SUBJECT INDEX

Page Numbers in Italics refer to Abstracts

A

Adenosine nucleotide derivatives

Amaurosis fugax
Anmaurosis fugax due to isolated atherosclerotic carotid artery disease in a young woman, 422
Amaurosis fugax from disease of the external carotid artery, 87
Clinical and arteriographic comparison of amaurosis fugax with hemispheric transient ischemic attacks, 254
Evidence of silent cerebral embolism in patients with amaurosis fugax, 176
Surgical management of the totally occluded carotid artery, 275

Aminophylline
Aminophylline and isoproterenol in the treatment of cerebral vasospasm, 81
Effect of aminophylline on cerebral infarction in the mongolian gerbil, 477

Ampaque
Clinical testing of Amipaque for cerebral angiography, 614

Amnesia
Cerebral ammonia metabolism. Letter, 521
Cerebral blood flow and metabolism in chronically hyperammonemic rats: effect of an acute ammonia challenge, 539

Anastomosis
Bilateral temporal-middle cerebral artery anastomosis for moyamoya syndrome, 81
Eight-year follow-up of experimental carotid-middle cerebral and carotid-basilar arterial bypass grafts and anastomoses, 606
Experimental extracranial-intracranial anastomosis, 176
Extra-intracranial arterial anastomosis previous to carotid ligation. Case report for a cervical internal carotid aneurysm from traumatic origin, 288
Extracranial-to-intracranial vascular anastomosis for occlusive cerebrovascular disease: experience in 110 patients, 275
Intracranial bypass grafts for vertebral-basilar ischemia, 283
Microvascular anastomosis for cerebral ischemia in 19 patients: a preliminary report, 538
Observations on moyamoya disease: a case treated with superficial-temporal-middle cerebral artery anastomosis, 539
Superficial-temporal-middle cerebral artery anastomosis for internal carotid occlusion, 82
Thrombus formation and endothelial alterations in microarterial anastomoses, 89

Anatomy
Microsurgical anatomy of the posterior cerebral artery, 525

Anesthesia
Cerebral blood flow and metabolic changes from induction to onset of anesthesia with halothane or pentobarbital, 179
Cerebral blood flow and metabolism during morphine — nitrous oxide anesthesia in man, 78
Cerebrovascular CO2 reactivity: role of a cholinergic mechanism modulated by anesthesia, 160

Effect on canine cerebral blood flow of two common pressor agents during prolonged halothane anesthesia, 540
Mechanisms of anesthetic action. Letter, 272
Rat brain osmolality during barbiturate anesthesia and global brain ischemia, 249

Aneurysm
Aneurysm of the ayzyos artery, 282
Aneurysms of the posterior cerebral artery. Locations and clinical pictures, 91
Anevrymes triples bilateraux, opres en deux temps. Deux observations. Bilateral triple aneurysms operated in two stages: two case studies, 82
Anterior choroidal artery aneurysms: their anatomy and surgical significance, 419
Bacterial intracranial aneurysm, 527
Basal rupture of saccular aneurysm. A pathological case report, 526
Bilateral atrial myxomas with multiple arterial aneurysms. A syndrome mimicking polyarteritis nodosa, 90
Brain monoamine metabolites and tryptophan in ventricular CSF of patients with spasm after aneurysm surgery, 410
Carotid paracloind aneurysms with intradural origin and intracavernous location, 525
Carotid stenosis and coexisting ipsilateral intracranial aneurysm. A problem in management, 77
Cerebral arterial blood flow and aneurysm surgery. Part 1: local arterial flow dynamics, 278
Cerebral arterial blood flow and aneurysm surgery. Part 2: induced hypotension and autoregulatory capacity, 279
Cerebral arterial flow dynamics during aneurysm haemorrhage, 616
Cerebral hamartoma mimicking the angiographic appearance of congenital fusiform aneurysm, 84
Cerebral microembolization. II. Morphological studies, 611
Cerebral vasospasm with ruptured saccular aneurysm, 281
Clinico-pathological study of cerebral aneurysms — origin, rupture, repair and growth, 288
Clinicopathological study of cerebral aneurysms. Origin, rupture, repair, and growth, 525
Computed tomography of ruptured intracranial aneurysm in acute stage, 188
Crossed external carotid ligation for giant aneurysms, 614
Die Rolle des postoperativen HirngefSSssspasmus nach Verklippung intrakranieller Aneurysmen. Postoperative Vasospasmen nach clipping of intracranial aneurysms, 542
Direct attack on carotid ophthalmic and large internal carotid aneurysms, 81
Direct serial magnification angiography applied to cerebral aneurysms, 411
Disordered cerebro-vascular physiology in aneurysmal subarachnoid haemorrhage, 616
Dissecting intracranial aneurysms, 280
Electronic stethoscope for detection of cerebral aneurysm, vasospasm and arterial disease, 177
Experiences of surgical treatment of 400 consecutive ruptured cerebral arterial aneurysms, 542
Extra-intracranial arterial anastomosis previous to carotid ligation. Case report for a cervical internal carotid aneurysm from traumatic origin, 288
Fibrinolytic activity in blood and cerebrospinal fluid in subarachnoid hemorrhage from ruptured intracranial saccular aneurysm before and during EACA treatment, 612
Follow-up results of microsurgery of intracranial aneurysms, 188
How old people tolerate intracranial surgery for aneurysm, 281
Infrequent aneurysm surgery, 604
Intracranial aneurysms in early childhood, 536
Intracranial aneurysms: characteristics of aneurysms in siblings. (letter to the editor), 85
Intracranial arterial aneurysms in infancy and childhood, 85
Intracranial saccular aneurysms in the first three decades, 608
Iron-acrylic compound for stereotaxic aneurysm thrombosis, 78
Late morbidity and mortality of common carotid ligation for postoperative communicating aneurysms. A comparison to conservative treatment, 276
Les indications et les conditions opératoires des anévrismes chez les gens âgés. Indications and operative conditions of aneurysms in old patients, 607
The management of ruptured intracranial aneurysm in sickle cell anemia. Case report, 630
Meningiomas and aneurysms of the cavernous sinus. Neuro-ophthalmologic features, 532
Microangiographic study of cerebral and ocular aneurysms in hypertensive rabbits, 613
Microsurgical treatment of cerebral aneurysms at the bifurcation of the internal carotid artery, 617
A model study of why some intracranial aneurysms thrombose but others rupture, 583
Moyamoya disease associated with aneurysm, 526
Multiple aneurysm formation as a complication of interventional angiography, 411
Multiple intracranial aneurysms: identifying the ruptured lesion, 608
Prolonged antifibrinolysis: an effective non-surgical treatment for ruptured intracranial aneurysms? 337
Reinforcement with gauze wrapping for ruptured aneurysms of the middle cerebral artery, 279
Saccular aneurysm of infancy and early childhood, 414
The significance for diagnosis and for surgical technique of multiple aneurysms of the same internal carotid artery, 616
Significance of vasospasm in the treatment of ruptured intracranial aneurysms, 89
Spontaneous healing of intracranial aneurysms after subarachnoid hemorrhage. Case report, 528
Stereotaxic thrombosis of inaccessible intracranial aneurysms, 279
Subdural hematomas due to ruptured cerebral aneurysms: angiographic diagnosis and potential pitfall for CT, 530
Surgery of ruptured intracranial aneurysm. Timing and grading, 618
Timing and indication of surgery for ruptured intracranial aneurysms with regard to cerebral vasospasm, 616
The treatment of intracranial aneurysms by injection with a tissue adhesive, 180
Treatment of subarachnoid hemorrhage from ruptured intracranial aneurysm with tranexamic acid: a double-blind clinical trial, 616
Unruptured intracranial aneurysms — an unusual source of epilepsy, 542
Aneurysm clips
Interrelationship of aneurysm clips and vascular tissue, 620
Aneurysm, myotic
Cerebral hemorrhage from a myotic aneurysm developing during appropriate antibiotic therapy, 267
Intracranial hemorrhage and infarction in anticoagulated patients with prosthetic heart valves, 18
Multiple myotic aneurysms due to candida endocarditis, 85
Angiography
Amaurosis fuga and carotid artery disease: indications for angiography, 88
The angiographic diagnosis of occlusions of the posterior cerebral artery, 280
Angiographic findings in giant cell arteritis, 90
The angiographically occult cerebrovascular malformation. Report of three cases, 413
Bilateral cerebral angiography with catheterization of only one carotid artery, 417
Cerebral angiography with non-ionic (metrizamide) and ionic (meglumine metrizoate) watersoluble contrast media. A comparative study with double blind technic, 179
Cerebral arterial revascularization: the value of repeated angiography in selection of patients for operation, 604
Cerebral ischemia. 1. Current angiographic techniques, complications, and safety, 615
Cerebrovascular disease in sickle cell anemia: a clinical, pathological and radiological correlation, 45
Clinical and arteriographic comparison of amaurosis fugax with hemispheric transient ischemic attacks, 254
Clinical testing of Amipaque for cerebral angiography, 614
Comparative angiographic and histological evaluations of intracranial atherosclerosis in hypertensive and normotensive subjects, 364
Complications of cerebral angiography, 416
Complications of cerebral angiography and pneumography, 186
Computed tomography in a transient brain stem disorder, 417
Correlation between angiographic findings and the ischemia of head injury, 530
Direct serial magnification angiography applied to cerebral aneurysms, 411
Disappearing carotid defects, 258
Electromagnetic rheoangiometry: an extension of selective angiography, 409
Experimental cerebral vasospasm: comparison of perfusion deficits with angiography, 288
Impact of computed tomography on utilization of cerebral angiograms, 88
Leptomeningeal artery atherosclerosis visualized by angiography: clinical correlates, 262
Multiple aneurysm formation as a complication of interventional angiography, 411
Routine operative arteriography during carotid endarterectomy: a reassessment, 411
Sequential angiographic studies demonstrating delayed development of an acute epidural hematoma. Case report, 536
Subdural hematomas due to ruptured cerebral aneurysms: angiographic diagnosis and potential pitfall for CT, 530
Technique for multi-view radionuclide angiography, 566
Tolosa-Hunt syndrome. Arteriographic evidence of improvement in carotid narrowing, 535
The value of repeat pan-angiography in cases of unexplained subarachnoid hemorrhage, 610
Angioma
Cavernous angiomas of the brain. Account of fourteen personal cases and review of the literature, 342
Intracerebral venous angioma. Case report and review, 611
Surgical treatment of arteriovenous angiomas localized in the corpus callosum, basal ganglia and near the brain stem, 542
Angiotensin
Vasoconstrictor effect of angiotensin on pial arteries, 487
Anoxic myelopathy
Diffuse "anoxic" myelopathy, 204
Electroencephalographic prediction of anoxic brain damage after resuscitation from cardiac arrest in patients with acute myocardial infarction, 543
Anticoagulant therapy
Anticoagulant therapy and central nervous system complications in patients with prosthetic valve endocarditis, 605
Carotid and vertebral-basilar transient ischemic attacks: effect of anticoagulants, hypertension, and cardiac disorders on survival and stroke occurrence — a population study, 527
Carotid endarterectomy. Temporal profile of the healing process and effects of anticoagulation therapy, 412
Discontinuing anticoagulant therapy in surgical patients with cardiac valve protheses. Observations in 180 operations, 432
Effects of anticoagulants in an animal model of septic cerebral embolization, 573
In vivo assessment of anticoagulation, 285
Incidence of emboli with cloth-covered Starr-Edwards valve without anticoagulation and with varying forms of anticoagulation. Analysis of 183 patients followed for 3½ years, 416
Intracranial hemorrhage and infarction in anticoagulated patients with prosthetic heart valves, 18
One year of heparin anticoagulation. An ambulatory subject using a totally implantable infusion pump, 184
Anticoagulant therapy—Artery, episcleral

