in man following cardiac arrest, 569
Electroencephalographic prediction of anoxic brain damage after resuscitation from cardiac arrest in patients with acute myocardial infarction, 543
Neurologic status and prognosis after cardiopulmonary arrest: I. A Retrospective study, 175
Neurologic syndromes after cardiac arrest, 517

Cardiovascular disorders

Experimental cerebrovascular disorders: effects of papaverine and theophylline, 179
Experimental cerebrovascular disorders: effects on cardiovascular functions and on cerebrospinal fluid production and constituents with special reference to cyclic AMP, 187

Carotid siphon disease

Bypass in carotid siphon disease. Letter and response, 76

Cat studies

Arterial blood gases during raised intracranial pressure in anesthetized cats under controlled ventilation, 527
Cerebral microembolization. I. Morphological studies, 611
Diffuse cerebral ischemia in the cat: I. Local blood flow during severe ischemia and recirculation, 615
The effect of lesions in the locus coeruleus on the physiological responses of the cerebral blood vessels in cats, 278
Effects of 5-hydroxytryptamine on pial arteriolar calibre in anesthetized cats, 183
Experimental cerebrovascular disorders: effects on cardiovascular functions and on cerebrospinal fluid production and constituents with special reference to cyclic AMP, 187
Hyperemia, CO2 responsiveness, and autoregulation in the white matter following experimental spinal cord injury, 413
Influence of head position on the prognosis of experimental subarachnoid hemorrhage, 535
Modification of acute focal ischemia by treatment with mannotol, 4
Neurogenic vasodilation of cat cerebral arteries, 541
Pharmacological analysis of 5-hydroxytryptamine receptors in isolated intracranial and extracranial vessels of cat and man, 408
Potentiation and antagonism of serotonin effects on intracranial and extracranial vessels. Possible implications in migraine, 412
Responses of cerebral arteries and arterioles to acute hypertension and hypotension, 621
Role of tissue hypoxia in local regulation of cerebral microcirculation, 621
Spastic constriction of cerebral vessels after electric convulsive treatment, 284
Ultrastructural changes in feline arterial endothelium following subarachnoid hemorrhage, 410
Vascular spasm in cat cerebral cortex following ischemia, 52
Vasoconstrictor effect of angiotensin on pial arteries, 487

Catheterization

Bilateral cerebral angiography with catheterization of only one carotid artery, 417
Complete obliteration of a carotid cavernous fistula with sparing of the carotid blood flow using a detachable balloon catheter, 607
Embolization of cerebral vessels with inflatable and detachable balloons. Technical note, 413
Experimental embolization with inflatable and releasable balloons in dogs, 287
The intra-arterial injection of Iskedyol for hyperselective vascular exploration, 180
Systemic vascular responses to increased intracranial pressure. 1. Effects of progressive epidural balloon expansion on intracranial pressure and systemic circulation, 277

Cavernous sinus

Cavernous angiomas of the brain. Account of fourteen personal cases and review of the literature, 542
Ischemic optic neuropathy in cavernous sinus thrombosis, 529
Meningiomas and aneurysms of the cavernous sinus. Neuroophthalmologic features, 532
Thrombosis of the intraorbital veins and cavernous sinus, 85

Cerebral amyloid angiopathy

Fatal massive intracerebral hemorrhage complicating cerebral amyloid angiopathy, 535

Cerebrospinal fluid

Brain monoamine metabolites and tryptophan in ventricular CSF of patients with spasm after aneurysm surgery, 410
Experimental cerebrovascular disorders: effects on cardiovascular functions and on cerebrospinal fluid production and constituents with special reference to cyclic AMP, 187
Fibrolytic activity in blood and cerebrospinal fluid in subarachnoid hemorrhage from ruptured intracranial saccular aneurysm before and during EACA treatment, 612
Influence of several plasma fractions on post-ischemic micro-
Subject Index

[Cerebrospinal fluid-Computerized tomography]

Strokes in children and adolescents, 169
Subarachnoid hemorrhage in children, 422
Traumatic vertebrobasilar occlusive disease in childhood, 416
Chloramphenicol
Effects of procainamide and chloramphenicol on acute vasospasm, 281

Cholesterol levels
Biochemical effects of moderate diet and clofibrate on swine atherosclerosis, 608
Cigarette smoking and HDL cholesterol. The Framingham Offspring Study, 614
Morphological effects of moderate diet and clofibrate on swine atherosclerosis, 608
Normal serum-cholesterol but low H.D.L.-cholesterol concentration in young patients with ischaemic cerebrovascular disease, 529
Scanning electron microscope studies of rabbit aortic endothelium in areas of haemodynamic stress during induction of fatty streaks, 620

Cholesterolemia
Failure of regression of atherosclerosis in dogs with moderate cholesterolemia, 82

Clofibrate
Biochemical effects of moderate diet and clofibrate on swine atherosclerosis, 608
Morphological effects of moderate diet and clofibrate on swine atherosclerosis, 608

Coagulation, intravascular
Cerebral involvement with disseminated intravascular coagulation in intestinal disease, 77

Complication
Acute neurological complications after liver transplantation with particular reference to intraoperative cerebral air embolus, 537
Anticoagulant therapy and central nervous system complications in patients with prosthetic valve endocarditis, 606
Complications of cerebral angiography, 416
Complications of cerebral angiography and pneumography, 186
Late complications of prosthetic heart valves, 608
Moyamoya syndrome as a complication of radiation therapy, 529
Case report, 609
Thromboembolic complications after mitral valve replacement with Hancock xenograft, 612
Transient cerebral dysfunction following chemotherapy for osteogenic sarcoma, 607

Computerized tomography
Benign cerebellar hemorrhages, 539
The capacity for computed tomography diagnosis of cerebral infarction. An experimental study in the nonhuman primate, 275
Cerebellar hemorrhage in adults. Diagnosis by computerized tomography, 526
Computed angiotomography, 175
Computed tomographic appearance of presumed septic cerebral embolism, 407
Computed tomographic measurement of the xenon brain-blood partition coefficient and implications for regional cerebral blood flow: a preliminary report, 612
Computed tomography and radionuclide imaging in the evaluation of ischemic stroke, 520
Computed tomography and subarachnoid hemorrhage, 174
Computed tomography in intracerebral hemorrhage, 81
Computed tomography in the evaluation of subdural hematomas, 411
Computed tomography in "Moya-Moya": summary of 16 cases, 277
Computed-tomography of bilateral isodense chronic subdural hematomas, 287
Computed tomography of intracerebral hematomas. I. Transmission CT observations on hematoma resolution, 174
Computed tomography of intracerebral hematomas. II. Radiouclide and transmission CT studies of the perihematoma region, 174
Computed tomography of ruptured intracranial aneurysm in acute stage, 188

Chemodrenervation
Cerebral circulatory responses to arterial hypoxia in normal and chemodrenervated dogs, 621

Chemotherapy
Transient cerebral dysfunction following chemotherapy for osteogenic sarcoma, 607

Children
Arteriovenous malformations of the brain stem in childhood, 175
Basilar artery migraine. A review of 30 cases, 531
Cerebral arteriovenous malformations in children, 519
Intracranial aneurysms in early childhood, 536
Intracranial arterial aneurysms in infancy and childhood, 85
Intracranial arteriovenous malformations in childhood, 539
Intracranial saccular aneurysms in the first three decades, 608
Moyamoya disease in children, 530
Occlusive arterial disease of the child and young adult. Clinical electroencephalographical analysis of 26 cases, 422
Saccular aneurysm of infancy and early childhood, 414
A sign of subarachnoid bleeding on cranial computed tomograms of pediatric head trauma patients, 416

Vascular reperfusion in the central nervous system, 375
Measurement of prostaglandin E2 in cerebrospinal fluid in patients suffering from stroke, 281
Re-evaluation of cerebrospinal fluid dynamics after subarachnoid hemorrhage with computed tomography and radionuclide cisternography, 287
Transient spastic paraparesis following abdominal aortography: management with cerebrospinal fluid lavage, 537

Cerebrovascular disease
Cerebrovascular complications of sickle cell anemia, 73
Cerebrovascular disease in sickle cell anemia: a clinical, pathological and radiological correlation, 45
Cerebrovascular incidents after myocardial infarction, 281
Conjunctival microangiopathy. An early sign of degenerative vascular disease? 86
Detecting extracranial cerebrovascular disease with noninvasive techniques, 411
Dilated episcleral arteries — a significant physical finding in assessment of patients with cerebrovascular insufficiency, 42
Experimental cerebrovascular disorders: effects on cardiovascular functions and on cerebrospinal fluid production and constituents with special reference to cyclic AMP, 187
Extracranial-to-intracranial vascular anastomosis for occlusive cerebrovascular disease: experience in 110 patients, 275
Importance of the external carotid artery in extracranial cerebrovascular occlusive disease, 88
Long term changes in blood pressure and risk of cerebrovascular disease, 319
A new look at emergency carotid artery operations for the treatment of cerebrovascular insufficiency, 599
Noninvasive methods for evaluation of extracranial cerebrovascular disease. A comparison, 78
Non-invasive regional study of chronic cerebrovascular disorders using the oxygen-15 inhalation technique, 415
Normal serum-cholesterol but low H.D.L.-cholesterol concentration in young patients with ischaemic cerebrovascular disease, 529
A planned approach to coexistent cerebrovascular disease in coronary artery bypass candidates, 274
Platelet aggregate ratios — standardization of technique and test results in patients with myocardial ischemia and patients with cerebrovascular disease, 409
Predicting risk of ischemic heart disease and cerebrovascular disease from systolic and diastolic blood pressures, 529
The role of platelets in myocardial infarction, ischemic heart disease, cerebrovascular disease, thromboembolic disorders and acute idiopathic pericarditis, 420
Serum lipids, platelets, and fibrinolytic activity in cerebrovascular disease, 137
Spontaneous platelet aggregation in cerebrovascular disease, 540
Strokes in children and adolescents, 169
Summary of 11th Princeton Conference on Cerebrovascular Disease, 429
Trends in mortality from cerebrovascular diseases in the United States, 1960 to 1975, 549

Chemodrenervation
Cerebral circulatory responses to arterial hypoxia in normal and chemodrenervated dogs, 621

Chemotherapy
Transient cerebral dysfunction following chemotherapy for osteogenic sarcoma, 607

Children
Arteriovenous malformations of the brain stem in childhood, 175
Basilar artery migraine. A review of 30 cases, 531
Cerebral arteriovenous malformations in children, 519
Intracranial aneurysms in early childhood, 536
Intracranial arterial aneurysms in infancy and childhood, 85
Intracranial arteriovenous malformations in childhood, 539
Intracranial saccular aneurysms in the first three decades, 608
Moyamoya disease in children, 530
Occlusive arterial disease of the child and young adult. Clinical electroencephalographical analysis of 26 cases, 422
Saccular aneurysm of infancy and early childhood, 414
A sign of subarachnoid bleeding on cranial computed tomograms of pediatric head trauma patients, 416

Strokes in children and adolescents, 169
Subarachnoid hemorrhage in children, 422