SUBJECT INDEX

Predicting patients' warfarin requirements, 187
Trial of aspirin during weaning patients with transient ischemic attacks from anticoagulants, 617
Aphasia
Aphasia and left thalamic hemorrhage, 526
Recovery patterns and prognosis in aphasia, 189
Arrhythmia
Cardiac arrhythmias in acute stroke, 392
Arterial injury
Localisation of injury in arteries by 1-125 fibrinogen uptake, 533
Arterial pressure
Central depression of carotid baroreceptor pressor response, arterial pressure and heart rate by 5-hydroxytryptophan: influence of supracollicular areas of the brain, 189
Arteriosclerosis
Acute cerebrovascular and myocardial ischemia superimposed upon chronically hypertensive and arteriosclerotic male Sprague-Dawley rats, 813
Combined effects of acute cerebrovascular ischemia and myocardial infarction in arteriosclerotic, male Sprague-Dawley rats, 183
Intracranial arterial aneurysms in infancy and childhood, 85
Platelet aggregation and cyclic nucleotide phosphodiesterase activity in arteriosclerotic patients, 540
Arteritis
Angiographic findings in giant cell arteritis, 90
Anterior segment ischemia in temporal arteritis, 417
Hemorrhagic complications of cerebral arteritis, 91
Intracranial involvement of giant-cell arteritis, 77
Artery, anterior spinal
Intradural extramedullary spinal arterial-venous malformations fed by the anterior spinal artery, 81
Artery, axygos
Aneurysm of the axygos artery, 282
Artery, basilar
Basilar artery migraine. A review of 30 cases, 531
Bilateral occlusion of basilar artery branches, 415
Eight-year follow-up of experimental carotid-middle cerebral and carotid-basilar arterial bypass grafts and anastomoses, 606
Increased sensitivity of the basilar artery to norepinephrine and 5-hydroxytryptamine following experimental subarachnoid hemorrhage, 176
The microsurgical anatomy of the basilar artery bifurcation, 181
Vasoactive properties of prostaglandin compounds on the in vitro human basilar artery, 81
Artery, carotid external
Amaurosis fugax from disease of the external carotid artery, 817
Crossed external carotid ligation for giant aneurysms, 614
Detection of atherosclerotic plaques in carotid arteries by the use of 123I-fibrinogen, 416
ICA back pressures: importance of external carotid measures. Letter, 273
Importance of the external carotid artery in extracranial cerebrovascular occlusive disease, 88
Internal and external carotid vascular responses to vasoactive agents in the monkey, 416
Planned extra-anatomic cerebral revascularization for carotid artery ligation, 534
Artery, carotid internal
Carotid-axillary bypass: clinical and experimental evaluation, 288
Cerebrovascular disease in sickle cell anemia: a clinical, pathological and radiological correlation, 45
Cerebrovascular evaluation: assessment of Doppler scanning of carotid arteries, ophthalmic Doppler flow and cervical bruises, 563
Comparison of noninvasive diagnostic techniques in carotid artery occlusive disease, 78
Detection of atherosclerotic plaques in carotid arteries by the use of 123I-fibrinogen, 416
Dilated episcleral arteries — a significant physical finding in assessment of patients with cerebrovascular insufficiency, 42
Direct attack on carotid ophthalmic and large internal carotid aneurysms, 81
Doppler ultrasound and supraorbital photoplethysmography for noninvasive screening of carotid occlusive disease, 85
Extra-intracranial arterial anastomosis previous to carotid ligation. Case report for a cervical internal carotid aneurysm from traumatic origin, 289
Fibromuscular dysplasia of the cervico-cephalic arteries, 535
Hypoglossal paralysis due to compression by a tortuous internal carotid artery in the neck, 543
Internal and external carotid vascular responses to vasoactive agents in the monkey, 416
Internal carotid back pressure, intraoperative shunting, ulcerated atheromata, and the incidence of stroke during carotid endarterectomy, 533
Bilateral blindness. A complication of carotid endarterectomy, 78
Kinking of the internal carotid artery. Clinical significance and surgical management, 84
Microsurgical treatment of cerebral aneurysms at the bifurcation of the internal carotid artery, 617
Non-penetrating trauma to the carotid artery with secondary thrombosis and embolism: treatment by thrombolysis, 83
Observations on simultaneous internal carotid artery and total cerebral blood flow measurements in man, 282
Pseudo-occlusion of the internal carotid artery, 408
Relationship between ophthalmic artery blood flow and re-canalization of occluded carotid artery. Ultrasonic Doppler study, 360
The significance for diagnosis and for surgical technique of multiple aneurysms of the same internal carotid artery, 616
Spontaneous dissection of cervico-cerebral arteries, 538
"Stump" of internal carotid artery — a source for further surgical management, 533
Superficial temporal-middle cerebral artery anastomosis for internal carotid occlusion, 82
Surgical management of the totally occluded carotid artery, 275
Thromboendarterectomy for total occlusion of the internal carotid artery: a reappraisal of risks, success rate and potential benefits, 34
The use of velocity wave form analysis in the diagnosis of carotid artery occlusive disease, 275
Artery, cerebral
Cerebral arterial revascularization: the value of repeated angiography in selection of patients for operation, 604
Cerebral artery spasm. A histological study at necropsy of the blood vessels in cases of subarachnoid hemorrhage, 525
Cerebral revascularization: common carotid to distal middle cerebral artery bypass, 542
Clinicopathological study of cerebral aneurysms. Origin, rupture, repair, and growth, 525
Experiences of surgical treatment of 400 consecutive ruptured cerebral arterial aneurysms, 542
Responses of isolated dog cerebral and peripheral arteries to prostaglandins after application of aspirin and polyphloretin phosphate, 490
Artery, common carotid
Brain metabolism and arterial acid-base balance following bilateral carotid occlusion in normotensive and experimental hypertensive rats, 538
Carotid embolization presenting as total monocular blindness, 186
Cerebral revascularization: common carotid to distal middle cerebral artery bypass, 340
Common carotid artery stenosis due to subintimal hematoma following blunt trauma to the neck. Report of a case, 84
Late morbidity and mortality of common carotid ligation for posterior communicating aneurysms. A comparison to conservative treatment, 276
The use of velocity wave form analysis in the diagnosis of carotid artery occlusive disease, 275
Artery, episcleral
Dilated episcleral arteries — a significant physical finding in
Artery, innominate
Innominate artery endarterectomy. A 16-year experience, 274

Artery, leptomeningeal
Leptomeningeal artery atherosclerosis visualized by angiography: clinical correlates, 262

Artery, mesencephalic
Thrombosis of the mesencephalic artery. A clinicopathological study of two cases and its correlation with the arterial vascularisation, 82

Artery, middle cerebral
Bilateral temporal-middle cerebral artery anastomosis for moyamoya syndrome, 81
Cerebral blood flow determined by hydrogen clearance during middle cerebral artery occlusion in unanesthetized monkeys, 143
Cerebral revascularization: common carotid to distal middle cerebral artery bypass, 540
Correlation between the clinical picture, the EEG and cerebral blood flow after partial occlusion of the middle cerebral artery in man, 91
Eight-year follow-up of experimental carotid-middle cerebral artery and carotid-basilar arterial bypass grafts and anastomoses, 606
Experimental regional cerebral ischemia in the middle cerebral artery territory in primates. Part 3: effects on brain water and electrolytes in the late phase of acute MCA stroke, 387
A fluorescent histochemical study of changes in noradrenergic neurons following experimental cerebral infarction in the rat, 286
Intracerebellar hematoma following microsurgical STA — cortical MCA bypass surgery, 188
Ipsilateral subclavian to external carotid and STA-MCA bypasses for retinal ischemia, 418
Modification of acute focal ischemia by treatment with mannitol, 4
Non-penetrating trauma to the carotid artery with secondary thrombosis and embolism: treatment by thrombolysis, 83
Observations on moyamoya disease: a case treated with superficial temporal-middle cerebral artery anastomosis, 539
Prevention of cerebral infarction in the monkey by omental transposition to the brain, 224
Reinforcement with gauze wrapping for ruptured aneurysms of the middle cerebral artery, 279
SEM evaluation of endothelial damage following temporary middle cerebral artery occlusion in dogs, 410
Staged intracranial and extracranial revascularization, 283
Superficial temporal-middle cerebral artery anastomosis for internal carotid occlusion, 82

Artery, occipital
The occipital artery. Anatomy-normal arteriographic aspects-embryological significance, 613
Occipital to posterior inferior cerebellar artery bypass surgery, 609
Syndrome of agitated delirium and visual impairment: a manifestation of medial temporal-occipital infarction, 284

Artery, ophthalmic
Direct attack on carotid ophthalmic and large internal carotid aneurysms, 81
Doppler ultrasound and supraorbital photoplethysmography for noninvasive screening of carotid occlusive disease, 85
Relation between ophthalmic artery blood flow and revascularization of occluded carotid artery. Ultrasonic Doppler study, 360

Artery, posterior cerebral
Aneurysms of the posterior cerebral artery. Locations and clinical pictures, 91
The angiographic diagnosis of occlusions of the posterior cerebral artery, 280
Microsurgical anatomy of the posterior cerebral artery, 523

Artery, posterior inferior cerebellar
Occipital to posterior inferior cerebellar artery bypass surgery, 609
Posterior fossa revascularization: anastomosis of vertebral artery to PICA with interposed radial artery graft, 607

Artery, subclavian
Cardiac cycle-dependent alternating flow in vertebral arteries with subclavian artery stenoses, 229
Carotid-axillary bypass: clinical and experimental evaluation, 288
Ipsilateral subclavian to external carotid and STA-MCA bypasses for retinal ischemia, 418

Artery, superficial temporal
Bilateral temporal-middle cerebral artery anastomosis for moyamoya syndrome, 81
Intimal dissection of the superficial temporal artery, 536
Observations on moyamoya disease: a case treated with superficial temporal-middle cerebral artery anastomosis, 539
Superficial temporal-middle cerebral artery anastomosis for internal carotid occlusion, 82

Aspirin
Aspirin, hyperventilation, and cerebellar infarction in sickle cell disease, 407
Controlled trial of aspirin on cerebral ischemia. Part II: surgical group, 309
Editorial: aspirin — effective in males threatened with stroke, 295
Failure of aspirin to prevent postoperative deep vein thrombosis in patients undergoing total hip replacement, 618
Inhibition of platelet prostaglandin synthetase by oral aspirin, 417
Responses of isolated dog cerebral and peripheral arteries to prostaglandins after application of aspirin and polypeptidein phosphate, 490
Studies on platelet plasma membranes. III. Membrane glycoprotein loss from circulating platelets in rabbits: inhibition by aspirin-diprydiamole and acceleration by thrombin, 419
Thromboembolic complications after mitral valve replacement with Hancock xenograft, 612
Treatment of transient ischemic attacks, 299
Trial of aspirin during weaning patients with transient ischaemic attacks from anticoagulants, 617

Atheroma
Internal carotid back pressure, intraoperative shunting, ulcerated atheroma, and the incidence of stroke during carotid endarterectomy, 533
Pathogenesis and prevention of trauma-provoked atheromas, 185
Regression of atheroma in the rabbit, 409

Atherosclerosis
Amaurosis fugax due to isolated atherosclerotic carotid artery disease in a young woman, 422
Biochemical effects of moderate diet and clofibrate on swine atherosclerosis, 608
Carbon monoxide-induced arterial wall hypoxia and atherosclerosis, 614
Comparative angiographic and histological evaluations of intracranial atherosclerosis in hypertensive and normotensive subjects, 364
Detection of atherosclerotic plaques in carotid arteries by the use of 199H-fibrinogen, 416
Diet-induced atherosclerosis and experimental hypertension in stump-tailed macaques (Macaca arctoides). Effects of antihypertensive drugs and a non-atherogenic diet in the evolution of lesions, 610
Editorial: noninvasive techniques for diagnosis of carotid artery disease, 427
Failure of regression of atherosclerosis in dogs with moderate cholesterolemia, 82
Leptomeningeal artery atherosclerosis visualized by angiography: clinical correlates, 262
Morphological effects of moderate diet and clofibrate on swine atherosclerosis, 608
Platelet aggregation in patients with severe atherosclerosis, 541
Prostaglandins and the arterial wall: an avenue for research in the pathogenesis of atherosclerosis (editorial), 287
The rate of atherosclerosis change during treatment of hyperlipoproteinemia, 415
Scintigraphic detection of atherosclerotic lesions and venous...
SUBJECT INDEX

531 Cerebral blood flow in birds: effect of hypoxia, 531

524 Blindness

186 Carotid embolization presenting as total monocular blindness, 186

78 Ipsilateral blindness. A complication of carotid endarterectomy, 78

294 Syndrome of agitated delirium and visual impairment: a manifestation of medial temporo-occipital infarction, 294

344 Blood-brain barrier

354 Effect of an acute increase of the intravascular pressure on the blood-brain barrier, 388

92 Effect of non-respiratory alkalosis on brain tissue and cerebral blood flow in rats with damaged blood-brain barrier, 354

274 Intra-arterial basic dye studies of the blood-CSF and blood-brain barriers, 92

177 Isoproterenol and propranolol: ability to cross the blood-brain barrier and effects on cerebral circulation in man, 344

274 Blood-CSF barrier

183 Intra-arterial basic dye studies of the blood-CSF and blood-brain barriers, 92

274 Blood flow, cerebral

29 Analysis of the effect of bilateral sympathetic stimulation on cerebral and cephalic blood flow in the dog, 29

189 Assessment of regional cerebral blood flow by continuous carotid infusion of krypton-81m, 189

77 An automated cerebral blood flow analyzer: concise communication, 77

153 Autoregulation of cerebral blood flow during early experimental renal hypertension in the conscious dog, 413

413 Barrier and uptake mechanisms in the cerebrovascular response to noradrenaline, 185

277 Time course of the cerebral circulatory response to metabolic depression, 414

123 Xenon enhanced CT for analysis of cerebral integrity, perfusion, and blood flow, 123

287 Balloon catheterization

29 Complete obliteration of a carotid cavernous fistula with sparing of carotid blood flow using a detachable balloon catheter, 607

413 Embolization of cerebral vessels with inflatable and detachable balloons. Technical note, 413

287 Experimental embolization with inflatable and releasable balloons in dogs, 287

277 Systemic vascular responses to increased intracranial pressure. 1. Effects of progressive epidural balloon expansion on intracranial pressure and systemic circulation, 277

285 Baroreceptors

285 Carotid baroreceptor function in hypertensive patients, 285

189 Central depression of carotid baroreceptor pressor response, arterial pressure and heart rate by 5-hydroxytryptophan: influence of supracalicular areas of the brain, 189

189 Circulatory reflexes from carotid and extracarotid baroreceptor areas in man, 186

609 Time course of baroreceptor resetting in short-term hypotension in the rat, 609

382 Betahistine

599 Comparative responses of the carotid and vertebral arterial systems of rhesus monkeys to betahistine, 382

599 Bifurcation, carotid

599 Imaging the carotid bifurcation using continuous-wave Doppler-shift ultrasound and spectral analysis, 465

599 Microsurgical treatment of cerebral aneurysms at the bifurcation of the internal carotid artery, 617

599 A new look at emergency carotid artery operations for the treatment of cerebrovascular insufficiency, 599

599 Ultramicroscopic ulcerations and thrombi of the carotid bifurcation, 274

504 Role of chemical control in dysautoregulation, 504

504 Cerebral blood flow dysautoregulation and the compensatory role of chemical control in dysautoregulation, 504

413 Baboon studies

185 Barrier and uptake mechanisms in the cerebrovascular response to noradrenaline, 185

275 The capacity for computed tomography diagnosis of cerebral infarction. An experimental study in the nonhuman primate, 275

143 Cerebral circulation: effect of stimulation and blockade of dopamine receptors, 177

29 Cerebral circulatory and metabolic effects of 5-hydroxytryptamine in anaesthetized baboons, 183

29 Effect of atropine on cerebrovascular responsiveness to carbon dioxide, 528

29 Extracellular potassium activity, evoked potential and tissue blood flow. Relationships during progressive ischaemia in baboon cerebral cortex, 79

277 Systemic vascular responses to increased intracranial pressure. 2. The 'Cushing' response in the presence of intracranial space-occupying lesions: systemic and cerebral haemodynamic studies in the dog and the baboon, 277

277 Time course of the cerebral circulatory response to metabolic depression, 414

509 Xenon enhanced CT for analysis of cerebral integrity, perfusion, and blood flow, 123

607 Balloon catheterization

607 Complete obliteration of a carotid cavernous fistula with sparing of carotid blood flow using a detachable balloon catheter, 607

413 Embolization of cerebral vessels with inflatable and detachable balloons. Technical note, 413

287 Experimental embolization with inflatable and releasable balloons in dogs, 287

277 Systemic vascular responses to increased intracranial pressure. 1. Effects of progressive epidural balloon expansion on intracranial pressure and systemic circulation, 277

285 Baroreceptors

285 Carotid baroreceptor function in hypertensive patients, 285

189 Central depression of carotid baroreceptor pressor response, arterial pressure and heart rate by 5-hydroxytryptophan: influence of supracalicular areas of the brain, 189