Computed tomography in intracerebral hemorrhage, 81
Computed tomography in the evaluation of subdural hematomas, 411
Computed tomography in "Moya-Moya": summary of 16 cases, 277
Computed-tomography of bilateral isodense chronic subdural hematomas, 287
Computed tomography of intracerebral hematomas. I. Transmission CT observations on hematoma resolution, 174
Computed tomography of intracerebral hematomas. II. Radiouclide and transmission CT studies of the perihematoma region, 174
Computed tomography of ruptured intracranial aneurysm in acute stage, 188
Computerized axial tomography in brain death, 597
Computerized cranial tomography. Effect on diagnostic and therapeutic plans, 84
Coronal and sagittal reconstruction in computerised tomography, 418
Diagnosis of isodense subdural hematomas by computed tomography, 175
Diagnosis of subdural haematoma by computed axial tomography, 418
Use of xenon inhalation for contrast enhancement, 613
The effect of size, histologic elements, and water content on the visualization of cerebral infaracts. A computerized cranial tomographic study, 407
Emission computed tomography, 606
Evaluation of recent cerebral infarction by computerized tomography, 80
Evaluation of the age of subdural hematomas by computerized tomography, 88
An evaluation of transverse axial emission tomography of the brain in the clinical situation, 83
Impact of computerized tomography on utilization of cerebral angiograms, 88
Intracranial, extracerebral hematomas. Computed tomographic appearances, 536
Intracranial tumors simulating the presentation of cerebrovascular syndromes. Early detection with cerebral computed tomography (CCT), 283
Intracranial venous sinus thrombosis: diagnosis suggested by computed tomography, 619
Multiple intracranial aneurysms: identifying the ruptured lesion, 608
Re-evaluation of cerebrospinal fluid dynamics after subarachnoid hemorrhage with computed tomography and radionuclide cisternography, 287
Resolving intracerebral hematoma: alteration of the "ring sign" with steroids, 607
Scintigraphic detection of congenital intracranial vascular malformations, 543
A sign of subarachnoid bleeding on cranial computed tomograms of pediatric head trauma patients, 416
Spontaneous closure of cerebral arteriovenous malformation demonstrated by angiography and computed tomography, 614
The usefulness of CT scanning for subdural hematomas, 282
Xenon enhanced CT for analysis of cerebral integrity, perfusion, and blood flow, 123
Congenital disorders
Congenital hamartoma mimicking the angiographic appearance of congenital fusiform aneurysm, 84
Hereditary multi-infarct dementia. Morphological and clinical studies of a new disease, 179
Strokes in children and adolescents, 169
Congophilic angiopathy
Congophilic angiopathy and cerebral hemorrhage, 608
Conjunctival microangiopathy
Conjunctival microangiopathy. An early sign of degenerative vascular disease? 86
Contraceptive, oral
Mortality among oral-contraceptive users, 182
Mortality among women participating in the Oxford/Family Planning Association contraceptive study, 182
Platelet changes in women taking oral contraceptives, 77
Contrast material
Cerebral angiography with non-ionic (metrizamide) and ionic (meglumine meglumine) watersoluble contrast media. A comparative study with double blind technic, 179
Transient spastic paraparesis following abdominal aortography: management with cerebrospinal fluid lavage, 537
Cortical evoked potential
Extracellular potassium activity, evoked potential and tissue blood flow. Relationships during progressive ischaemia in baboon cerebral cortex, 79
Craniotomy
Large decompressive craniotomy in the treatment of acute subdural hematoma, 622
Regional cortical blood flow at craniotomy, 605
Creatine kinase
Myocardial creatine kinase isoenzyme in serum after subarachnoid haemorrhage, 182
Cryogenic injury
Cerebral blood flow in the monkey after focal cryogenic injury, 509
Cushing response
Systemic vascular responses to increased intracranial pressure. The 'Cushing' response in the presence of intracranial space-occupying lesions: systemic and cerebral haemodynamic studies in the dog and the baboon, 277
Cyanocrylate
Intraarterial cyanocrylate: an adjunct in the treatment of spinal/paraspinal arteriovenous malformations, 410
Cyclic AMP
Early estimation of extent of the lesion in cerebral infarction by means of cyclic AMP concentration in peripheral venous plasma, 189
Experimental cerebrovascular disorders: effects on cardiovascular functions and on cerebrospinal fluid production and constituents with special reference to cyclic AMP, 187
Delirium
Syndrome of agitated delirium and visual impairment: a manifestation of medial temporo-occipital infarction, 284
Dementia
Cerebral blood flow, oxygen utilization, and blood volume in dementia, 178
Definition of dementia. Letter, 523
Editorial: role of stroke in dementia, 1
Hereditary multi-infarct dementia. Morphological and clinical studies of a new disease, 179
Syndrome of agitated delirium and visual impairment: a manifestation of medial temporo-occipital infarction, 284
Dermatoglyph
Cerebral circulatory responses to arterial hypoxia in normal and chemodenervated dogs, 621
Total and regional cerebral blood flow during hypotension, hypertension, and hypoxia. Effect of sympathetic denervation in dogs, 178
Diet
Biochemical effects of moderate diet and clofibrate on swine atherosclerosis, 608
Diet-induced atherosclerosis and experimental hypertension in stump-tailed macaques (Macaca arctoides). Effects of antihypertensive drugs and a non-atherogenic diet in the evolution of lesions, 610
Morphological effects of moderate diet and clofibrate on swine atherosclerosis, 608
Dihydro-gamma-linolenic acid
Antithrombotic potential of dihomo-gamma-linolenic acid in man, 284
Dissection, spontaneous
Spontaneous dissection of cervico-cerebral arteries, 538
Dog studies
Analysis of the effect of bilateral sympathetic stimulation on cerebral and cephalic blood flow in the dog, 29
Autoregulation of cerebral blood flow during early experimental renal hypertension in the conscious dog, 413
Cerebral blood flow and oxygen consumption in the newborn dog, 609
Cerebral circulatory responses to arterial hypoxia in normal and chemodenervated dogs, 621
Changes in the subarachnoid space after experimental subarachnoid haemorrhage in the dog: scanning electron microscopic observation, 283
Comparison of carotid artery mechanics in the rat, rabbit, and dog, 531
Cyanide toxicity and thiosulfate protection during chronic administration of sodium nitroprusside in the dog: correlation with a human case, 286
Dose dependency of the post-insult protective effect of pentobarbital in the canine experimental stroke model, 10
Downloaded from http://stroke.ahajournals.org/ by guest on November 12, 2017
Dopaminergic receptors
Cerebrovascular evaluation: assessment of Doppler scanning of the cerebrovascular tree in patients with non-ischemic symptoms, 85

Doppler ultrasound
Cardiac cycle-dependent alternating flow in vertebral arteries with subclavian artery stenoses, 229
The cerebrovascular Doppler examination in patients with non-hemispheric symptoms, 85
Cerebrovascular evaluation: assessment of Doppler scanning of carotid arteries, ophthalmic Doppler flow and cervical bruits, 563
Detecting extracranial cerebrovascular disease with noninvasive techniques, 417
Doppler scanning and xerography: a screening procedure for high-risk carotid lesions in surgical patients, 85
Doppler ultrasound and supraorbital photophotemography for noninvasive screening of carotid occlusive disease, 83
Imaging the carotid bifurcation using continuous-wave Doppler-shift ultrasound and spectral analysis, 465
Noninvasive assessment of collateral blood flow of the cerebral hemisphere by Doppler ultrasound, 418
Relationship between ophthalmic artery blood flow and re-canalization of occluded carotid artery, Ultrasonic Doppler study, 360

Dose dependency
Dose dependency of the post-insult protective effect of pentobarbital in the canine experimental stroke model, 10
Dose dependent reduction of glucose utilization by pentobarbital in rat brain, 12

Drug addiction
Spinal cord vasculitis presenting as a spinal cord tumor in a heroin addict. Case report, 410

Drug therapy
Biochemical effects of moderate diet and clofibrate on swine atherosclerosis, 608
Cerebral hemorrhage from a myotic aneurysm developing during appropriate antibiotic therapy, 267
Controlled trial of aspirin on cerebral ischemia. Part II: surgical group, 309
Controlled trial of ornithine alpha ketoglutarate (OAKG) in patients with stroke, 218
Diet-induced atherosclerosis and experimental hypertension in stump-tailed macaques (Macaca arctoides). Effects of antihypertensive drugs and a non-atherogenic diet in the evolution of lesions, 610
Dose dependency of the post-insult protective effect of pentobarbital in the canine experimental stroke model, 10
Editorial: aspirin — effective in males threatened with stroke, 295
Intracranial hemorrhage and infarction in anticoagulated patients with prothetic heart valves, 18
Modification of acute focal ischemia by treatment with mannitol, 4
Morphological effects of moderate diet and clofibrate on swine atherosclerosis, 608
Responses of isolated dog cerebral and peripheral arteries to prostaglandins after application of aspirin and polyphloretin phosphate, 490
Transient focal cerebral ischemia after extreme exercise, 84

Dysautoregulation
Cerebral hemodynamics in Shy-Drager syndrome. Variability of cerebral blood flow in the dog, 222
Noninvasive assessment of collateral blood flow of the cerebral hemisphere by Doppler ultrasound, 418
Relationship between ophthalmic artery blood flow and re-canalization of occluded carotid artery, Ultrasonic Doppler study, 360

E

Echocardiography
Left ventricular myxoma. Echocardiographic diagnosis and review of the literature, 279

Echocerebrography
Correlation between the clinical picture, the EEG and cerebral blood flow after partial occlusion of the middle cerebral artery in man, 91
Real time ultrasound tomography of the adult brain, 117

Edema
Effect of DPPD (diphenyl-para-phenylenediamine) on stroke and cerebral edema in gerbils, 480

Electrocardiography
Sympathetic nervous system activity in patients with subarachnoid hemorrhage, 237

Electrocerebrography
Basilar migraine, seizures, and severe epileptiform EEG abnormalities. A relatively benign syndrome in adolescents, 605
Electrocerebrographic prediction of anoxic brain damage after resuscitation from cardiac arrest in patients with acute myocardial infarction, 543
Experimental cerebral infarction. Part 2: electroencephalographic changes produced by experimental thalamic infarction in dogs, 214
Experimental stroke in gerbils: correlation of clinical, pathologic, and electroencephalographic findings and protein synthesis, 155

Electrophysiological study

Electrophysiological study of hemiplegia. Motor nerve conduction velocity, brachial plexus latency, and electromyography, 605

Embolism

Acute neurological complications after liver transplantation with particular reference to intraoperative cerebral arterial embolus, 537
Arterial embolism in thyrotoxicosis with atrial fibrillation, 178
Carotid embolization presenting as total monocular blindness, 186
Cerebral arterial lesions resulting from inflammatory emboli, 498
Cerebral microembolization. I. Pathophysiological studies, 274
Cerebral microembolization. II. Morphological studies, 611
Computed tomographic appearance of presumed septic cerebral embolism, 407
Effects of anticoagulants in an animal model of septic cerebral embolization, 573
Embolism in sinoatrial disease, 543
Embolism to the central nervous system from cardiac myxoma. Report of two cases, 279
Embolization of an arteriovenous malformation of the brain stem, 81
Embolization of cerebral vessels with inflatable and detachable balloons. Technical note, 413
Evidence of silent central embolism in patients with amaurosis fugax, 176
Experimental embolization with inflatable and releasable balloons in dogs, 287
Free percutaneous embolization of a traumatic carotidocavernous fistula, 539
Incidence of emboli with cloth-covered Starr-Edwards valve without anticoagulation and with varying forms of anticoagulation. Analysis of 183 patients followed for 3½ years, 416
Influence of etiology of atrial fibrillation on incidence of systemic embolism, 184
Non-penetrating trauma to the carotid artery with secondary thrombosis and embolism: treatment by thrombolysis, 83
Polyvinyl alcohol foam: prepackaged emboli for therapeutic embolization, 620
Prevention of arterial thromboembolism with acetylsalicylic acid. A controlled clinical study in patients with aortic ball valves, 84
“Stump” of internal carotid artery — a source for further cerebral embolic ischemia, 448
Thromboembolic complications in coronary angiography. Prevention with acetylsalicylic acid, 417

Endarterectomy, carotid

Carotid endarterectomy: is an indwelling shunt necessary? 185
Carotid endarterectomy: mortality rate. Letter, 172
Carotid endarterectomy. Temporal profile of the healing process and effects of anticoagulation therapy, 412
Cluster headache, hemianopia, and other head pains: morbidity of carotid endarterectomy, 559
Concomitant coronary artery bypass and major noncardiac surgery, 334
Early restenosis after carotid endarterectomy, 529
The finding of thrombus at carotid endarterectomy and its relationship to the timing of surgery, 181
Improved results with carotid endarterectomy, 181
Internal carotid back pressure, intraoperative shunting, ulcerated atheroma, and the incidence of stroke during carotid endarterectomy, 533
Intracerebral hemorrhage following carotid endarterectomy: a hypertensive complication? 457
Ipsilateral blindness. A complication of carotid endarterectomy, 78
A new look at emergency carotid artery operations for the treatment of cerebrovascular insufficiency, 599
Noninvasive assessment of collateral blood flow of the cerebral hemisphere by Doppler ultrasound, 418
Routine operative arteriography during carotid endarterectomy: a reassessment, 411
Stroke associated with carotid endarterectomy, 421
Ultramicroscopic ulcerations and thrombi of the carotid bifurcation, 274
The value of carotid endarterectomy in treating transient cerebral ischemia of the posterior circulation, 80

Endarterectomy, innominate

Innominate artery endarterectomy. A 16-year experience, 274

Endocarditis

Anticoagulant therapy and central nervous system complications in patients with prosthetic valve endocarditis, 606
Cerebral hemorrhage from a mycotic aneurysm developing during appropriate antibiotic therapy, 267
Intracranial hemorrhage and infarction in anticoagulated patients with prosthetic heart valves, 18
Multiple mycotic aneurysms due to candida endocarditis, 85