189 Circulatory reflexes from carotid and extracarotid baroreceptor areas in man, 186

609 Time course of baroreceptor resetting in short-term hypotension in the rat, 609

382 Betahistine

599 Comparative responses of the carotid and vertebral arterial systems of rhesus monkeys to betahistine, 382

599 Bifurcation, carotid

599 Imaging the carotid bifurcation using continuous-wave Doppler-shift ultrasound and spectral analysis, 465

599 Microsurgical treatment of cerebral aneurysms at the bifurcation of the internal carotid artery, 617

599 A new look at emergency carotid artery operations for the treatment of cerebrovascular insufficiency, 599

599 Ultramicroscopic ulcerations and thrombi of the carotid bifurcation, 274

504 Role of chemical control in dysautoregulation, 504

504 Cerebral blood flow dysautoregulation and the compensatory role of chemical control in dysautoregulation, 504
Cerebrovascular CO₂ reactivity: role of a cholinergic mechanism modulated by anesthesia, 160
Comparative responses of the carotid and vertebral arterial systems of rhesus monkeys to betahistine, 382
Correlation between the clinical picture, the EEG and cerebral blood flow after partial occlusion of the middle cerebral artery in man, 91
Critical cerebral blood flow for production of hemiparesis after unilateral carotid occlusion in the gerbil, 175
Diffuse cerebral ischemia in the cat: I. Local blood flow during severe ischemia and recirculation, 613
Distribution of cerebral blood flow in the dominant hemisphere during motor ideation and motor performance, 174
Effect of haematocrit on cerebral blood-flow in man, 284
The effect of lesions in the locus coeruleus on the physiological responses of the cerebral blood vessels in cats, 278
Effect of norepinephrine on cerebral blood flow, 182
Effect of non-respiratory alkalosis on brain tissue and cerebral blood flow in rats with damaged blood-brain barrier, 354
Effect of sympathetic nerve stimulation on cerebral blood flow and on large cerebral arteries of dogs, 778
Effect of topically applied serotonin on local cerebral blood flow, 25
Effect on canine cerebral blood flow of two common pressor agents during prolonged halothane anesthesia, 540
The effects of sodium nitroprusside and trimethaphan camsylate on cerebral blood flow in rhesus monkeys, 414
Electromagnetic rheoangiometry: an extension of selective angiography, 409
Ergotamine and cerebral blood flow, 594
Evidence that neural mechanisms do not have important effects on cerebral blood flow, 536
Experimental head injury in the rat. Part 3: cerebral blood flow and oxygen consumption after concussive impact acceleration, 79
Improved method for noninvasive measurement of regional cerebral blood flow by 133Xe inhalation. Part I: description of method and normal values obtained in healthy volunteers, 195
Improved method for noninvasive measurement of regional cerebral blood flow by 133Xe inhalation. Part II: measurements in health and disease, 205
Isoproterenol and propranolol: ability to cross the blood-brain barrier and effects on cerebral circulation in man, 344
Long-term prognosis in stroke related to cerebral blood flow, 285
Measurement of cerebral blood flow with microspheres, 274
Measurement of local cerebral blood flow with iodo [125I] antipyrine, 413
A method for continuous monitoring of pial vessel diameter changes and its value for dynamic studies of the regulation of cerebral circulation. A preliminary report, 534
Observations on simultaneous internal carotid artery and total cerebral blood flow measurements in man, 282
On the theory of an intravenous isotope method for cerebral blood flow measurements, 87
Phenylethylamine and cerebral blood flow. Possible involvement of phenylethylamine in migraine, 173
Rat brain osmolality during barbiturate anesthesia, 185
Role of tissue hypoxia in local regulation of cerebral microcirculation, 621
Spastic constriction of cerebral vessels after electric convulsive treatment, 284
Study of regional cerebral metabolism and blood flow relationships in man using the method of continuously inhaling oxygen-15 and oxygen-15 labelled carbon dioxide, 540
4th Tbilisi Symposium on Brain Blood Supply, 440
A technique for recording local blood flow and neuronal activity with a single microelectrode, 83
Time course of the cerebral circulatory response to metabolic depression, 414
Total and regional cerebral blood flow during hypotension, hypertension, and hypocapnia. Effect of sympathetic denervation in dogs, 178
The validity of an intravenous isotope method for cerebral blood flow measurements. An experimental study, 87
Xenon enhanced CT for analysis of cerebral integrity, perfusion, and blood flow, 123
133Xe inhalation method: significance of indicator maldistribution for distinguishing brain areas with impaired perfusion.
An index for total flow, 57
Blood flow, cortical
Regional cortical blood flow at craniotomy, 603
Blood flow, orbital
Dilated episcleral arteries — a significant physical finding in assessment of patients with cerebrovascular insufficiency, 42
Thrombosis of the intraorbital veins and cavernous sinus, 85
Blood flow, regional cerebral
Chroma-memo-flow technique for rapid sequential analysis of regional cerebral blood flow (rCBF) responses, 538
Compartmental analysis of regional cerebral blood flow in patients with acute severe head injuries, 283
Computed tomographic measurement of the xenon brain-blood partition coefficient and implications for regional cerebral blood flow: a preliminary report, 612
The effect of vincamine on the regional cerebral blood flow in man, 612
Effects of electrical stimulation of superior cervical ganglion on the regional cerebral blood flow, 180
Experimental studies on the neurogenic factors in autoregulation of regional circulation in dogs' brains, 86
Functional responses of the human brain studied by regional cerebral blood flow techniques, 181
Normal and abnormal patterns of cerebrovascular reserve tested by 133Xe inhalation, 603
Regional brain blood flow in the conscious gerbil, 67
Regional cerebral blood flow in stroke patients, 181
Xenon-133 inhalation method for regional cerebral blood flow measurements: normal values and test-retest results, 396
Blood flow, spinal cord
The effect of norpinephrine on the spinal cord circulation and its possible implications in the pathogenesis of acute spinal trauma, 182
An improved technique for measurement of spinal cord blood flow, 620
Measurement of spinal cord blood flow by the microsphere technique, 414
Regulation of total and regional spinal cord blood flow, 79
Blood gases
Arterial blood gases during raised intracranial pressure in anesthetized cats under controlled ventilation, 327
Blood pressure
Effect of an acute increase of the intravascular pressure on the blood-brain barrier, 588
Long term changes in blood pressure and risk of cerebrovascular disease, 319
Predicting risk of ischemic heart disease and cerebrovascular disease from systolic and diastolic blood pressures, 529
Vasoconstrictor effect of angiotensin on pial arterioles, 487
Blood volume, cerebral
Cerebral blood flow, oxygen utilization, and blood volume in dementia, 185
Measurement of mean circulatory filling pressure and vascular capacitance in the rat, 414
Blood, whole
Prevention of persistent cerebral smooth muscle contraction in response to whole blood, 472
Body temperature
Effects of reduced regional or body temperatures on responses of pial arterioles, 580
Brain damage
Electroencephalographic prediction of anoxic brain damage after resuscitation from cardiac arrest in patients with acute myocardial infarction, 543
Brain death
Computerized axial tomography in brain death, 597
Brain stem
Arteriovenous malformations of the brain stem in childhood, 175
Embolization of an arteriovenous malformation of the brain stem, 81
Surgical treatment of arteriovenous angiomas localised in the corpus callosum, basal ganglia and near the brain stem, 542

Bruit, carotid
The asymptomatic bruit, 288
The asymptomatic carotid bruit and the ocular pneumoplethysmography, 274
The asymptomatic carotid bruit — operate or not? 269
The bruit of carotid stenosis versus radiated basal heart murmur. Differentiation by phonoangiography, 606
Carotid bruits: their significance in the cervical radicular syndrome, 280
Questions arising in carotid bruit, Letter, 523
The significance of asymptomatic unilateral carotid bruits in preoperative patients, 610
Supraclavicular and carotid bruits in hemodialysis patients, 407

Bypass surgery
Bypass in carotid siphon disease. Letter and response, 76
Carotid-axillary bypass: clinical and experimental evaluation, 288
Cerebral revascularization: common carotid to distal middle cerebral artery bypass, 540
Concomitant coronary artery bypass and major noncardiac surgery, 534
Eight-year follow-up of experimental carotid-middle cerebral and carotid-basilar arterial bypass grafts and anastomoses, 606
Extracranial-intracranial bypass in experimental cerebral infarction in dogs, 461
Intracerebellar hematoma following microsurgical STA — cortical MCA bypass surgery, 188
Intracranial bypass grafts for vertebral-basilar ischemia, 283
Epsilateral subclavian to external carotid and STA-MCA bypasses for retinal ischemia, 418
Microvascular anastomosis for cerebral ischemia in 19 patients: a preliminary report, 538
Occipital to posterior inferior cerebellar artery bypass surgery, 609
A planned approach to coexistent cerebrovascular disease in coronary artery bypass candidates, 274
Planned extra-anatomic cerebral revascularization for carotid artery ligation, 534
Results of microsurgical extra-intracranial arterial bypass in the treatment of cerebral ischemia, 180
Staged intracranial and extracranial revascularization, 285

C
Carbon dioxide
Cerebrovascular CO₂ reactivity: role of a cholinergic mechanism modulated by anesthesia, 160
Effect of atropine on cerebrovascular responsiveness to carbon dioxide, 528
Hyperemia, CO₂ responsiveness, and autoregulation in the white matter following experimental spinal cord injury, 413

Cardiac arrest
Cerebral blood flow and metabolism in man following cardiac arrest, 569
Electroencephalographic prediction of anoxic brain damage after resuscitation from cardiac arrest in patients with acute myocardial infarction, 543
Neurologic status and prognosis after cardiopulmonary arrest: I. A Retrospective study, 175
Neurological syndromes after cardiac arrest, 517

Cardiovascular disorders
Experimental cerebrovascular disorders: effects of papaverine and theophylline, 179
Experimental cerebrovascular disorders: effects on cardiovascular functions and on cerebrospinal fluid production and constituents with special reference to cyclic AMP, 187

Carotid defects
Disappearing carotid defects, 258
Carotid siphon disease
Bypass in carotid siphon disease. Letter and response, 76
Carotidynia
Carotidynia, 286

Cat studies
Arterial blood gases during raised intracranial pressure in anesthetized cats under controlled ventilation, 527
Cerebral microembolization. I. Morphological studies, 611
Diffuse cerebral ischemia in the cat: I. Local blood flow during severe ischemia and recirculation, 615
The effect of lesions in the locus coeruleus on the physiological responses of the cerebral blood vessels in cats, 278
Effects of 5-hydroxytryptamine on pial arteriolar calibre in anesthetized cats, 183
Experimental cerebrovascular disorders: effects on cardiovascular functions and on cerebrospinal fluid production and constituents with special reference to cyclic AMP, 187
Hyperemia, CO₂ responsiveness, and autoregulation in the white matter following experimental spinal cord injury, 413
Influence of head position on the prognosis of experimental subarachnoid hemorrhage, 535
Modification of acute focal ischemia by treatment with manitol, 4
Neurogenic vasodilation of cat cerebral arteries, 541
Pharmacological analysis of 5-hydroxytryptamine receptors in isolated intracranial and extracranial vessels of cat and man, 408
Potentiation and antagonism of serotonin effects on intracranial and extracranial vessels. Possible implications in migraine, 412
Responses of cerebral arteries and arterioles to acute hypotension and hypertension, 621
Role of tissue hypoxia in local regulation of cerebral microcirculation, 627
Spastic constriction of cerebral vessels after electric convulsive treatment, 284
Ultrastructural changes in feline arterial endothelium following cerebral ischemia, 418
Vascular spasm in cat cerebral cortex following ischemia, 52
Vasoconstrictor effect of angiotensin on pial arteries, 487

Catheterization
Bilateral cerebral angiography with catheterization of only one carotid artery, 417
Complete obliteration of a carotid cavernous fistula with sparing of the carotid blood flow using a detachable balloon catheter, 607
Embolization of cerebral vessels with inflatable and detachable balloons. Technical note, 413
Experimental embolization with inflatable and releasable balloons in dogs, 287
The intra-arterial injection of Iskedyl for hyperselective vascular exploration, 180
Systemic vascular responses to increased intracranial pressure. I. Effects of progressive epidural balloon expansion on intracranial pressure and systemic circulation, 277