Endothelium

Modification of acute focal ischemia by treatment with mannitol, 4
Scanning electron microscope studies of rabbit aortic endothelium in areas of haemodynamic stress during induction of fatty streaks, 620
A scanning electron microscopic study of arterial endothelial cells using vascular casts, 409
SEM evaluation of endothelial damage following temporary middle cerebral artery occlusion in dogs, 410
Thrombus formation and endothelial alterations in microarterial anastomoses, 89
Ultrastructural changes in feline arterial endothelium following subarachnoid hemorrhage, 410

Enzyme

Enzymic activity of the brain: microvessels vs. total forebrain homogenate, 289

Epidemiological studies

Epidemiological studies on patients with a persistent vegetative state, 204

Epilepsy

Cavernous angiomas of the brain. Account of fourteen personal cases and review of the literature, 542
Unruptured intracranial aneurysms — an unusual source of epilepsy, 542

Epinephrine

Sympathetic nervous system activity in patients with subarachnoid hemorrhage, 237

Ergotamine

Ergotamine and cerebral blood flow, 594

Erythrocytes

Erythrocytes: prolonged vasospasm produced by the breakdown products of erythrocytes, 89

Estrogen

Estrogenic effects in women taking oral contraceptives, 77

Experimental studies

Acute cerebrovascular and myocardial ischemia superimposed upon chronically hypertensive and arteriosclerotic male Sprague-Dawley rats, 183
Acute tissue response to cerebral ischemia in the gerbil. An ultrastructure study, 83
Analysis of the effect of bilateral sympathetic stimulation on cerebral and cephalic blood flow in the dog, 29
Autoregulation of cerebral blood flow during early experimental renal hypertension in the conscious dog, 413
Barrier and uptake mechanisms in the cerebrovascular response to noradrenaline, 185
Biochemical effects of moderate diet and clofibrate on swine atherosclerosis, 608
Blood flow and oxygen consumption of the focally traumatized monkey brain, 92
Brain blood flow autoregulation and metabolism during halothane anesthesia in monkeys, 412
Brain metabolism and arterial acid-base balance following bilateral carotid occlusion in normotensive and experimental hypertensive rats, 538
The capacity for computed tomography diagnosis of cerebral
infection. An experimental study in the nonhuman primate, 275
Cerebral blood flow and metabolism in chronically hyperammonemic rats: effect of an acute ammonia challenge, 539
Cerebral blood flow and oxygen consumption in the newborn dog, 609
Cerebral blood flow and vascular reactivity after removal of the superior cervical sympathetic ganglion in the goat, 178
Cerebral blood flow autoregulation in the rat, 150
Cerebral blood flow determined by hydrogen clearance during middle cerebral artery occlusion in anesthetized monkeys, 143
Cerebral circulation: effect of stimulation and blockade of dopamine receptors, 177
Cerebral circulatory and metabolic effects of 5-hydroxytryptamine in anesthetized baboons, 183
Cerebral ischaemia induced by bilateral carotid occlusion in spontaneously hypertensive rats. Supra- and infratentorial metabolism and arterial acid-base balance, 92
Cerebral microembolization. I. Morphological studies, 611
Cerebrovascular CO2 reactivity: role of a cholinergic mechanism modulated by anesthesia, 160
Changes in the subarachnoid space after experimental subarachnoid haemorrhage in the dog: scanning electron microscopic observation, 283
Comparative responses of the carotid and vertebral arterial systems of rhesus monkeys to betahistine, 382
Comparison of carotid artery mechanics in the rat, rabbit, and dog, 531
Critical cerebral blood flow for production of hemiparesis after unilateral carotid occlusion in the gerbil, 175
Gyrase toxicity and thiosulfate protection during chronic administration of sodium nitroprusside in the dog: correlation with a human case, 286
Diet-induced atherosclerosis and experimental hypertension in stump-tailed macaques (Macaca arctoides). Effects of antihypertensive drugs and a non-atherogenic diet in the evolution of lesions, 610
Diffuse cerebral ischaemia in the cat: I. Local blood flow during severe ischaemia and recirculation, 615
Diffuse cerebral ischaemia in the cat: II. Regional metabolites during severe ischaemia and recirculation, 615
Dose dependency of the post-insult protective effect of pentobarbital in the canine experimental stroke model, 10
Dose dependent reduction of glucose utilization by pentobarbital in rat brain, 12
Effect of aminophylline on cerebral infarction in the mongolian gerbil, 477
Effect of atropine on cerebrovascular responsiveness to carbon dioxide, 528
The effect of lesions in the locus coeruleus on the physiological responses of the cerebral blood vessels in cats, 278
Effect of occlusion on large vessels. I. A study of the rat carotid artery, 86
Effect of ornithine alpha ketoglutarate (OAKG) on the response of brain metabolism to hypoxia in the dog, 222
Effect of sympathetic nerve stimulation on cerebral blood flow and on large cerebral arteries of dogs, 178
Effect on canine cerebral blood flow of two common pressor agents during prolonged halothane anesthesia, 540
Effects of 5-hydroxytryptamine on pial arteriolar calibre in anesthetized cats, 183
Effects of acute hypertension on brain metabolism in normotensive, renovascular hypertensive and spontaneously hypertensive rats, 349
Effects of anticoagulants in an animal model of septic cerebral embolization, 573
Effects of procainamide and chloramphenicol on acute vasospasm, 281
Effects of reduced regional or body temperatures on responses of pial arterioles, 580
The effects of sodium nitroprusside and trimethaphan camsylate on cerebral blood flow in rhesus monkeys, 414
Eight-year follow-up of experimental carotid-middle cerebral and carotid-basilar arterial bypass grafts and anastomoses, 606
Experimental cerebral infarction. Part 1: production of thalamic infarction in dogs, 211
Experimental cerebral infarction. Part 2: electroencephalographic changes produced by experimental thalamic infarction in dogs, 214
Experimental cerebral infarction. Part 3: protective effect of mannitol in thalamic infarction in dogs, 217
Experimental cerebrovascular disorders: effects of papaverine and theophylline, 179
Experimental cerebrovascular disorders: effects on cardiovascular functions and on cerebrospinal fluid production and constituents with special reference to cyclic AMP, 187
Experimental embolization with inflatable and releasable balloons in dogs, 287
Experimental extracranial-intracranial anastomosis, 176
Experimental head injury in the rat. Part 3: cerebral blood flow and oxygen consumption after concussive impact acceleration, 79
Experimental regional cerebral ischemia in the middle cerebral artery territory in primates. Part 3: effects on brain water and electrolytes in the late phase of acute MCA stroke, 387
Experimental stroke in gerbils: correlation of clinical, pathological and electroencephalographic findings and protein synthesis, 155
Experimental studies on the neurogenic factors in autoregulation of regional circulation in dogs' brains, 86
Experimental study report concerning the origin and the extending mechanism of hypertensive intracerebral hematomata, 90
Extracellular potassium activity, evoked potential and tissue blood flow. Relationships during progressive ischemia in baboon cerebral cortex, 79
Extracranial-intracranial bypass in experimental cerebral infarction in dogs, 461
Failure of regression of atherosclerosis in dogs with moderate cholesterolemia, 82
A fluorescent histochemical study of changes in noradrenergic neurons following experimental cerebral infarction in the rat, 286
Formation of adenosine nucleotide derivatives in isolated hog carotid artery strips, 184
Hemodynamics of arterial stenoses at elevated flow rates, 91
Hypertension, CO2 responsiveness, and autoregulation in the white matter following experimental spinal cord injury, 413
Hypothalamic component in pressor response to carotid occlusion in the rat, 184
Increased sensitivity of the basilar artery to norepinephrine and 5-hydroxytryptamine following experimental subarachnoid hemorrhage, 176
Indomethacin prevents impaired perfusion of the dog's brain after global ischemia, 591
Influence of head position on the prognosis of experimental subarachnoid hemorrhage, 535
Influence of several plasma fractions on post-ischemic microvascular reperfusion in the central nervous system, 375
Intercellular granules and vesicles in prolonged cerebral vasospasm, 412
Internal and external carotid vascular responses to vasoactive agents in the monkey, 416
Ischemia-induced seizures and cortical monoamine levels, 527
Local cerebral glucose uptake in awake and halothane-anesthetized primates, 419
Measurement of mean circulatory filling pressure and vascular capacitance in the rat, 414
Metabolic profiles of canine cerebrovascular tree: a histochomical study, 165
A model study of why some intracranial aneurysms thrombose but others rupture, 583
Modification of acute focal ischemia by treatment with mannitol, 4
Morphological effects of moderate diet and clofibrate on swine atherosclerosis, 608
Neurogenic vasodilation of cat cerebral arteries, 541
Pathogenesis and prevention of trauma-provoked atheromas, 185
Potentiation and antagonism of serotonin effects on intracranial and extracranial vessels. Possible implications in migraine, 412
Prevention of cerebral infarction in the monkey by omental transposition to the brain, 224
Prolonged contraction of isolated human and canine cerebral arteries induced by uridine 5'-triphosphate, 133
Radiolabeled fibrinogen for clot detection in a canine model of cerebral arterial thrombosis, 543
Regional brain blood flow in the conscious gerbil, 67
Regression of atheroma in the rabbit, 409
Responses of cerebral arteries and arterioles to acute hypotension and hypertension, 621
Responses of isolated dog cerebral and peripheral arteries to prostaglandins after application of aspirin and polynolstatin phosphate, 490
The role of hemodynamic factors in arterial wall thickening in the rat, 620
Role of tissue hypoxia in local regulation of cerebral microcirculation, 621
Scanning electron microscope studies of rabbit aortic endothelium in areas of haemodynamic stress during induction of fatty streaks, 620
Sequential cerebral biochemical and physiological events in controlled hypoxemia, 183
Spastic constriction of cerebral vessels after electric convulsive treatment, 284
Studies on platelet plasma membranes. III. Membrane glycoprotein loss from circulating platelets in rabbits: inhibition by aspirin-dipyridamole and acceleration by thrombin, 419
Systemic vascular responses to increased intracranial pressure. 1. Effects of progressive epidural balloon expansion on intracranial pressure and systemic circulation, 277
Systemic vascular responses to increased intracranial pressure. 2. The 'Cushing' response in the presence of intracranial space-occupying lesions: systemic and cerebral haemodynamic studies in the dog and the baboon, 277
Time course of baroreceptor resetting in short-term hypotension in the rat, 609
Time course of the cerebral circulatory response to metabolic depression, 414
Total and regional cerebral blood flow during hypotension, hypertension, and hypoxia. Effect of sympathetic denervation in dogs, 178
Treatment of experimental cerebral infarction in rats with levodopa or with glycerol, 609
Ultrastuctural evidence for central monoaminergic innervation of blood vessels in the paraventricular nucleus of the hypothalamus, 289
An ultrastructural study of developing cerebral infarction following bilateral carotid artery occlusion in spontaneously hypertensive rats, 280
Vascular spasm in cat cerebral cortex following ischemia, 52
Vasoconstrictor effect of angiotensin on pial arteries, 487
Vascular spasm in cat cerebral cortex following ischemia, 52
Vasoconstrictor effect of angiotensin on pial arteries, 487
Xenon enhanced CT for analysis of cerebral integrity, perfusion, and function, 123

Sequential cerebral biochemical and physiological events in controlled hypoxemia, 187

Glycerol

Intravenous glycerol in cerebral infarction: a controlled 4-month trial, 484

Treatment of experimental cerebral infarction in rats with levodopa or with glycerol, 609

Goat studies

Cerebral blood flow and vascular reactivity after removal of the superior cervical sympathetic ganglion in the goat, 178

Graft

Cerebral revascularization: common carotid to distal middle cerebral artery bypass, 540

Dynamic compliance of arterial grafts, 283

Eight-year follow-up of experimental carotid-middle cerebral and carotid-basilar arterial bypass grafts and anastomoses, 606

Intracranial bypass grafts for vertebral-basilar ischemia, 283

Occipital to posterior inferior cerebellar artery bypass surgery, 609

Pathologic findings in the aortocoronary vein grafts. A scanning electron microscope study, 417

Posterior fossa revascularization: anastomosis of vertebral artery to PICA with interposed radial artery graft, 607

Granulomatous angiitis

Cerebral granulomatous angiitis: case report and literature review, 174

H

Hemorrhage

Brain blood flow autoregulation and metabolism during halothane anesthesia in monkeys, 412

Cerebral blood flow and metabolic changes from induction to onset of anesthesia with halothane or pentobarbital, 179

Effect on canine cerebral blood flow of two common pressor agents during prolonged halothane anesthesia, 540

Local cerebral glucose uptake in awake and halothane-anesthetized primates, 419

Hancock xenograft

Thromboembolic complications after mitral valve replacement with Hancock xenograft, 612

Hemorrhagic complications of cerebral arteritis, 91

Hemorrhagic cerebral white matter. Infarction with cerebral deep venous thrombosis and hypoxia, 407

Hemorrhagic complications of cerebral arteritis, 91

Hemorrhagic complications of cerebral arteritis, 91

Hemorrhage

Aphasia and left thalamic hemorrhage, 536

Benign cerebellar hemorrhages, 539

Bilateral retinal hemorrhages and disk edema in migraine, 189

Cerebellar hemorrhage in adults. Diagnosis by computerized tomography, 526

Computed tomography in cerebral hemorrhage, 81

Cerebellar hemorrhage from a mycotic aneurysm developing during appropriate antibiotic therapy, 267

Chronically infected and chronic cerebrovascular hemorrhage, 540

Common carotid artery stenosis due to subintimal hematoma following blunt trauma to the neck. Report of a case, 84

Computed tomography in the evaluation of subdural hematomas, 411

Computed tomography of intracerebral hematomas. I. Transmission CT observations on hematoma resolution, 174

Computed tomography of intracerebral hematomas. II. Radio-isotope and transmission CT studies of the perihematoma region, 174

Computed-tomography of bilateral isodense chronic subdural hematomas, 287

Controlled subtotal evacuation of intracerebral hematomas by stereotactic technique, 418

Diagnosis of isodense subdural hematomas by computed tomography, 175

Diagnosis of subdural hematoma by computed axial tomography: use of xenon inhalation for contrast enhancement, 613

Epidural hematoma of the posterior fossa: radionuclide features, 530

Evaluation of the age of subdural hematomas by computerized tomography, 87

Extradural hematoma. Report of 132 cases, 617

Intracerebellar hematoma following microsurgical STA — cortical MCA bypass surgery, 188

Intracranial, extracerebral hematomas. Computed tomographic appearances, 536

L'hématome extra-dural de la fosse postérieure. Problèmes diagnostiques (10 observations). Extra-dural hematoma of the posterior fossa. Diagnostic problems (10 cases), 615

Large decompressive craniotomy in the treatment of acute subdural hematoma, 622

Ophthalmologic aspects of subdural hematoma, 190

Recovery from paraplegia caused by spontaneous spinal epidural hematoma, 537

Sequencial angiographic studies demonstrating delayed development of an acute epidural hematoma. Case report, 536

Spontaneous spinal extradural hematoma, 92

Stroke rehabilitation. II. Guidelines for establishing a stroke rehabilitation unit, 90

Subdural hematoma due to ruptured cerebral aneurysm: angiographic diagnosis and potential pitfall for CT, 530

Transient cerebral dysfunction following chemotherapy for osteogenic sarcoma, 607

The usefulness of CT scanning for subdural hematomas, 282

Hemiplegia

Electrophysiological study of hemiplegia. Motor nerve conduction velocity, brachial plexus latency, and electromyography, 605

Hemiplegia and the bilowing mitral leaflet syndrome, 613

Hemiplegia and the bilateral plexus lesion, 176

Rehabilitation outcome of patients with dual disability of hemiplegia and amputation, 531

Hemorrhage

Aphasia and left thalamic hemorrhage, 536

Benign cerebellar hemorrhages, 539

Bilateral retinal hemorrhages and disk edema in migraine, 189

Cerebellar hemorrhage in adults. Diagnosis by computerized tomography, 526

Computed tomography in intracerebral hemorrhage, 81

Congophilic angiopathy and cerebral hemorrhage, 608

Fatal massive intracerebral hemorrhage complicating cerebral amyloid angiopathy, 535

Hemorrhagic mental white matter. Infarction with cerebral deep venous thrombosis and hypoxia, 407

Hemorrhagic complications of cerebral arteritis, 91
Hemorrhage, subarachnoid

Basal rupture of saccular aneurysm. A pathological case report, 526
Cerebral arterial flow dynamics during aneurysm haemorrhage, 616
Cerebral artery spasm. A histological study at necropsy of the blood vessels in cases of subarachnoid hemorrhage, 525
Changes in the subarachnoid space after experimental subarachnoid haemorrhage in the dog: scanning electron microscopic observation, 283
Clinical significance of plasma adrenaline and noradrenaline concentrations in patients with subarachnoid haemorrhage, 530
Computed tomography and subarachnoid hemorrhage, 174
Disordered cerebro-vascular physiology in aneurysmal subarachnoid haemorrhage, 616
Fibrinolytic activity in blood and cerebrospinal fluid in subarachnoid hemorrhage from ruptured intracranial saccular aneurysms before and during ENCA treatment, 612
Hypothalamic and myocardial lesions after subarachnoid haemorrhage, 182
Increased sensitivity of the basilar artery to norepinephrine and 5-hydroxytryptamine following experimental subarachnoid hemorrhage, 176
Influence of head position on the prognosis of experimental subarachnoid hemorrhage, 535
Late morbidity and mortality of common carotid ligation for posterior communicating aneurysms. A comparison to conservative treatment, 276
Myocardial creatine kinase isoenzyme in serum after subarachnoid haemorrhage, 182
Re-evaluation of cerebrospinal fluid dynamics after subarachnoid hemorrhage with computed tomography and radionuclide cisternography, 287
Spontaneous healing of intracranial aneurysms after subarachnoid hemorrhage. Case report, 528
Subarachnoid haemorrhage above the age of 59: are intracranial investigations justified? 419
Subarachnoid haemorrhage of unknown aetiology. A clinical and radiological study of 51 cases, 278
Subarachnoid haemorrhage: long-term follow-up results of late surgical versus conservative treatment, 604
Subarachnoid hemorrhage due to intraspinal tumors, 536
Subarachnoid hemorrhage in children, 422
Surgery of ruptured intracranial aneurysm. Timing and grading, 618
Surgical treatment of arteriovenous angiomas localised in the corpus callosum, basal ganglia and near the brain stem, 542
Sympathetic nervous system activity in patients with subarachnoid hemorrhage, 237
Transitory block of the arachnoid granulations following subarachnoid hemorrhage. A postmortem study, 617
Treatment of subarachnoid hemorrhage from ruptured intracranial aneurysm with tranexamic acid: a double-blind clinical trial, 616
Ultrastructural changes in feline arterial endothelium following subarachnoid hemorrhage, 410
The value of repeat pan-angiography in cases of unexplained subarachnoid hemorrhage, 610
Heparin

Carotid artery rupture. Management and prevention of delayed neurologic sequelae with low-dose heparin, 610
Cerebral involvement with disseminated intravascular coagulation in intestinal disease, 77
Comparison of heparin and a semi-synthetic heparin analogue, A - 1. Kinetics of clearance from the circulation of man following intravenous injection, 421
Comparison of heparin and a semi-synthetic heparin analogue, A - II. Some effects on platelet function, 421
Disappearing carotid defects, 258
Heparin-induced thrombocytopenia, 535
Intracranial hemorrhage and infarction in anticoagulated patients with prosthetic heart valves, 18
Low-dose heparin as a prophylaxis against deep-vein thrombosis after acute stroke, 187
One year of heparin anticoagulation. An ambulatory subject using a totally implantable infusion pump, 184
Herpes zoster infection

Herpes zoster ophthalmicus with contralateral hemiplegia, 176
Papulosus atrophicans maligna (Kohlmeyer-Degos disease): a disseminated occlusive vasculopathy, 607
Holter monitoring

Holter monitoring in patients with transient focal cerebral ischemia, 514
5-Hydroxytryptamine

Ultrastructural evidence for central monoaminergic innervation of blood vessels in the paraventricular nucleus of the hypothalamus, 289
5-Hydroxytryptophan

Central depression of carotid baroreceptor pressor response, arterial pressure and heart rate by 5-hydroxytryptophan: influence of supracerebellar areas of the brain, 189
Hyperemia

Hyperemia, CO2 responsiveness, and autoregulation in the white matter following experimental spinal cord injury, 413
Hyperlipoproteinemia

The rate of atherosclerosis change during treatment of hyperlipoproteinemia, 415
Hyperplasia, intimal

Cerebrovascular disease in sickle cell anemia: a clinical, pathological and radiological correlation, 45
Hypertension

Acute cerebrovascular and myocardial ischemia superimposed upon chronically hypertensive and arteriosclerotic male Sprague-Dawley rats, 183
Auto/regulation of cerebral blood flow during early experimental renal hypertension in the conscious dog, 413
Brain metabolism and arterial acid-base balance following bilateral carotid occlusion in normotensive and experimental hypertensive rats, 538
Carotid and vertebral-basilar transient ischemic attacks: effect of anticoagulants, hypertension, and cardiac disorders on survival and stroke occurrence — a population study, 527
Carotid baroreceptor function in hypertensive patients, 285
Comparative angiographic and histological evaluations of intracranial atherosclerosis in hypertensive and normotensive subjects, 364
Diet-induced atherosclerosis and experimental hypertension in stumptail macaques (Macaca arctoides). Effects of antihypertensive drugs and a non-atherogenic diet in the evolution of lesions, 610
Effects of acute hypertension on brain metabolism in normotensive, renovascular hypertensive and spontaneously hypertensive rats, 349
Intracerebral hemorrhage following carotid endarterectomy: a hypertensive complication? 457
Prolonged induced hypertension in the management of incipient cerebral infarction, 176
Responses of cerebral arteries and arterioles to acute hypertension, 621
Total and regional cerebral blood flow during hypotension, hypertension, and hypocapnia. Effect of sympathetic denervation in dogs, 178
Hyperventilation

Aspirin, hyperventilation, and cerebellar infarction in sickle cell disease, 407
Subject Index

Hypocapnia
Total and regional cerebral blood flow during hypotension, hypertension, and hypocapnia. Effect of sympathetic denervation in dogs, 178

Hypotension
Cerebral arterial blood flow and aneurysm surgery. Part 2: induced hypotension and autoregulatory capacity, 279
Effect on canine cerebral blood flow of two common pressor agents during prolonged halothane anesthesia, 540
Responses of cerebral arteries and arterioles to acute hypotension and hypertension, 621
Role of glucose-6-phosphate in cerebral dysfunction following hypoxia and hypotension, 187
Time course of baroreceptor resetting in short-term hypotension in the rat, 606
Total and regional cerebral blood flow during hypotension, hypertension, and hypocapnia. Effect of sympathetic denervation in dogs, 178

Hypoxemia
Sequential cerebral biochemical and physiological events in controlled hypoxemia, 183

Hypoxia
Carbon monoxide-induced arterial wall hypoxia and atherosclerosis, 614
Cerebral blood flow in birds: effect of hypoxia, 531
Cerebral circulatory responses to arterial hypoxia in normal and chemodenervated dogs, 621
Effect of ornithine alpha ketoglutarate (OAKG) on the response of brain metabolism to hypoxia in the dog, 222
Hemorrhagic cerebral white matter. Infarction with cerebral deep venous thrombosis and hypoxia, 407
Role of tissue hypoxia in local regulation of cerebral microcirculation, 621
Studies on the influence of monoamines on the cerebrovascular response to arterial hypoxia, 534

Infarction, cerebral
Aspirin, hyperventilation, and cerebellar infarction in sickle cell disease, 407
Brain monoamines in human cerebral infarcts. A preliminary study, 532
The capacity for computed tomography diagnosis of cerebral infarction. An experimental study in the nonhuman primate, 275
Cerebral infarction in young adults, 39
Early estimation of extent of the lesion in cerebral infarction by means of cyclic AMP concentration in peripheral venous plasma, 189
Effect of aminophylline on cerebral infarction in the mongolian gerbil, 477
The effect of size, histologic elements, and water content on the visualization of cerebral infarcts. A computerized cranial tomographic study, 407
Evaluation of recent cerebral infarction by computerized tomography, 80
Experimental cerebral infarction. Part 1: production of thalamic infarction in dogs, 211
Experimental cerebral infarction. Part 2: electroencephalographic changes produced by experimental thalamic infarction in dogs, 214

Infarction, myocardial
Cerebrovascular incidents after myocardial infarction, 281
Combined effects of acute cerebrovascular ischemia and myocardial infarction in arteriosclerotic, male Sprague-Dawley rats, 183
Electroencephalographic prediction of anoxic brain damage after resuscitation from cardiac arrest in patients with acute myocardial infarction, 543
Reduction of coagulation factor XIII concentration in patients with myocardial infarction, cerebral infarction, and other thromboembolic disorders, 420
The role of platelets in myocardial infarction, ischemic heart disease, cerebrovascular disease, thromboembolic disorders and acute idiopathic pericarditis, 420