Cavernous sinus
Cavernous angiomis of the brain. Account of fourteen personal cases and review of the literature, 542
Ischemic optic neuropathy in cavernous sinus thrombosis, 529
Meningiomas and aneurysms of the cavernous sinus. Neuroophthalmologic features, 532
Thrombosis of the intracavernous veins and cavernous sinus, 85

Cerebral amyloid angiopathy
Fatal massive intracerebral hemorrhage complicating cerebral amyloid angiopathy, 535

Cerebrospinal fluid
Brain monoamine metabolites and tryptophan in ventricular CSF of patients with spasm after aneurysm surgery, 410
Experimental cerebrovascular disorders: effects on cardiovascular functions and on cerebrospinal fluid production and constituents with special reference to cyclic AMP, 187
Fibrinolytic activity in blood and cerebrospinal fluid in subarachnoid hemorrhage from ruptured intracranial saccular aneurysm before and during EACA treatment, 612
Influence of several plasma fractions on post-ischemic micro-
vascular reperfusion in the central nervous system, 375
Measurement of prostaglandin E2 in cerebrospinal fluid in patients suffering from stroke, 281
Re-evaluation of cerebrospinal fluid dynamics after subarachnoid hemorrhage with computed tomography and radio-nuclide cisternography, 287
Transient spastic paraparesis following abdominal aortography: management with cerebrospinal fluid lavage, 537
Cerebrovascular disease
Cerebrovascular complications of sickle cell anemia, 73
Cerebrovascular disease in sickle cell anemia: a clinical, pathological and radiological correlation, 45
Cerebrovascular incidents after myocardial infarction, 281
Conjunctival microangiopathy. An early sign of degenerative vascular disease? 86
Detecting extracranial cerebrovascular disease with noninvasive techniques, 411
Dilated episcleral arteries — a significant physical finding in assessment of patients with cerebrovascular insufficiency, 42
Experimental cerebrovascular disorders: effects on cardiovascular functions and on cerebrospinal fluid production and constituents with special reference to cyclic AMP, 187
Extracranial-to-intracranial vascular anastomosis for occlusive cerebrovascular disease: experience in 110 patients, 275
Importance of the external carotid artery in extracranial cerebrovascular occlusive disease, 88
Long term changes in blood pressure and risk of cerebrovascular disease, 319
A new look at emergency carotid artery operations for the treatment of cerebrovascular insufficiency, 599
Noninvasive methods for evaluation of extracranial cerebrovascular disease. A comparison, 78
Non-invasive regional study of chronic cerebrovascular disorders using the oxygen-15 inhalation technique, 415
Normal serum-cholesterol but low H.D.L.-cholesterol concentration in young patients with ischaemic cerebrovascular disease, 529
A planned approach to coexistent cerebrovascular disease in patients suffering from stroke, 537
Noninvasive methods for evaluation of extracranial cerebrovascular disease. A comparison, 78
Predicting risk of ischemic heart disease and cerebrovascular disease from systolic and diastolic blood pressures, 529
The role of platelets in myocardial infarction, ischaemic heart disease, cerebrovascular disease, thromboembolic disorders and acute idiopathic pericarditis, 420
Serum lipids, platelets, and fibrinolytic activity in cerebrovascular disease, 137
Spontaneous platelet aggregation in cerebrovascular disease, 540
Strokes in children and adolescents, 169
Summary of 11th Princeton Conference on Cerebrovascular Disease, 429
Trends in mortality from cerebrovascular diseases in the United States, 1960 to 1975, 549
Chemodenervation
Cerebral circulatory responses to arterial hypoxia in normal and chemonedevanated dogs, 621
Chemotherapy
Transient cerebral dysfunction following chemotherapy for osteogenic sarcoma, 607
Children
Arteriovenous malformations of the brain stem in childhood, 175
Basilar artery migraine. A review of 30 cases, 531
Cerebral arteriovenous malformations in children, 519
Intracranial aneurysms in early childhood, 536
Intracranial arterial aneurysms in infancy and childhood, 85
Intracranial arteriovenous malformations in childhood, 539
Intracranial saccular aneurysms in the first three decades, 608
Moyamoya disease in children, 530
Occlusive arterial disease of the child and young adult. Clinical electroencephalographical analysis of 26 cases, 422
Saccular aneurysm of infancy and early childhood, 414
A sign of subarachnoid bleeding on cranial computed tomograms of pediatric head trauma patients, 416
Strokes in children and adolescents, 169
Subarachnoid hemorrhage in children, 422
Traumatic vertebral occlusive disease in childhood, 416
Cholesterol
Cholesterol levels
Biochemical effects of moderate diet and clofibrate on swine atherosclerosis, 608
Cigarette smoking and HDL cholesterol. The Framingham Offspring Study, 614
Morphological effects of moderate diet and clofibrate on swine atherosclerosis, 608
Normal serum-cholesterol but low H.D.L.-cholesterol concentration in young patients with ischaemic cerebrovascular disease, 529
Scanning electron microscope studies of rabbit aortic endothelium in areas of haemodynamic stress during induction of fatty streaks, 620
Cholesterolemia
Failure of regression of atherosclerosis in dogs with moderate cholesterolemia, 82
Clofibrate
Biochemical effects of moderate diet and clofibrate on swine atherosclerosis, 608
Morphological effects of moderate diet and clofibrate on swine atherosclerosis, 608
Coagulation, intravascular
Cerebral involvement with disseminated intravascular coagulation in intestinal disease, 77
Complication
Acute neurological complications after liver transplantation with particular reference to intraoperative cerebral air embolus, 437
Anticoagulant therapy and central nervous system complications in patients with prosthetic valve endocarditis, 606
Complications of cerebral angiography, 416
Complications of cerebral angiography and pneumography, 186
Late complications of prosthetic heart valves, 608
Moyamoya syndrome as a complication of radiation therapy, Case report, 609
Thromboembolic complications after mitral valve replacement with Hancock xenograft, 612
Transient cerebral dysfunction following chemotherapy for osteogenic sarcoma, 607
Computerized tomography
Benign cerebellar hemorrhages, 539
The capacity for computed tomography diagnosis of cerebral infarction. An experimental study in the nonhuman primate, 275
Cerebellar hemorrhage in adults. Diagnosis by computerized tomography, 526
Computed angiotomography, 175
Computed tomographic appearance of presumed septic cerebral embolism, 407
Computed tomographic measurement of the xenon brain-blood partition coefficient and implications for regional cerebral blood flow: a preliminary report, 612
Computed tomography and radionuclide imaging in the evaluation of ischaemic stroke, 590
Computed tomography and subarachnoid hemorrhage, 174
Computed tomography in intracerebral hemorrhage, 81
Computed tomography in the evaluation of subdural hematomas, 411
Computed tomography in “Moya-Moya”: summary of 16 cases, 277
Computed-tomography of bilateral isodense chronic subdural hematomas, 287
Computed tomography of intracerebral hematomas. I. Transmission CT observations on hematoma resolution, 174
Computed tomography of intracerebral hematomas. II. Radionuclide and transmission CT studies of the perihematoma region, 174
Computed tomography of ruptured intracranial aneurysm in acute stage, 188
Computerized axial tomography in brain death, 597
Computerized cranial tomography. Effect on diagnostic and therapeutic plans, 84
Coronal and sagittal reconstruction in computerised tomography, 418
Diagnosis of isodense subdural hematomas by computed tomography, 175
Diagnosis of subdural haematoma by computed axial tomography. Use of xenon inhalation for contrast enhancement, 613
The effect of size, histologic elements, and water content on the visualization of cerebral infarcts. A computerized cranial tomographic study, 407
Emission computed tomography, 606
Evaluation of recent cerebral infarction by computerized tomography, 80
Evaluation of the age of subdural hematomas by computerized tomography, 88
An evaluation of transverse axial emission tomography of the brain in the clinical situation, 83
Impact of computed tomography on utilization of cerebral angiograms, 88
Intracranial, extracerebral hematomas. Computed tomographic appearances, 536
Intracranial tumors simulating the presentation of cerebrovascular syndromes. Early detection with cerebral computed tomography (CCT), 283
Intracranial venous sinus thrombosis: diagnosis suggested by computed tomography, 619
Multiple intracranial aneurysms: identifying the ruptured lesion, 608
Re-evaluation of cerebrospinal fluid dynamics after subarachnoid hemorrhage with computed tomography and radio-nuclide cisternography, 287
Resolving intracerebral hematoma: alteration of the "ring sign" with steroids, 607
Scintigraphic detection of congenital intracranial vascular malformations, 622
A sign of subarachnoid bleeding on cranial computed tomograms of pediatric head trauma patients, 416
Spontaneous closure of cerebral arteriovenous malformation demonstrated by angiography and computed tomography, 614
The usefulness of CT scanning for subdural hematomas, 282
Xenon enhanced CT for analysis of cerebral integrity, perfusion, and blood flow, 123
Congenital disorders
Cerebral hamartoma mimicking the angiographic appearance of congenital fusiform aneurysm, 84
Hereditary multi-infarct dementia. Morphological and clinical studies of a new disease, 179
Strokes in children and adolescents, 169
Congophilic angiopathy
Congophilic angiopathy and cerebral hemorrhage, 608
Conjunctival microangiopathy
Conjunctival microangiopathy. An early sign of degenerative vascular disease? 86
Contraceptive, oral
Mortality among oral-contraceptive users, 182
Mortality among women participating in the Oxford/Family Planning Association contraceptive study, 182
Platelet changes in women taking oral contraceptives, 77
Contrast material
Cerebral angiography with non-ionic (metrizamide) and ionic (meglumine metrizoate) watersoluble contrast media. A comparative study with double blind technic, 179
Transient spastic paraparesis following abdominal aortography: management with cerebrospinal fluid lavage, 537
Cortical evoked potential
Extracellular potassium activity, evoked potential and tissue blood flow. Relationships during progressive ischaemia in baboon cerebral cortex, 79
Craniorhaphy
Large decompressive craniotomy in the treatment of acute subdural hematoma, 622
Regional cortical blood flow at craniotomy, 605
Creatine kinase
Myocardial creatine kinase isoenzyme in serum after subarachnoid haemorrhage, 182
Cryogenic injury
Cerebral blood flow in the monkey after focal cryogenic injury, 509
Cushing response
Systemic vascular responses to increased intracranial pressure. 2. The 'Cushing' response in the presence of intracranial space-occupying lesions: systemic and cerebral haemodynamic studies in the dog and the baboon, 277
Cyanoacrylate
Intraarterial cyanoacrylate: an adjunct in the treatment of spinal/paraspinal arteriovenous malformations, 410
Cyclic AMP
Early estimation of extent of the lesion in cerebral infarction by means of cyclic AMP concentration in peripheral venous plasma, 189
Experimental cerebrovascular disorders: effects on cardiovascular functions and on cerebrospinal fluid production and constituents with special reference to cyclic AMP, 187