Infusion pump
One year of heparin anticoagulation. An ambulatory subject using a totally implantable infusion pump, 184

Inhalation techniques
Computed tomographic measurement of the xenon brain-blood partition coefficient and implications for regional cerebral blood flow: a preliminary report, 612
Diagnosis of subdural haematoma by computed axial tomography: use of xenon inhalation for contrast enhancement, 613
Improved method for noninvasive measurement of regional cerebral blood flow by 133Xenon inhalation. Part I: description of method and normal values obtained in healthy volunteers, 195
Improved method for noninvasive measurement of regional cerebral blood flow by 133Xenon inhalation. Part II: measurements in health and disease, 205
Non-invasive regional study of chronic cerebrovascular disorders using the oxygen-15 inhalation technique, 415
Normal and abnormal patterns of cerebrovascular reserve tested by 133Xenon inhalation, 605
Study of regional cerebral metabolism and blood flow relationships in man using the method of continuously inhaling oxygen-15 and oxygen-15 labelled carbon dioxide, 413
Xenon-133 inhalation method for regional cerebral blood flow measurements: normal values and test-retest results, 396
133Xenon inhalation method: significance of indicator maldistribution for distinguishing brain areas with impaired perfusion. An index for total flow, 57

International Nomenclature of Diseases
Aid asked for nomenclature on nervous system disorders. Letter, 406

Intestinal disease
Cerebral involvement with disseminated intravascular coagulation in intestinal disease, 77
Hemorrhagic complications of cerebral arteritis, 91
Strokes and ulcerative colitis, 605

Intracranial pressure
Arterial blood gases during raised intracranial pressure in anesthetized cats under controlled ventilation, 527
Intracranial subarachnoid pressure recording: experience with 650 patients, 81
Systemic vascular responses to increased intracranial pressure. 1. Effects of progressive epidual balloon expansion on intracranial pressure and systemic circulation, 277
Systemic vascular responses to increased intracranial pressure. 2. The 'Cushing' response in the presence of intracranial space-occupying lesions: systemic and cerebral haemodynamic studies in the dog and the baboon, 277
The use of a fiberoptic intracranial pressure monitor in clinical practice, 282

Intranasal procedures
Subarachnoid hemorrhage following intranasal procedures, 82
Ischemia
Acute cerebrovascular and myocardial ischemia superimposed upon chronically hypertensive and arteriosclerotic male Sprague-Dawley rats, 183
Acute tissue response to cerebral ischemia in the gerbil. An ultrastructure study, 83
ADP-induced platelet aggregation in vitro in patients with ischemic heart disease and peripheral thromboatherosclerosis, 92
Anterior segment ischemia in temporal arteritis, 417
Brain vascularization by transplanted omentum: a possible treatment of cerebral ischemia, 282
Cerebral ischemia induced by bilateral carotid occlusion in spontaneously hypertensive rats. Supra- and infratentorial metabolism and arterial acid-base balance, 92
Cerebral ischemia. I. Current angiographic techniques, complications, and safety, 615
Combined effects of acute cerebrovascular ischemia and myocardial infarction in arteriosclerotic, male Sprague-Dawley rats, 183
Computed tomography and radionuclide imaging in the evaluation of ischemic stroke, 534
Controlled trial of aspirin on cerebral ischemia. Part II: surgical group, 309
Correlation between angiographic findings and the ischemia of head injury, 550
Delayed pentobarbital therapy of acute focal cerebral ischemia, 245
Diffuse cerebral ischemia in the cat: I. Local blood flow during severe ischemia and recirculation, 615
Diffuse cerebral ischemia in the cat: II. Regional metabolites during severe ischemia and recirculation, 615
Effects of phenobarbital in cerebral ischemia. Part I: cerebral energy metabolism during pronounced incomplete ischemia, 327
Effects of phenobarbital in cerebral ischemia. Part II: restitution of cerebral energy state, as well as of glycolytic metabolites, citric acid cycle intermediates and associated amino acids after pronounced incomplete ischemia, 335
Experimental regional cerebral ischemia in the middle cerebral artery territory in primates. Part 3: effects on brain water and electrolytes in the late phase of acute MCA stroke, 387
Experimental stroke in gerbils: correlation of clinical, pathological and electroencephalographic findings and protein synthesis, 155
Free radicals in cerebral ischemia, 445
Holter monitoring in patients with transient focal cerebral ischemia, 514
Indomethacin prevents impaired perfusion of the dog's brain after global ischemia, 591
Intracranial bypass grafts for vertebral-basilar ischemia, 283
Ipsilateral subclavian to external carotid and STA-MCA bypasses for retinal ischemia, 418
Ischemia-induced seizures and cortical monoamine levels, 527
Ischemic optic neuropathy in cavernous sinus thrombosis, 529
Local glucose utilization in acute focal cerebral ischemia: local dysmetabolism and diaschisis, 277
Microvascular anastomosis for cerebral ischemia in 19 patients: a preliminary report, 538
Modification of acute focal ischemia by treatment with mannitol, 4
Normal serum-cholesterol but low H.D.L.-cholesterol concentration in young patients with ischaemic cerebrovascular disease, 529
Platelet adhesiveness in young patients with ischaemic stroke, 77
Platelet adhesiveness, plasma fibrinogen, and fibrinolytic activity in young patients with ischaemic stroke, 530
Platelet aggregate ratios — standardization of technique and test results in patients with mycariac ischemia and patients with cerebrovascular disease, 409
Predicting risk of ischemic heart disease and cerebrovascular disease from systolic and diastolic blood pressures, 529
Rat brain osmolality during halothane anesthesia and global brain ischemia, 249
Results of microsurgical extra-intracranial arterial bypass in the treatment of cerebral ischemia, 180
The role of platelets in myocardial infarction, ischemic heart disease, cerebrovascular disease, thromboembolic disorders and acute idiopathic periarteritis, 420
Sensorimotor stroke due to thalamicopcular ischemia, 286
"Stump" of internal carotid artery — a source for further cerebral embolic ischemia, 448
Transient focal cerebral ischemia after extreme exercise, 286
Vascular spasm in cat cerebral cortex following ischemia, 52

Iskedyl
The intra-arterial injection of Iskedyl for hyperselective vascular exploration, 180

Isoproterenol
Aminophylline and isoproterenol in the treatment of cerebral vasospasm, 81
Isoproterenol and propranolol: ability to cross the blood-brain barrier and effects on cerebral circulation in man, 344

K
Köhlmeyer-Degos disease
Papulosis atrophicans maligna (Köhlmeyer-Degos disease): a disseminated cutaneous vasculopathy, 607

L
Lesion, cerebral arterial
Cerebral arterial lesions resulting from inflammatory emboli, 498
Lesion, hypothalamic
Hypothalamic and myocardial lesions after subarachnoid haemorrhage, 182
Hypothalamic component in pressor response to carotid occlusion in the rat, 104
Lesion, myocardial
Hypothalamic and myocardial lesions after subarachnoid haemorrhage, 182
Lesion, spinal
Epidemiological studies on patients with a persistent vegetative state, 264

Levodopa
Treatment of experimental cerebral infarction in rats with levodopa or with glycerol, 609
Ligation, carotid
Carotid artery rupture. Management and prevention of delayed neurologic sequelae with low-dose heparin, 610
Crossed external carotid ligation for giant aneurysms, 614
Extra-intracranial arterial anastomosis previous to carotid ligation. Case report for a cervical internal carotid aneurysm from traumatic origin, 288
Late morbidity and mortality of common carotid ligation for
posterior communicating aneurysms. A comparison to conservative treatment, 276
Planned extra-anatomic cerebral revascularization for carotid artery ligation, 534

Lipids
Biochemical effects of moderate diet and clofibrate on swine atherosclerosis, 608
Diet-induced atherosclerosis and experimental hypertension in stump-tailed macaques (Macaca arctoides). Effects of antihyper-
tensive drugs and a non-atherogenic diet in the evolution of lesions, 610
Influence of lipid concentrations and age on transfer of plasma lipoprotein into human arterial intima, 187
Morphological effects of moderate diet and clofibrate on swine atherosclerosis, 603
Serum lipids, platelets, and fibrinolytic activity in cerebro-
vascular disease, 137

Liver transplant
Acute neurological complications after liver transplantation with particular reference to intraoperative cerebral air embolus, 537

Long-term studies
Eight-year follow-up of experimental carotid-middle cerebral and carotid-basilar arterial bypass grafts and anastomoses, 606
Follow-up results of microsurgery of intracranial aneurysms, 188
Incidence of emboli with cloth-covered Starr-Edwards valve without anticoagulation and with varying forms of anticoagu-
lation. Analysis of 183 patients followed for 3½ years, 416
Long-term prognosis in stroke related to cerebral blood flow, 285
The ocular manifestations of Wegener's granulomatosis. Fifteen years experience and review of the literature, 79
Subarachnoid haemorrhage: long-term follow-up results of late surgical versus conservative treatment, 604
Trends in mortality from cerebrovascular diseases in the United States, 1960 to 1975, 549

Lupus erythematous
Oxygen-15 brain scanning for detection of cerebral involvement in systemic lupus erythematosus, 613
Retinal arterial occlusive disease in systemic lupus erythematous, 179

M
Malformation, arteriovenous
Anatomical grading of supratentorial arteriovenous malforma-
tions for determining operability, 180
Arteriovenous malformations of the brain stem in childhood, 175
Cerebral arteriovenous malformations in children, 619
Dural arteriovenous malformation in the anterior fossa, 276
Embolization of an arteriovenous malformation of the brain stem, 81
Intracranial cyanoacrylate: an adjunct in the treatment of spinal/paraspinal arteriovenous malformations, 410
Intracranial arteriovenous malformations in childhood, 539
Intracranial arteriovenous malformations: conservative or surgical treatment? 176
Intradural extramedullary spinal arterio-venous malformations fed by the anterior spinal artery, 81
Multiple aneurysm formation as a complication of interventional angiography, 411
Scintigraphic detection of congenital intracranial vascular mal-
formations, 543
Spontaneous closure of cerebral arteriovenous malformation demonstrated by angiography and computed tomography, 614

Malformation, cerebrovascular
The angiographically occult cerebrovascular malformation. Re-
port of three cases, 413

Malformation, spinal
Intracranial cyanoacrylate: an adjunct in the treatment of spinal/paraspinal arteriovenous malformations, 410
Spinal cord vascular malformations with symptoms during menstruation. Report of two cases, 181
Spinal epidural angiomatous malformations draining into intra-
thechal veins, 91

Malignant atrial myxoma
Papulosis atrophicans maligna (Köhler-Degos disease): a disseminated occlusive vasculopathy, 607

Mannitol
Modification of acute focal ischemia by treatment with man-
nitol, 4
Protective effect of mannitol (cont.). Letter, 603
Protective effect of mannitol. Letter, 524

Meningioma
Meningiomas and aneurysms of the cavernous sinus. Neuro-
ophthalmologic features, 532

Menstruation
Spinal cord vascular malformations with symptoms during menstruation. Report of two cases, 181

Metabolism
Brain blood flow autoregulation and metabolism during halo-
thane anesthesia in monkeys, 412
Brain metabolism and arterial acid-base balance following bilateral carotid occlusion in normotensive and experimental hypertensive rats, 538
Cerebral blood flow and metabolic changes from induction to onset of anesthesia with halothane or pentobarbital, 179
Cerebral blood flow and metabolism during morphine — nitrous oxide anesthesia in man, 78
Cerebral blood flow and metabolism in chronically hyperam-
monemic rats: effect of an acute ammonia challenge, 539
Cerebral blood flow and metabolism in man following cardiac arrest, 569
Cerebral circulation: effect of stimulation and blockade of dopamine receptors, 177
Cerebral circulatory and metabolic effects of 5-hydroxytrypt-
tamine in anesthetized baboons, 183
Cerebral ischaemia induced by bilateral carotid occlusion in spontaneously hypertensive rats. Supra- and infratentorial metabolism and arterial acid-base balance, 92
Diffuse cerebral ischaemia in the cat: II. Regional metabolites during severe ischaemia and recirculation, 615
Effect of ornithine alpha ketoglutarate (OAKG) on the response of brain metabolism to hypoxia in the dog, 222
Effects of acute hypertension on brain metabolism in normo-
tensive, renovascular hypertensive and spontaneously hyper-
tensive rats, 349
Effects of phenobarbital in cerebral ischaemia. Part I: cerebral energy metabolism during pronounced incomplete ischaemia, 327
Effects of phenobarbital in cerebral ischaemia. Part II: re-
titution of cerebral energy state, as well as of glycolytic metabolites, citric acid cycle intermediates and associated amino acids after pronounced incomplete ischaemia, 335
Metabolic profiles of canine cerebrovascular tree: a histo-
chemical study, 165
Study of regional cerebral metabolism and blood flow rela-
tionships in man using the method of continuously inhaling oxygen-15 and oxygen-15 labelled carbon dioxide, 415
Time course of the cerebral circulatory response to metabolic depression, 414

Methysergide
Prolonged contraction of isolated human and canine cerebral arteries induced by uridine 5'-triphosphate, 133

Mice study
Effects of reduced regional or body temperatures on responses of pial arterioles, 580

Mitral valve disease
Hemiplegia and the billowing mitral leaflet syndrome, 613
Strokes: a complication of mitral-leaflet prolapse? 86
Thromboembolic complications after mitral valve replacement with Hancock xenograft, 612

Monkey studies
Blood flow and oxygen consumption of the focally traumatized monkey brain, 92
Brain blood flow autoregulation and metabolism during halothane anesthesia in monkeys, 412
Cerebral blood flow determined by hydrogen clearance during middle cerebral artery occlusion in unanesthetized monkeys, 143
Cerebral blood flow in the monkey after focal cryogenic injury, 509
Comparative responses of the carotid and vertebral arterial systems of rhesus monkeys to betahistine, 382
Diet-induced atherosclerosis and experimental hypertension in stumptail macaques (Macaca arctoides). Effects of antihypertensive drugs and a non-atherogenic diet in the evolution of lesions, 610
The effects of sodium nitroprusside and trimethaphan camsylate on cerebral blood flow in rhesus monkeys, 414
Experimental regional cerebral ischemia in the middle cerebral artery territory in primates. Part 3: effects on brain water and electrolytes in the late phase of acute MCA stroke, 387
Internal and external carotid vascular responses to vasoactive agents in the monkey, 416
Local cerebral glucose uptake in awake and halothane-anesthetized primates, 419
Prevention of cerebral infarction in the monkey by omental transposition to the brain, 224
Monoamine levels
Brain monoamine metabolites and tryptophan in ventricular CSF of patients with spasm after aneurysm surgery, 410
Brain monoamines in human cerebral infarcts. A preliminary study, 532
Ischemia-induced seizures and cortical monoamine levels, 527
Studies on the influence of monoamines on the cerebrovascular response to arterial hypoxia, 534
Transitory platelet monoamine oxidase deficit in migraine: some reflections, 186
Ultrastructural evidence for central monoaminergic innervation of blood vessels in the paraventricular nucleus of the hypothalamus, 289
Mood disorder
Mood disorder as a specific complication of stroke, 281
Morphine
Cerebral blood flow and metabolism during morphine — nitrous oxide anesthesia in man, 78
Moyamoya syndrome
Bilateral temporal-middle cerebral artery anastomosis for moyamoya syndrome, 81
Computed tomography in "Moya-Moya": summary of 16 cases, 277
Moyamoya disease associated with aneurysm, 526
Moyamoya disease in children, 530
Multiple progressive intracranial arterial occlusions ("moya-moya") disease, 278
Observations on moyamoya disease: a case treated with superficial temporal-middle cerebral artery anastomosis, 539
Occipital to posterior inferior cerebellar artery bypass surgery, 609
Muscle contraction
Prevention of persistent cerebral smooth muscle contraction in response to whole blood, 472
Myxoma, atrial
Bilateral atrial myxomas with multiple arterial aneurysms. A syndrome mimicking polyarteritis nodosa, 90
Emboliom to the central nervous system from cardiac myxoma. Report of two cases, 279
Left ventricular myxoma. Echocardiographic diagnosis and review of the literature, 279
Nerve conduction velocity
Electrophysiological study of hemiplegia. Motor nerve conduction velocity, brachial plexus latency, and electromyography, 605
Nerve stimulation
Analysis of the effect of bilateral sympathetic stimulation on cerebral and cephalic blood flow in the dog, 29
Effect of sympathetic nerve stimulation on cerebral blood flow and on large cerebral arteries of dogs, 178
Evidence that neural mechanisms do not have important effects on cerebral blood flow, 536
Neurogenic vasodilation of cat cerebral arteries, 541
Neurological syndromes
Neurological syndromes after cardiac arrest, 517
Vessel tortuosity as a cause of posterior fossa cranial nerve syndromes, 411
Nicergoline
Effect of nicergoline on cerebral blood flow, 182
Nitrous oxide
Cerebral blood flow and metabolism during morphine — nitrous oxide anesthesia in man, 78
Cerebrovascular CO2 reactivity: role of a cholinergic mechanism modulated by anesthesia, 160
No-reflow phenomenon
Vascular spasm in cat cerebral cortex following ischemia, 52
Noradrenaline
Barrier and uptake mechanisms in the cerebrovascular response to noradrenaline, 185
Clinical significance of plasma adrenaline and noradrenaline concentrations in patients with subarachnoid haemorrhage, 530
Norepinephrine
The effect of norepinephrine on the spinal cord circulation and its possible implications in the pathogenesis of acute spinal trauma, 186
Evidence that neural mechanisms do not have important effects on cerebral blood flow, 536
Increased sensitivity of the basilar artery to norepinephrine and 5-hydroxytryptamine following experimental subarachnoid hemorrhage, 176
Sympathetic nervous system activity in patients with subarachnoid hemorrhage, 237
Nucleotide, cyclic
Platelet aggregation and cyclic nucleotide phosphodiesterase activity in arteriosclerotic patients, 540
O
Occlusion
Bilateral occlusion of basilar artery branches, 415
Brain metabolism and arterial acid-base balance following bilateral carotid occlusion in normotensive and experimental hypertensive rats, 538
Cerebral blood flow determined by hydrogen clearance during middle cerebral artery occlusion in unanesthetized monkeys, 143
Cerebral ischaemia induced by bilateral carotid occlusion in spontaneously hypertensive rats. Supra- and infratentorial metabolism and arterial acid-base balance, 92
Comparison of noninvasive diagnostic techniques in carotid artery occlusive disease, 78
Critical cerebral blood flow for production of hemiparesis after unilateral carotid occlusion in the gerbil, 173
Dilated epicardial arteries — a significant physical finding in assessment of patients with cerebrovascular insufficiency, 42
Doppler ultrasound and suprarenal photoplethysmography for noninvasive screening of carotid occlusive disease, 85
Dose dependency of the post-infarction protective effect of pentobarbital in the canine experimental stroke model, 10
Effect of occlusion on large vessels. I. A study of the rat carotid artery, 86
Emergency occlusive techniques, 608
Hypothalamic component in pressor response to carotid occlusion in the rat, 184
Measurement of mean circulatory filling pressure and vascular capacitance in the rat, 414
Natural history and classification of occlusive thromboangiopathy (Takayasu’s disease), 408  
Oclusion of the intradural vertebrobasilar artery, 532  
Pseudo-occlusion of the internal carotid artery, 408  
SEM evaluation of endothelial damage following temporary middle cerebral artery occlusion in dogs, 410  
The treatment of intracranial aneurysms by injection with a tissue adhesive, 180  
An ultrastructural study of developing cerebral infarction following bilateral carotid artery occlusion in spontaneously hypertensive rats, 280  
Ocular disease  
The ocular manifestations of Wegener’s granulomatosis. Fifteen years experience and review of the literature, 79  
Omentum  
Brain vascularization by transplanted omentum: a possible treatment of cerebral ischemia, 282  
Omental transposition to human brain. Letter, 272  
Prevention of cerebral infarction in the monkey by omental transposition to the brain, 224  
Ophthalmosonometry  
The use of ophthalmosonometry in the diagnosis of carotid artery stenosis, 80  
Ornithine alpha ketoglutarate  
Controlled trial of ornithine alpha ketoglutarate (OAKG) in patients with stroke, 218  
Effect of ornithine alpha ketoglutarate (OAKG) on the response of brain metabolism to hypoxia in the dog, 222  
Osmolality  
Rat brain osmolality during barbiturate anesthesia and global brain ischemia, 249  
Oxygen consumption, cerebral  
Blood flow and oxygen consumption of the focally traumatized monkey brain, 92  
Cerebral blood flow and metabolism in man following cardiac arrest, 569  
Cerebral blood flow and oxygen consumption in the newborn dog, 669  
Cerebral blood flow, oxygen utilization, and blood volume in dementia, 185  
Experimental head injury in the rat. Part 3: cerebral blood flow and oxygen consumption after concussive impact acceleration, 79  
Papaverine  
Brief therapeutic report: papaverine prophylaxis of complicated migraine, 177  
Experimental cerebrovascular disorders: effects of papaverine and theophylline, 179  
Paraplegia  
Recovery from paraplegia caused by spontaneous spinal epi-dural hematoma, 537  
Pentobarbital  
Cerebral blood flow and metabolic changes from induction to onset of anesthesia with halothane or pentobarbital, 179  
Delayed pentobarbital therapy of acute focal cerebral ischemia, 245  
Dose dependency of the post-insult protective effect of pentobarbital in the canine experimental stroke model, 10  
Dose dependent reduction of glucose utilization by pentobarbital in rat brain, 12  
Effects of phenobarbital in cerebral ischemia. Part 1: cerebral energy metabolism during pronounced incomplete ischemia, 327  
Effects of phenobarbital in cerebral ischemia. Part II: restitution of cerebral energy state, as well as of glycolytic metabolites, citric acid cycle intermediates and associated amino acids after pronounced incomplete ischemia, 335  
Perfusion, cerebral  
Indomethacin prevents impaired perfusion of the dog’s brain after global ischemia, 591  
Xenon enhanced CT for analysis of cerebral integrity, perfusion, and blood flow, 123  
Pericarditis  
The role of platelets in myocardial infarction, ischemic heart disease, cerebrovascular disease, thromboembolic disorders and acute idiopathic pericarditis, 420  
Phenoxymenzamine  
Prolonged contraction of isolated human and canine cerebral arteries induced by uridine 5’-triphosphate, 133  
Phenythylamine  
Phenythylamine and cerebral blood flow. Possible involvement of phenethyamine in migraine, 175  
Photonaangiography  
The bruit of carotid stenosis versus radiated basal heart murmurs. Differentiation by phonoaangiography, 606  
Photoplethysmography  
Doppler ultrasound and supraorbital photoplethysmography for noninvasive screening of carotid occlusive disease, 85  
Physical therapy  
How much physical therapy for patients with stroke? 604  
Physostigmine  
Cerebrovascular CO2 reactivity: role of a cholinergic mechanism modulated by anesthesia, 160  
Pial vessels  
Effects of 5-hydroxytryptamine on pial arteriolar calibre in anesthetized cats, 183  
Effects of reduced regional or body temperatures on responses of pial arterioles, 580  
Fibrinolytic properties of some optic nerve vessels, 532  
A method for continuous monitoring of pial vessel diameter changes and its value for dynamic studies of the regulation of cerebral circulation. A preliminary report, 534  
Vasoconstrictor effect of angiotensin on pial arteries, 487  
Plasma adrenaline  
Clinical significance of plasma adrenaline and noradrenaline concentrations in patients with subarachnoid haemorrhage, 530  
Plasma fibrinogen  
Platelet adhesiveness, plasma fibrinogen, and fibrinolytic activity in young patients with ischaemic stroke, 530  
Platelets  
ADP-induced platelet aggregation in vitro in patients with ischaemic heart disease and peripheral thromboatherosclerosis, 92  
Antithrombotic potential of dihomo-gamma-linolenic acid in man, 294  
Chronic effect of smoking on platelet count and “platelet adhesiveness” in presumably healthy middle-aged men, 409  
Comparison of heparin and a semi-synthetic heparin analogue, A. III. Some effects on platelet function, 421  
Further evidence for the role of thrombin in the platelet release reaction caused by various agents, and the nature of biphasic platelet aggregation, 618  
Indium-111-labeled autologous platelets for location of vascular thrombi in humans, 618  
Inhibition of platelet prostaglandin synthetase by oral aspirin, 417  
Platelet adhesiveness in young patients with ischaemic stroke, 77  
Platelet adhesiveness, plasma fibrinogen, and fibrinolytic activity in young patients with ischaemic stroke, 530  
Platelet aggregability in migraine, 185  
Platelet aggregate ratios — standardization of technique and test results in patients with myocardial ischemia and patients with cerebrovascular disease, 409  
Platelet aggregation and cyclic nucleotide phosphodiesterase activity in arteriosclerotic patients, 540  
Platelet aggregation in patients with peripheral vascular disease, 418  
Platelet aggregation in patients with severe atherosclerosis, 541  
Platelet changes in women taking oral contraceptives, 77  
Platelet coagulant activities and retinal vein thrombosis, 408  
Platelet hyperaggregability in young patients with completed stroke, 278  
Prevention of persistent cerebral smooth muscle contraction in response to whole blood, 472  
The role of platelets in myocardial infarction, ischemic heart
SUBJECT INDEX