D
Dementia
Syndrome of agitated delirium and visual impairment: a manifestation of medial temporo-occipital infarction, 284

Diet
Biochemical effects of moderate diet and clofibrate on swine atherosclerosis, 608
Diet-induced atherosclerosis and experimental hypertension in stump-tailed macaques (Macaca arctoides). Effects of antihypertensive drugs and a non-atherogenic diet in the evolution of lesions, 610
Morphological effects of moderate diet and clofibrate on swine atherosclerosis, 608
Dihomo-gamma-linolenic acid
Antithrombotic potential of dihomo-gamma-linolenic acid in man, 284

Dissection, spontaneous
Spontaneous dissection of cervico-cerebral arteries, 538

Dog studies
Analysis of the effect of bilateral sympathetic stimulation on cerebral and cephalic blood flow in the dog, 29
Auto-regulation of cerebral blood flow during early experimental renal hypertension in the conscious dog, 413
Cerebral blood flow and oxygen consumption in the newborn dog, 609
Cerebral circulatory responses to arterial hypoxia in normal and chemodenervated dogs, 621
Total and regional cerebral blood flow during hypotension, hypertension, and hypocapnia. Effect of sympathetic denervation in dogs, 178

Diosmin
Cerebral circulatory responses to arterial hypoxia in normal and chemodenervated dogs, 621

Downloaded from http://stroke.ahajournals.org/ by guest on November 7, 2016
Effect of ornithine alpha ketoglutarate (OAKG) on the response of brain metabolism to hypoxia in the dog, 222
Effect of sympathetic nerve stimulation on cerebral blood flow and on large cerebral arteries of dogs, 178
Effects of anticoagulants in an animal model of septic cerebral embolization, 573
Effects of procainamide and chlorpromazine on acute vasospasm, 281
Eight-year follow-up of experimental carotid-middle cerebral and carotid-basilar arterial bypass grafts and anastomoses, 606
Electromagnetic rheoangiometry: an extension of selective angiography, 409
Experimental cerebral infarction. Part 1: production of thalamic infarction in dogs, 211
Experimental cerebral infarction. Part 2: electroencephalographic changes produced by experimental thalamic infarction in dogs, 214
Experimental cerebral infarction. Part 3: protective effect of mannitol in thalamic infarction in dogs, 217
Experimental embolization with inflatable and releasable balloons in dogs, 287
Experimental extracranial-intracranial anastomosis, 176
Extracranial-intracranial bypass in experimental cerebral infarction in dogs, 461
Failure of regression of atherosclerosis in dogs with moderate cholestroleremia, 82
Indomethacin prevents impaired perfusion of the dog's brain after global ischemia, 591
Influence of several plasma fractions on post-ischemic microvascular reperfusion in the central nervous system, 375
Intercellular granules and vesicles in prolonged cerebral vasospasm, 412
Metabolic profiles of canine cerebrovascular tree: a histochemical study, 165
A model study of why some intracranial aneurysms thrombose but others rupture, 583
Pathogenesis and prevention of trauma-provoked atheromas, 183
Prolonged contraction of isolated human and canine cerebral arteries induced by uridine 5'-triphosphate, 133
Radioiodinated fibrinogen for clot detection in a canine model of cervical carotid thrombosis, 543
Responses of isolated dog cerebral and peripheral arteries to prostaglandins after application of aspirin and polypehloretin phosphate, 490
SEM evaluation of endothelial damage following temporary middle cerebral artery occlusion in dogs, 410
Systemic vascular responses to increased intracranial pressure. 1. Effects of progressive epidural balloon expansion on intracranial pressure and systemic circulation, 277
Systemic vascular responses to increased intracranial pressure. 2. The 'Cushing' response in the presence of intracranial space-occupying lesions: systemic and cerebral haemodynamic studies in the dog and the baboon, 277
Total and regional cerebral blood flow during hypotension, hypertension, and hypocapnia. Effect of sympathetic denervation in dogs, 178
Imaging the carotid bifurcation using continuous-wave Doppler-shift ultrasound and spectral analysis, 465
Noninvasive assessment of collateral blood flow of the cerebral hemisphere by Doppler ultrasound, 418
Relationship between ophthalmic artery blood flow and revascularization of occluded carotid artery, Ultrasonic Doppler study, 360
Dose dependency
Dose dependency of the post-insult protective effect of pentobarbital in the canine experimental stroke model, 10
Dose dependent reduction of glucose utilization by pentobarbital in rat brain, 12
Drug addiction
Spinal cord vasculitis presenting as a spinal cord tumor in a heroin addict. Case report, 410
Drug therapy
Biochemical effects of moderate diet and clofibrate on swine atherosclerosis, 608
Cerebral hemorrhage from a mycotic aneurysm developing during appropriate antibiotic therapy, 267
Controlled trial of aspirin on cerebral ischemia. Part II: surgical group, 309
Controlled trial of ornithine alpha ketoglutarate (OAKG) in patients with stroke, 218
Diet-induced atherosclerosis and experimental hypertension in stump-tailed macaques (Macaca arctoides). Effects of antihypertensive drugs and a non-atherogenic diet in the evolution of lesions, 610
Dose dependency of the post-insult protective effect of pentobarbital in the canine experimental stroke model, 10
Editorial: aspirin — effective in males threatened with stroke, 295
Intracranial hemorrhage and infarction in anticoagulated patients with prosthetic heart valves, 18
Modification of acute focal ischemia by treatment with mannitol, 4
Morphological effects of moderate diet and clofibrate on swine atherosclerosis, 608
Responses of isolated dog cerebral and peripheral arteries to prostaglandins after application of aspirin and polypehloretin phosphate, 490
Transient focal cerebral ischemia after extreme exercise, 84
Dysautoregulation
Cerebral hemodynamics in Shy-Drager syndrome. Variability of cerebral blood flow dysautoregulation and the compensatory role of chemical control in dysautoregulation, 504

E

Echocardiography
Left ventricular myxoma. Echocardiographic diagnosis and review of the literature, 279
Echocoecephalography
Correlation between the clinical picture, the EEG and cerebral blood flow after partial occlusion of the middle cerebral artery in man, 91
Real time ultrasound tomography of the adult brain, 117
Edema
Effect of DPPD (diphenyl-para-phenylenediamine) on stroke and cerebral edema in gerbils, 480
Electrocardiography
Sympathetic nervous system activity in patients with subarachnoid hemorrhage, 237
Electroencephalography
Basilar migraine, seizures, and severe epileptiform EEG abnormalities. A relatively benign syndrome in adolescents, 605
Electroencephalographic prediction of anoxic brain damage after resuscitation from cardiac arrest in patients with acute myocardial infarction, 543
Experimental cerebral infarction. Part 2: electroencephalographic changes produced by experimental thalamic infarction in dogs, 214
**SUBJECT INDEX**

### Embolism
Acute neurological complications after liver transplantation with particular reference to intraoperative cerebral air embolus, 537
Arterial embolism in thyrotoxicosis with atrial fibrillation, 178
Carotid embolization presenting as total monocular blindness, 186
Cerebral arterial lesions resulting from inflammatory emboli, 498
Cerebral microembolization. I. Pathophysiological studies, 274
Cerebral microembolization. II. Morphological studies, 611
Computed tomographic appearance of presumed septic cerebral embolism, 407
Effects of anticoagulants in an animal model of septic cerebral embolization, 573
Embolism in sinoatrial disease, 543
Embolism to the central nervous system from cardiac myxoma. Report of two cases, 279
Embolization of an arteriovenous malformation of the brain stem, 81
Embolization of cerebral vessels with inflatable and detachable balloons. Technical note, 413
Evidence of silent cerebral embolism in patients with amaurosis fugax, 176
Experimental embolization with inflatable and releasable balloons in dogs, 287
Free percutaneous embolization of a traumatic carotid-cavernous fistula, 539
Incidence of emboli with cloth-covered Starr-Edwards valve without anticoagulation and with varying forms of anticoagulation. Analysis of 183 patients followed for 3½ years, 416
Influence of etiology of atrial fibrillation on incidence of systemic embolism, 184
Non-penetrating trauma to the carotid artery with secondary thrombosis and embolism: treatment by thrombolysis, 83
Polyvinyl alcohol foam: prepackaged emboli for therapeutic embolization, 620
Prevention of arterial thromboembolism with acetylsalicylic acid. A controlled clinical study in patients with aortic ball valves, 84
“Stump” of internal carotid artery — a source for further cerebral embolic ischemia, 448
Thromboembolic complications in coronary angiography. Prevention with acetylsalicylic acid, 417

### Endarterectomy, carotid
Carotid endarterectomy: is an indwelling shunt necessary? 185
Carotid endarterectomy: mortality rate. Letter, 172
Carotid endarterectomy. Temporal profile of the healing process and effects of anticoagulation therapy, 412
Cluster headache, hemianopia, and other head pains: morbidity of carotid endarterectomy, 559
Concomitant coronary artery bypass and major noncardiac surgery, 334
Early restenosis after carotid endarterectomy, 529
The finding of thrombus at carotid endarterectomy and its relationship to the timing of surgery, 181
Improved results with carotid endarterectomy, 181
Internal carotid back pressure, intraoperative shunting, ulcerated atheromatous plaque, and the incidence of stroke during carotid endarterectomy, 533
Intracerebral hemorrhage following carotid endarterectomy: a hypertensive complication? 457
Ipsilateral blindness. A complication of carotid endarterectomy, 78
A new look at emergency carotid artery operations for the treatment of cerebrovascular insufficiency, 599
Noninvasive assessment of collateral blood flow of the cerebral hemisphere by Doppler ultrasound, 418
Routine operative arteriography during carotid endarterectomy: a reassessment, 411
Stroke associated with carotid endarterectomy, 421
Ultramicroscopic ulcerations and thrombi of the carotid bifurcation, 274
The value of carotid endarterectomy in treating transient cerebral ischemia of the posterior circulation, 80