The role of platelets in the pathogenesis of thrombosis and hemorrhage in patients with thrombocytosis, 420
Sciographic detection of atherosclerotic lesions and venous thrombi in man by indium-111-labelled autologous platelets, 604
Serum lipids, platelets, and fibrinolytic activity in cerebrovascular disease, 137
Spontaneous platelet aggregation in cerebrovascular disease, 540
Stroke platelet and antiplatelet agents in strokes, 403
Studies on platelet plasma membranes. III. Membrane glycoprotein loss from circulating platelets in rabbits: inhibition by aspirin-dipyridamole and acceleration by thrombin, 419
Transitory platelet monoamine oxidase deficit in migraine: some reflections, 186

COMPLICATIONS OF CEREBRAL ANGIOGRAPHY AND NEUROGRAPHY

The asymptomatic carotid bruit and the ocular pneumatophlethysmography, 274

POLYARTERITIS NODOSA

Bilateral atrial myxomas with multiple arterial aneurysms. A syndrome mimicking polyarteritis nodosa, 90

POLYCYTHEMIA

Cerebral blood-flow in polycythaemia, 83

PREGNANCY

Carotid cavernous fistula in pregnancy, 184

PROCAINAMIDE

Effects of procaainamide and chloramphenicol on acute vasospasm, 281

PROPRANOLOL

Isopropyltol and propranolol: ability to cross the blood-brain barrier and effects on cerebral circulation in man, 344

PROSTAGLANDIN

Measurement of prostaglandin E2 in cerebrospinal fluid in patients suffering from stroke, 281
Pathologic findings in the aortocoronary vein grafts. A scanning electron microscope study, 417
Prostaglandins and the arterial wall: an avenue for research in the pathogenesis of atherosclerosis (editorial), 287
Responses of isolated dog cerebral and peripheral arteries to prostaglandins after application of aspirin and polymethylen phosphate, 490
Vasoactive properties of prostaglandin compounds on the in vitro human basilar artery, 81

PROSTHESES: HEART VALVE

Anticoagulant therapy and central nervous system complications in patients with prosthetic valve endocarditis, 606
Discontinuing anticoagulant therapy in surgical patients with cardiac valve prostheses. Observations in 180 operations, 423
Incidence of emboli with cloth-covered Starr-Edwards valve without anticoagulation and with varying forms of anticoagulation. Analysis of 183 patients followed for 3 1/2 years, 416
Intraocular hemorrhage and infarction in anticoagulated patients with prosthetic heart valves, 18
Late complications of prosthetic heart valves, 608
Prevention of arterial thromboembolism with acetylsalicylic acid. A controlled clinical study in patients with aortic ball valves, 84

PROTEIN SYNTHESIS

Experimental stroke in gerbils: correlation of clinical, pathological and electroencephalographic findings and protein synthesis, 155

RABBIT STUDIES

Cerebrovascular CO2 reactivity: role of a cholinergic mechanism modulated by anesthesia, 160
Comparison of carotid artery mechanics in the rat, rabbit, and dog, 531

EXPERIMENTAL CEREBROVASCULAR DISEASES: EFFECTS OF PAPAVERINE AND THEOPHYLLINE, 179
Experiemntal cerebrovascular diseases: effects on cardiovascular functions and on cerebrospinal fluid production and constituents with special reference to cyclic AMP, 187
Gonadai hormones and pathogenesis of occlusive arterial thrombosis, 621
Increased sensitivity of the basilar artery to norepinephrine and 5-hydroxytryptamine following experimental subarachnoid hemorrhage, 176
Microradiographic study of cerebral and ocular aneurysms in hypertensive rabbits, 613
Regression of atheroma in the rabbit, 409
Scanning electron microscope studies of rabbit aortic endothelium in areas of haemodynamic stress during induction of fatty streaks, 620
Studies on platelet plasma membranes. III. Membrane glycoprotein loss from circulating platelets in rabbits: inhibition by aspirin-dipyridamole and acceleration by thrombin, 419

RADIATION DOSE IN THE DIAGNOSIS OF THROMBOSIS

On the theory of an intravenous isotope method for cerebral blood flow measurements, 87
Radioiodinated fibrinogen for clot detection in a canine model of cerebral carotid thrombosis, 541
Re-evaluation of cerebrospinal fluid dynamics after subarachnoid hemorrhage with computed tomography and radionuclide cisternography, 287
Technique for multi-view radionuclide angiography, 566
The validity of an intravenous isotope method for cerebral blood flow measurements. An experimental study, 87

RAT STUDIES

Acute cerebrovascular and myocardial ischemia superimposed upon chronically hypertensive and arteriosclerotic male Sprague-Dawley rats, 183
Brain metabolism and arterial acid-base balance following bilateral carotid occlusion in normotensive and experimental hypertensive rats, 538
Cerebral blood flow and metabolism in chronically hyperammonemic rats: effect of an acute ammonia challenge, 559
Cerebral blood flow autoregulation in the rat, 150
Cerebral ischaemia induced by bilateral carotid occlusion in spontaneously hypertensive rats. Supra- and infratenential metabolism and arterial acid-base balance, 92
Comparison of carotid artery mechanics in the rat, rabbit, and dog, 531
Dose dependent reduction of glucose utilization by pentobarbital in rat brain, 12
Effect of an acute increase of the intravascular pressure on the blood-brain barrier, 588
Effect of non-respiratory alkalosis on brain tissue and cerebral blood flow in rats with damaged blood-brain barrier, 354
Effect of occlusion on large vessels. I. A study of the rat carotid artery, 86
Effects of acute hypertension on brain metabolism in normotensive, renovascular hypertensive and spontaneously hypertensive rats, 349
Experimental head injury in the rat. Part 3: cerebral blood flow and oxygen consumption after concussive impact acceleration, 79
A fluorescent histochemical study of changes in noradrenergic neurons following experimental cerebral infarction in the rat, 286
Gonadal hormones and pathogenesis of occlusive arterial thrombosis, 621
Hypothalamic component in pressor response to carotid occlusion in the rat, 184
Measurement of mean circulatory filling pressure and vascular capacitance in the rat, 414
The role of hemodynamic factors in arterial wall thickening in the rat, 620
Sequential cerebral biochemical and physiological events in controlled hypoxemia, 183
Time course of baroreceptor resetting in short-term hypotension in the rat, 609
Treatment of experimental cerebral infarction in rats with levodopa or with glycerol, 609
Ultrastructural evidence for central monoaminergic innervation of blood vessels in the paraventricular nucleus of the hypothalamus, 289
An ultrastructural study of developing cerebral infarction following bilateral carotid artery occlusion in spontaneously hypertensive rats, 280

Rehabilitation
Rehabilitation outcome of patients with dual disability of hemiplegia and amputation, 531
Rehabilitation, stroke
Functional status measures in a comprehensive stroke care program, 288
Hospital utilization in the rehabilitation of completed stroke, 93
How much physical therapy for patients with stroke? 604
Medical audit of stroke rehabilitation: a critique of medical care review, 90
Relationship between primitive reflexes in stroke patients and rehabilitation outcome, 256
Stroke rehabilitation. I. Factors predicting outcome and length of stay — an overview, 89
Stroke rehabilitation. II. Guidelines for establishing a stroke rehabilitation unit, 90
Stroke rehabilitation: a family-team education program, 611
Stroke rehabilitation: a reconsideration of some common attitudes, 541
Stroke rehabilitation: evaluation of its quality by assessing patient outcomes, 541
Stroke rehabilitation: maintenance of achieved gains, 90

Retinal arterial occlusion
Acute central retinal artery occlusion and optic disc neovascularization. Occurrence in a patient with carotid artery disease, 529
Retinal arterial occlusive disease in systemic lupus erythematosus, 179
Retinal stroke. Is the patient at risk? 182
Treatment of acute central retinal artery occlusion, 605

Revascularization, cerebral
Cerebral arterial revascularization: the value of repeated angiography in selection of patients for operation, 604
Cerebral revascularization for transient ischemic attacks, 77
Cerebral revascularization: common carotid to distal middle cerebral artery bypass, 540
Planned extra-anatomic cerebral revascularization for carotid artery ligation, 534
Revascularization, myocardi1
Vascular reconstructive surgery following myocardial revascularization, 619
Revascularization, posterior fossa
Posterior fossa revascularization: anastomosis of vertebral artery to PICA with interposed radial artery graft, 607

Rheumatoid arthritis
Central nervous system vasculitis in rheumatoid arthritis, 276

Risk factors
Gonadal hormones and pathogenesis of occlusive arterial thrombosis, 621
Importance of the hematocrit as a risk factor in cerebral infarction, 369
Long term changes in blood pressure and risk of cerebrovascular disease from systolic and diastolic blood pressures, 529
Predicting risk of ischemic heart disease and cerebrovascular disease from systolic and diastolic blood pressures, 529

Scintigraphy
Scintigraphic detection of atherosclerotic lesions and venous thrombi in man by indium-111-labelled autologous platelets, 604
Scintigraphic detection of congenital intracranial vascular malformations, 543

Seizure
Basilar migraine, seizures, and severe epileptiform EEG abnormalities. A relatively benign syndrome in adolescents, 605
Ischemia-induced seizures and cortical monoamine levels, 527

Serotonin
Brain monoamines in human cerebral infarcts. A preliminary study, 532
Cerebral circulatory and metabolic effects of 5-hydroxytryptamine in anesthetized baboons, 183
Effect of topically applied serotonin on local cerebral blood flow, 25
Effects of 5-hydroxytryptamine on pial arteriolar calibre in anesthetized cats, 183
Increased sensitivity of the basilar artery to norepinephrine and 5-hydroxytryptamine following experimental subarachnoid hemorrhage, 176
Pharmacological analysis of 5-hydroxytryptamine receptors in isolated intracranial and extracranial vessels of cat and man, 409
Potentiation and antagonism of serotonin effects on intracranial and extracranial vessels. Possible implications in migraine, 412
Potentiation of the cerebrovascular response to intra-arterial 5-hydroxytryptamine, 531
Transient cerebral ischemia and brain serotonin: relevance to migraine, 177
Transitory platelet monoamine oxidase deficit in some reflections, 186

Shy-Drager syndrome
Cerebral hemodynamics in Shy-Drager syndrome. Variability of cerebral blood flow dysautoregulation and the compensatory role of chemical control in dysautoregulation, 504

Sickle cell anemia
Aspirin, hyperventilation, and cerebellar infarction in sickle cell disease, 407
Cerebrovascular complications of sickle cell anemia, 73
Cerebrovascular disease in sickle cell anemia: a clinical, pathological and radiological correlation, 45
The management of ruptured intracranial aneurysm in sickle cell anemia. Case report, 276
Strokes in children and adolescents, 169

Sinosal disease
Embolism in sinosal disease, 543
Smoking habits
Chronic effect of smoking on platelet count and "platelet adhesiveness" in presumably healthy middle-aged men, 409
Cigarette smoking and HDL cholesterol. The Framingham Offspring Study, 614
Smoking, carbon monoxide, and atherosclerotic diseases, 419
Sodium nitroprusside
Cyanide toxicity and thiosulfate protection during chronic administration of sodium nitroprusside in the dog: correlation with a human case, 286
The effects of sodium nitroprusside and trimethaphan camsylate on cerebral blood flow in rhesus monkeys, 414

Spasm, vascular
Brain monoamine metabolites and tryptophan in ventricular CSF of patients with spasm after aneurysm surgery, 410
Cerebral artery spasm. A histological study at necropsy of the blood vessels in cases of subarachnoid hemorrhage, 525
Experiences of surgical treatment of 400 consecutive ruptured cerebral arterial aneurysms, 542
Vascular spasm in cat cerebral cortex following ischemia, 52