### Endarterectomy, innominate
Innominate artery endarterectomy. A 16-year experience, 274

### Endocarditis
Anticoagulant therapy and central nervous system complications in patients with prosthetic valve endocarditis, 606
Cerebral hemorrhage from a mycotic aneurysm developing during appropriate antibiotic therapy, 267
Intracranial hemorrhage and infarction in anticoagulated patients with prosthetic heart valves, 18
Multiple mycotic aneurysms due to candida endocarditis, 85

### Endothelium
Modification of acute focal ischemia by treatment with mannitol, 4
Scanning electron microscope studies of rabbit aortic endothelium in areas of haemodynamic stress during induction of fatty streaks, 620
A scanning electron microscopic study of arterial endothelial cells using vascular casts, 409
SEM evaluation of endothelial damage following temporary middle cerebral artery occlusion in dogs, 410
Thrombus formation and endothelial alterations in microarterial anastomoses, 89
Ultrastructural changes in feline arterial endothelium following subarachnoid hemorrhage, 410

### Enzyme
Enzyme activity of the brain: microvessels vs. total forebrain homogenate, 289

### Epidemiological studies
Epidemiological studies on patients with a persistent vegetative state, 204

### Epilepsy
Cavernous angiomas of the brain. Account of fourteen personal cases and review of the literature, 542
Unruptured intracranial aneurysms — an unusual source of epilepsy, 542

### Epinephrine
Sympathetic nervous system activity in patients with subarachnoid hemorrhage, 237

### Ergotamine
Ergotamine and cerebral blood flow, 594

### Erythrocytes
Erythrocytes: Prolonged vasospasm produced by the breakdown products of erythrocytes, 89

### Estrogen
Estrogen: Platelet changes in women taking oral contraceptives, 77

### Experimental studies
Acute cerebrovascular and myocardial ischemia superimposed upon chronically hypertensive and arteriosclerotic male Sprague-Dawley rats, 183
Acute tissue response to cerebral ischemia in the gerbil. An ultrastructural study, 83
Analysis of the effect of bilateral sympathetic stimulation on cerebral and cephalic blood flow in the dog, 29
Autoregulation of cerebral blood flow during early experimental renal hypertension in the conscious dog, 413
Barrier and uptake mechanisms in the cerebrovascular response to noradrenaline, 185
Biochemical effects of moderate diet and clofibrate on swine atherosclerosis, 608
Blood flow and oxygen consumption of the focally traumatized monkey brain, 92
Brain blood flow autoregulation and metabolism during halothane anesthesia in monkeys, 412
Brain metabolism and arterial acid-base balance following bilateral carotid occlusion in normotensive and experimental hypertensive rats, 538
The capacity for computed tomography diagnosis of cerebral...

</table>
Neurogenic vasodilation of cat cerebral arteries, 541
Pathogenesis and prevention of trauma-provoked atheromas, 185
Potentiation and antagonism of serotonin effects on intracranial and extracranial vessels. Possible implications in migraine, 412
Prevention of cerebral infarction in the monkey by omental transposition to the brain, 224
Prolonged contraction of isolated human and canine cerebral arteries induced by uridine 5'-triphosphate, 133
Radiiodinated fibrinogen for clot detection in a canine model of cervical carotid thrombosis, 545
Regional brain blood flow in the conscious gerbil, 67
Regression of arteriole in the rabbit, 409
Responses of cerebral arteries and arterioles to acute hypotension and hypertension, 621
Responses of isolated dog cerebral and peripheral arteries to proglastaglinands after application of aspirin and polyphloretin phosphate, 490
The role of hemodynamic factors in arterial wall thickening in the rat, 620
Role of tissue hypoxia in normal regulation of cerebral microcirculation, 621
Scanning electron microscope studies of rabbit aortic endothelium in areas of haemodynamic stress during induction of fatty streaks, 620
Sequencial cerebral biochemical and physiological events in controlled hypoxemia, 183
Spastic constriction of cerebral vessels after electric convulsive treatment, 284
Studies on platelet plasma membranes. III. Membrane glycoprotein loss from circulating platelets in rabbits: inhibition by aspirin-dipyridamole and acceleration by thrombin, 419
Systemic vascular responses to increased intracranial pressure. 1. Effects of progressive epidural balloon expansion on intracranial pressure and systemic circulation, 277
Systemic vascular responses to increased intracranial pressure. 2. The 'Cushing' response in the presence of intracranial space-occupying lesions: systemic and cerebral haemodynamic studies in the dog and the baboon, 277
Time course of baroreceptor resetting in short-term hypotension in the rat, 609
Time course of the cerebral circulatory response to metabolic depression, 414
Total and regional cerebral blood flow during hypotension, hypertension, and hypoxemia. Effect of sympathetic denervation in dogs, 178
Treatment of experimental cerebral infarction in rats with levodopa or with glycerol, 609
Ultrastuctural evidence for central monoaminergic innervation of blood vessels in the periventricular nucleus of the hypothalamus, 289
An ultrastructural study of developing cerebral infarction following bilateral carotid artery occlusion in spontaneously hypertensive rats, 280
Vascular spasm in cat cerebral cortex following ischemia, 52
Vasoconstrictor effect of angiotensin on pial arteries, 487
Xenon enhanced CT for analysis of cerebral integrity, perfusion, and blood flow, 123
Extracellular potassium activity
Extracellular potassium activity, evoked potential and tissue blood flow. Relationships during progressive ischemia in baboon cerebral cortex, 79

F
Fainting
The mechanism of orthostatic and haemorrhagic fainting, 87
Fiberoptics
The use of a fiberoptic intracranial pressure monitor in clinical practice, 282
Fibrillation, atrial
Arterial embolism in thyrotoxicosis with atrial fibrillation, 178

G
Ganglion, superior cervical
Cerebral blood flow and vascular reactivity after removal of the superior cervical sympathetic ganglion in the goat, 178
Effects of electrical stimulation of superior cervical ganglion on the regional cerebral blood flow, 180
Gerbil studies
Acute tissue response to cerebral ischemia in the gerbil. An ultrastructure study, 82
Critical cerebral blood flow for production of hemiparesis after unilateral carotid occlusion in the gerbil, 175
Effect of aminophylline on cerebral infarction in the mongolian gerbil, 477
Effect of DPPD (diphenyl-para-phenylenediamine) on stroke and cerebral edema in gerbils, 480
Effect on canine cerebral blood flow of two common pressor agents during prolonged halothane anesthesia, 540
Experimental stroke in gerbils: correlation of clinical, pathological and electroencephalographic findings and protein synthesis, 155
Ischemia-induced seizures and cortical monoamine levels, 527
Regional brain blood flow in the conscious gerbil, 67

Giant-cell arteritis
Angiographic findings in giant cell arteritis, 90
Anterior segment ischemia in temporal arteritis, 417
Intracranial involvement of giant-cell arteritis, 77

Glucose utilization
Dose dependent reduction of glucose utilization by pentobarbital in rat brain, 12
Local cerebral glucose uptake in awake and halothane-anesthetized primates, 419
Local glucose utilization in acute focal cerebral ischemia: local dysmetabolism and diaschisis, 277
Glycerol

Intravenous glycerol in cerebral infarction: a controlled 4-month trial, 484
Treatment of experimental cerebral infarction in rats with levodopa or with glycerol, 609

Goat studies

Cerebral blood flow and vascular reactivity after removal of the superior cervical sympathetic ganglion in the goat, 178

Graft

Cerebral revascularization: common carotid to distal middle cerebral artery bypass, 540
Dynamic compliance of arterial grafts, 283
Eight-year follow-up of experimental carotid-middle cerebral and carotid-basilar arterial bypass grafts and anastomoses, 606
Intracranial bypass grafts for vertebral-basilar ischemia, 283
Occipital to posterior inferior cerebellar artery bypass surgery, 609
Pathologic findings in the aortocoronary vein grafts. A scanning electron microscope study, 417
Posterior fossa revascularization: anastomosis of vertebral artery to PICA with interposed radial artery graft, 607

Granulomatous angitis

Cerebral granulomatosus angitis: case report and literature review, 174
Giant cell granulomatosus angitis of the central nervous system, 88

H

Halothane

Brain blood flow autoregulation and metabolism during halothane anesthesia in monkeys, 412
Cerebral blood flow and metabolic changes from induction to onset of anesthesia with halothane or pentobarbital, 179
Effect on canine cerebral blood flow of two common pressor agents during prolonged halothane anesthesia, 540
Local cerebral glucose uptake in awake and halothane-anesthetized primates, 419

Hancock xenograft

Thromboembolic complications after mitral valve replacement with Hancock xenograft, 612

Hematoma

Cerebral hemorrhoma mimicking the angiographic appearance of congenital fusiform aneurysm, 84

Headache, migraine

Basilar artery migraine. A review of 30 cases, 531
Basilar migraine, seizures, and severe epileptiform EEG abnormalities. A relatively benign syndrome in adolescents, 605
Bilateral retinal hemorrhages and disk edema in migraine, 189
Brief therapeutic report: papaverine prophylaxis of complicated migraine, 177
Cerebral blood flow in migraine, 177
Cerebral hemodynamics in migraine, 276
Phenylethylamine and cerebral blood flow. Possible involvement of phenylethylamine in migraine, 173
Platelet aggregability in migraine, 185
Potentiation and antagonism of serotonin effects on intracranial and extracranial vessels. Possible implications in migraine, 412
Transient cerebral ischemia and brain serotonin: relevance to migraine, 177
Transient platelet monoamine oxidase deficit in migraine: some reflections, 186

Headache, postoperative

Cluster headache, hemicrania, and other head pains: morbidity of carotid endarterectomy, 559

Heart murmur

The bruit of carotid stenosis versus radiated basal heart murmurs. Differentiation by phonoangiography, 606

Heart rate

Central depression of carotid baroreceptor pressor response, arterial pressure and heart rate by 5-hydroxytryptophan: influence of supracallosal areas of the brain, 189