Stenosis, carotid
The fruit of carotid stenosis versus radiated basal heart murmurs. Differentiation by phonoangiography, 606
Stress response
Stenosis, subclavian
Cardiac cycle-dependent alternating flow in vertebral arteries with subclavian artery stenoses, 229
Steroid administration
Resolving intracerebral hematoma: alteration of the “ring sign” with steroids, 607
Tolosa-Hunt syndrome. Arteriographic evidence of improvement in carotid narrowing, 533
Stress response
Prognostic value of the stress response following stroke, 181
Strokes: a complication of mitral-leaflet prolapse?
Strokes in children and adolescents, 169
Stroke associated with carotid endarterectomy, 421
Sensorimotor stroke due to thalamocapsular ischemia, 286
Prognostic factors in the survival of 1,484 stroke cases observed for 30 to 48 months. I. Diagnostic types and descriptive variables, 528
Prognostic factors in the survival of 1,484 stroke cases observed for 30 to 48 months. II. Clinical variables and laboratory measurements, 528
Prognostic value of the stress response following stroke, 181
Regional cerebral blood flow in stroke patients, 181
Sensotorimotor stroke due to thalamocapsular ischemia, 286
Stroke associated with carotid endarterectomy, 421
Stroke platelet and antiplatelet agents in strokes, 403
Stroke associated with carotid endarterectomy, 421
Syncope
Swallowing syncope. A case report, 93
Takayasu's disease
Natural history and classification of occlusive thromboendarteropathy (Takayasu's disease), 408
Theophylline
Experimental cerebrovascular disorders: effects of papaverine and theophylline, 179
Thrombectomy
Thromboendarterectomy
Thromboendarterectomy for total occlusion of the internal carotid artery: a reappraisal of risks, success rate and potential benefits, 34
Thrombolysis
Non-penetrating trauma to the carotid artery with secondary thrombosis and embolism: treatment by thrombolysis, 83
Thrombosis
Antithrombotic potential of dihomo-gamma-linolenic acid in man, 284
Disappearing carotid defects, 258
Dynamic radionuclide scanning in the diagnosis of thrombosis of the superior sagittal sinus, 80
Failure of aspirin to prevent postoperative deep vein thrombosis in patients undergoing total hip replacement, 618
The finding of thrombus at carotid endarterectomy and its relationship to the timing of surgery, 181
Gonadal hormones and pathogenesis of occlusive arterial thrombosis, 621
Hemorrhagic cerebral white matter. Infarction with cerebral deep venous thrombosis and hypoxia, 407
Intracranial venous sinus thrombosis: diagnosis suggested by computed tomography, 619
Iron-acrylal compound for stereotaxic aneurysm thrombosis, 78
Ischemic optic neuropathy in cavernous sinus thrombosis, 529
Low-dose heparin as a prophylaxis against deep-vein thrombosis after acute stroke, 187
A model study of why some intracranial aneurysms thrombose but others rupture, 583
Non-penetrating trauma to the carotid artery with secondary thrombosis and embolism: treatment by thrombolysis, 83
Primary cerebral venous thrombosis in young adults: the diverse manifestations of an underrecognized disease, 418
Radiiodinated fibrinogen for clot detection in a canine model of cervical carotid thrombosis, 543
Reduction of coagulation factor XII concentration in patients with myocardial infarction, cerebral infarction, and other thromboembolic disorders, 420
The role of platelets in myocardial infarction, ischemic heart
disease, cerebrovascular disease, thromboembolic disorders and acute idiopathic pericarditis, 420
The role of platelets in the pathogenesis of thrombosis and hemorrhage in patients with thrombocytosis, 420
Stereotaxic thrombosis of inaccessible intracranial aneurysms, 279
Strokes in children and adolescents, 169
Thromboembolic complications in coronary angiography. Prevention with acetyl-salicylic acid, 417
Thrombosis of the intraorbital veins and cavernous sinus, 85
Thrombosis of the mesencephalic artery. A clinico-pathological study of two cases and its correlation with the arterial vascularisation, 82
Thrombus formation and endothelial alterations in microarterial anastomoses, 89
Ultramicroscopic ulcerations and thrombi of the carotid bifurcation, 274
Thyrotoxicosis
Arterial embolism in thyrotoxicosis with atrial fibrillation, 178
Tolosa-Hunt syndrome
Tolosa-Hunt syndrome. Arteriographic evidence of improvement in carotid narrowing, 533
Tranexamic acid
Effect of tranexamic acid on rebleeding after subarachnoid hemorrhage: a double-blind controlled clinical trial, 174
Prolonged antifibrinolysis: an effective non-surgical treatment for ruptured intracranial aneurysms? 537
Treatment of subarachnoid hemorrhage from ruptured intracranial aneurysm with tranexamic acid: a double-blind clinical trial, 616
Transient cerebral dysfunction
Transient cerebral dysfunction following chemotherapy for osteogenic sarcoma, 607
Transient ischemic attacks
Carotid and vertebral-basilar transient ischemic attacks: effect of anticoagulants, hypertension, and cardiac disorders on survival and stroke occurrence — a population study, 527
Cerebral revascularization for transient ischemic attacks, 77
Clinical and arteriographic comparison of amaurosis fugax with hemispheric transient ischemic attacks, 254
Controlled trial of aspirin on cerebral ischemia. Part II: surgical group, 309
Cooperative study of hospital frequency and character of transient ischemic attacks. III. Variations in treatment, 84
Cooperative study of hospital frequency and character of transient ischemic attacks. IV. The reliability of diagnosis, 421
Cooperative study of hospital frequency and character of transient ischemic attacks. V. Symptom analysis, 421
Cooperative study of hospital frequency and character of transient ischemic attacks. VI. Patients examined during an attack, 422
Cooperative study of hospital frequency and character of transient ischemic attacks. VII. Initial diagnostic evaluation, 618
The finding of thrombus at carotid endarterectomy and its relationship to the timing of surgery, 181
A new look at emergency carotid artery operations for the treatment of cerebrovascular insufficiency, 599
Relevance of duration of transient ischaemic attacks in carotid territory, 614
Transient cerebral ischemia and brain serotonin: relevance to migraine, 177
Treatment of transient ischemic attacks, 299
Trial of aspirin during weaning patients with transient ischemic attacks from anticoagulants, 617
The value of carotid endarterectomy in treating transient cerebral ischemia of the posterior circulation, 80
Trauma, head
Compartmental analysis of regional cerebral blood flow in patients with acute severe head injuries, 283
Correlation between angiographic findings and the ischemia of head injury, 530
Experimental head injury in the rat. Part 3: cerebral blood flow and oxygen consumption after concussive impact acceleration, 79
Extradural haematoma. Report of 132 cases, 617
Non-penetrating trauma to the carotid artery with secondary thrombosis and embolism: treatment by thrombolyisin, 83
A sign of subarachnoid bleeding on cranial computed tomo-grams of pediatric head trauma patients, 416
Strokes in children and adolescents, 169
Vertebrobasilar spasm: a significant cause of neurologic deficit in head injury, 526
Trauma, neck
Common carotid artery stenosis due to subintimal hematoma following blunt trauma to the neck. Report of a case, 84
Trauma, spinal cord
The effect of norepinephrine on the spinal cord circulation and its possible implications in the pathogenesis of acute spinal trauma, 186
Hyperemia, CO2 responsiveness, and autoregulation in the white matter following experimental spinal cord injury, 413
Tumor
Intracranial hemorrhage caused by metastatic tumors, 80
Intracranial tumors simulating the presentation of cerebrovascular syndromes. Early detection with cerebral computed tomography (CCT), 283
Spinal cord vasculitis presenting as a spinal cord tumor in a heroin addict. Case report, 410
Subarachnoid hemorrhage due to intraspinal tumors, 536
U
Ulcerative colitis
Hemorrhagic complications of cerebral arteritis, 91
Strokes and ulcerative colitis, 605
Uridine 5'-triphosphate
Prolonged contraction of isolated human and canine cerebral arteries induced by uridine 5'-triphosphate, 133
V
Vascular amyloid
Vascular amyloid in the aging central nervous system. Clinico-pathological study and literature review, 276
Vasculitis
Central nervous system vasculitis in rheumatoid arthritis, 276
Spinal cord vasculitis presenting as a spinal cord tumor in a heroin addict. Case report, 410
Vasoconstriction
Internal and external carotid vascular responses to vasoactive agents in the monkey, 416
Vasoconstrictor effect of angiotensin on pial arteries, 487
Vasoilatation
The intra-arterial injection of Iskedyl for hyperselective vascular exploration, 180
Neurogenic vasodilatation of cat cerebral arteries, 541
Vasospasm, cerebral
Aminophylline and isoproterenol in the treatment of cerebral vasospasm, 81
Cerebral vasospasm with ruptured saccular aneurysm, 281
Diagnosis and treatment of postoperative cerebral vasospasm, 177
Die Rolle des postoperativen HirngefSssspasmus nach Verklip- pung intrakranieller Aneurysmen. Postoperative vasospasm after clipping of intracranial aneurysms, 542
Effects of procainamide and chloramphenicol on acute vaso- spasm, 281
Electronic stethoscope for detection of cerebral aneurysm, vasospasm and arterial disease, 177
Experimental cerebral vasospasm: comparison of perfusion deficits with angiography, 298
Intercellular granules and vesicles in prolonged cerebral vaso- spasm, 412
Prolonged contraction of isolated human and canine cerebral arteries induced by uridine 5'-triphosphate, 133

Prolonged vasospasm produced by the breakdown products of erythrocytes, 89

Significance of vasospasm in the treatment of ruptured intracranial aneurysms, 89

Time course of vasospasm in man, 412

Timing and indication of surgery for ruptured intracranial aneurysms with regard to cerebral vasospasm, 616

Vertebrobasilar spasm: a significant cause of neurological deficit in head injury, 526

Velocity wave form analysis
The use of velocity wave form analysis in the diagnosis of carotid artery occlusive disease, 275

Vertebrobasilar occlusion
Occlusion of the intradural vertebrobasilar artery, 532

Traumatic vertebrobasilar occlusive disease in childhood, 416

Vincamine
The effect of vincamine on the regional cerebral blood flow in man, 612

Warfarin
Intracranial hemorrhage and infarction in anticoagulated patients with prosthetic heart valves, 18

Predicting patients' warfarin requirements, 187

Thromboembolic complications after mitral valve replacement with Hancock xenograft, 612

Wegener's granulomatosis
The ocular manifestations of Wegener's granulomatosis. Fifteen years experience and review of the literature, 79

Women
Mortality among oral-contraceptive users, 182

Mortality among women participating in the Oxford/Family Planning Association contraceptive study, 182

Platelet changes in women taking oral contraceptives, 77

Xenon-133 inhalation
Computed tomographic measurement of the xenon brain-blood partition coefficient and implications for regional cerebral blood flow: a preliminary report, 612

Diagnosis of subdural haematoma by computed axial tomography: use of xenon inhalation for contrast enhancement, 613

Improved method for noninvasive measurement of regional cerebral blood flow by 133Xe inhalation. Part I: description of method and normal values obtained in healthy volunteers, 195

Improved method for noninvasive measurement of regional cerebral blood flow by 133Xe inhalation. Part II: measurements in health and disease, 205

Normal and abnormal patterns of cerebrovascular reserve tested by 133Xe inhalation, 605

Recent validation of 133Xe inhalation. Letter, 272

Xenon-133 inhalation method for regional cerebral blood flow measurements: normal values and test-retest results, 396

Xenon inhalation method: significance of indicator maldistribution for distinguishing brain areas with impaired perfusion. An index for total flow, 57

Young adults
Amaurosis fugax due to isolated atherosclerotic carotid artery disease in a young woman, 422

Basilar migraine, seizures, and severe epileptiform EEG abnormalities. A relatively benign syndrome in adolescents, 605

Cerebral infarction in young adults, 39

Intracranial saccular aneurysms in the first three decades, 608

Normal serum-cholesterol but low H.D.L.-cholesterol concentration in young patients with ischaemic cerebrovascular disease, 529

Occlusive arterial disease of the child and young adult. Clinical electroencephalographical analysis of 26 cases, 422

Platelet adhesiveness in young patients with ischaemic stroke, 77

Platelet adhesiveness, plasma fibrinogen, and fibrinolytic activity in young patients with ischaemic stroke, 530

Platelet hyperaggregability in young patients with completed stroke, 278

Primary cerebral venous thrombosis in young adults: the diverse manifestations of an underrecognized disease, 418

Strokes and ulcerative colitis, 605

Strokes in children and adolescents, 169