Hematoma

Cerebral hemorrhage from a myotic aneurysm developing during appropriate antibiotic therapy, 267
Chronic intracerebral hematoma, 540
Common carotid artery stenosis due to subintimal hematoma following blunt trauma to the neck. Report of a case, 84
Computed tomography in the evaluation of subdural hematomas, 411
Computed tomography of intracerebral hematomas. I. Transmission CT observations on hematoma resolution, 174
Computed tomography of intracerebral hematomas. II. Radionuclide and transmission CT studies of the perihematoma region, 174
Computed-tomography of bilateral isodense chronic subdural hematomas, 287
Controlled subtotal evacuation of intracerebral haematomas by stereotactic technique, 418
Diagnosis of isodense subdural hematomas by computed tomography, 175
Diagnosis of subdural hematoma by computed axial tomography: use of xenon inhalation for contrast enhancement, 613
Epidural hematoma of the posterior fossa: radionuclide features, 530
Evaluation of the age of subdural hematomas by computerized tomography, 88
Extradural hematoma. Report of 132 cases, 617
Intracerebellar hematoma following microsurgical STA — cortical MCA bypass surgery, 188
Intracranial, extracerebral hematomas. Computed tomographic appearances, 536
In’s hematome extra-dural de la fosse postérieure. Problèmes diagnostiques (10 observations), Extra-dural hematoma of the posterior fossa. Diagnostic problems (10 cases), 615
Large decompressive craniotomy in the treatment of acute subdural hematoma, 613
Ophthalmologic aspects of subdural hematoma, 190
Recovery from paraplegia caused by spontaneous spinal epidural hematoma, 537
Sequential angiographic studies demonstrating delayed development of an acute epidural hematoma. Case report, 536
Spontaneous spinal extradural hematoma, 92
Stroke rehabilitation. II. Guidelines for establishing a stroke rehabilitation unit, 90
Subdural hematomas due to ruptured cerebral aneurysms: angiographic diagnosis and potential pitfall for CT, 530
Transient cerebral dysfunction following chemotherapy for osseous sarcoma, 607
The usefulness of CT scanning for subdural hematomas, 282

Hemiplegia

Electrophysiological study of hemiplegia. Motor nerve conduction velocity, brachial plexus latency, and electromyography, 605
Hemiplegia and the bilowing mitral leaflet syndrome, 613
Herpes zoster ophthamicus with contralateral hemiplegia, 176
Rehabilitation outcome of patients with dual disability of hemiplegia and amputation, 531

Hemorrhage

Aphasia and left thalamic hemorrhage, 536
Benign cerebellar hemorrhages, 539
Bilateral retinal hemorrhages and disk edema in migraine, 189
Cerebellar hemorrhage in adults. Diagnosis by computerized tomography, 526
Computed tomography in intracerebral hemorrhage, 81
Congophilic angiopathy and cerebral hemorrhage, 608
Fatal massive intracerebral hemorrhage complicating cerebral amyloid angiopathy, 533
Hemorrhagic cerebral white matter. Infarction with cerebral deep venous thrombosis and hypoxia, 407
Hemorrhagic complications of cerebral arteritis, 91
The human thalamocortical sensory path in the internal capsule: evidence from a small capsular hemorrhage causing a pure sensory stroke, 183
Hemorrhage, subarachnoid

Basal rupture of saccular aneurysm. A pathological case report, 526
Cavernous angiomas of the brain. Account of fourteen personal cases and review of the literature, 542
Cerebral arterial flow dynamics during aneurysm haemorrhage, 616
Cerebral artery spasm. A histological study at necropsy of the blood vessels in cases of subarachnoid hemorrhage, 525
Changes in the subarachnoid space after experimental subarachnoid haemorrhage in the dog: scanning electron microscopic observation, 283
Clinical significance of plasma adrenaline and noradrenaline concentrations in patients with subarachnoid haemorrhage, 530
Computed tomography and subarachnoid hemorrhage, 174
Disordered cerebro-vascular physiology in aneurysmal subarachnoid haemorrhage, 616
Fibrinolytic activity in blood and cerebrospinal fluid in subarachnoid haemorrhage from ruptured intracranial saccular aneurysms before and during EACA treatment, 612
Hypothalamic and myocardial lesions after subarachnoid haemorrhage, 182
Increased sensitivity of the basilar artery to norepinephrine and 5-hydroxytryptamine following experimental subarachnoid hemorrhage, 176
Influence of head position on the prognosis of experimental subarachnoid hemorrhage, 535
Late morbidity and mortality of common carotid ligation for posterior communicating aneurysms. A comparison to conservative treatment, 276
Myocardial creatine kinase isoenzyme in serum after subarachnoid haemorrhage, 182
Re-evaluation of cerebrospinal fluid dynamics after subarachnoid hemorrhage with computed tomography and radio-nuclide cisternography, 287
Spontaneous healing of intracranial aneurysms after subarachnoid hemorrhage. Case report, 528
Subarachnoid haemorrhage above the age of 59: are intracranial investigations justified? 419
Subarachnoid haemorrhage of unknown aetiology. A clinical and radiological study of 51 cases, 278
Subarachnoid haemorrhage: long-term follow-up results of late surgical versus conservative treatment, 604
Subarachnoid hemorrhage due to intrapontal tumors, 536
Subarachnoid hemorrhage in children, 422
Surgery of ruptured intracranial aneurysm. Timing and grading, 618
Surgical treatment of arteriovenous angomas localised in the corpus callosum, basal ganglia and near the brain stem, 542
Sympathetic nervous system activity in patients with subarachnoid hemorrhage, 237
Transitory block of the arachnoid granulations following subarachnoid hemorrhage. A postmortem study, 617
Treatment of subarachnoid hemorrhage from ruptured intracranial aneurysm with tranexamic acid: a double-blind clinical trial, 616
Ultrastructural changes in feline arterial endothelium following subarachnoid hemorrhage, 410
The value of repeat pan-angiography in cases of unexplained subarachnoid hemorrhage, 610
Heparin
Carotid artery rupture. Management and prevention of delayed neurologic sequelae with low-dose heparin, 610
Cerebral involvement with disseminated intravascular coagulation in intestinal disease, 77
Comparison of heparin and a semi-synthetic heparin analogue, A - 1. Kinetics of clearance from the circulation of man following intravenous injection, 421
Comparison of heparin and a semi-synthetic heparin analogue, A - 11. Some effects on platelet function, 421
Disappearing carotid defects, 258
Heparin-induced thrombocytopenia, 535
Intracranial hemorrhage and infarction in anticoagulated patients with prosthetic heart valves, 18
Low-dose heparin as a prophylaxis against deep-vein thrombosis after acute stroke, 187
One year of heparin anticoagulation. An ambulatory subject using a totally implantable infusion pump, 184
Herpes zoster infection
Herpes zoster ophthalmicus with contralateral hemiplegia, 176
Papulosis atrophicans maligna (Kohlmeyer-Degos disease): a disseminated occlusive vasculopathy, 607
Holter monitoring
Holter monitoring in patients with transient focal cerebral ischemia, 514
Hyperlipoproteineinemia
The rate of atherosclerosis change during treatment of hyperlipoproteineinemia, 415
Hyperplasia, intimal
Cerebrovascular disease in sickle cell anemia: a clinical, pathological and radiological correlation, 45
Hypertension
Acute cerebrovascular and myocardial ischemia superimposed upon chronically hypertensive and arteriosclerotic male Sprague-Dawley rats, 183
Autoregulation of cerebral blood flow during early experimental renal hypertension in the conscious dog, 413
Brain metabolism and arterial acid-base balance following bilateral carotid occlusion in normotensive and experimental hypertensive rats, 538
Carotid and vertebral-basilar transient ischemic attacks: effect of anticoagulants, hypertension, and cardiac disorders on survival and stroke occurrence — a population study, 527
Carotid baroreceptor function in hypertensive patients, 285
Comparative angiographic and histological evaluations of intracranial atherosclerosis in hypertensive and normotensive subjects, 364
Diet-induced atherosclerosis and experimental hypertension in stump tail macaques (Macaca arctoides). Effects of antihypertensive drugs and a non-atherogenic diet in the evolution of lesions, 610
Effects of acute hypertension on brain metabolism in normoten- sive, renovascular hypertensive and spontaneously hypertensive rats, 349
Intracerebral hemorrhage following carotid endarterectomy: a hypertensive complication? 457
Prolonged induced hypertension in the management of incipient cerebral infarction, 176
Responses of cerebral arteries and arterioles to acute hypo tension and hypertension, 621
Total and regional cerebral blood flow during hypotension, hypertension, and hypocapnia. Effect of sympathetic denervation in dogs, 178
Hyperventilation
Aspirin, hyperventilation, and cerebellar infarction in sickle cell disease, 407
Hypocapnia
Total and regional cerebral blood flow during hypotension, hypertension, and hypocapnia. Effect of sympathetic denervation in dogs, 178

Hypotension
Cerebral arterial blood flow and aneurysm surgery. Part 2: induced hypotension and autoregulatory capacity, 279
Effect on canine cerebral blood flow of two common pressor agents during prolonged halothane anesthesia, 540
Responses of cerebral arteries and arterioles to acute hypotension and hypertension, 621
Role of glucose-6-phosphate in cerebral dysfunction following hypoxia and hypotension, 187
Time course of baroreceptor resetting in short-term hypotension in the rat, 609
Total and regional cerebral blood flow during hypotension, hypertension, and hypocapnia. Effect of sympathetic denervation in dogs, 178

Hypoxemia
Sequential cerebral biochemical and physiological events in controlled hypoxemia, 183

Hypoxia
Carbon monoxide-induced arterial wall hypoxia and atherosclerosis, 614
Cerebral blood flow in birds: effect of hypoxia, 531
Cerebral circulatory responses to arterial hypoxia in normal and chemodenervated dogs, 621
Effect of ornithine alpha ketoglutarate (OAKG) on the response of brain metabolism to hypoxia in the dog, 222
Hemorrhagic cerebral white matter. Infarction with cerebral deep venous thrombosis and hypoxia, 407
Role of tissue hypoxia in local regulation of cerebral microcirculation, 621
Studies on the influence of monoamines on the cerebrovascular response to arterial hypoxia, 534

I

Idiopathic regressing arteriopathy
Idiopathic regressing arteriopathy, 407

Indomethacin
Indomethacin prevents impaired perfusion of the dog's brain after global ischemia, 591
Prolonged contraction of isolated human and canine cerebral arteries induced by uridine 5'-triphosphate, 133

Infants
Intracranial arterial aneurysms in infancy and childhood, 85
Saccular aneurysm of infancy and early childhood, 414

Infarction, cerebral
Aspirin, hyperventilation, and cerebellar infarction in sickle cell disease, 407
Brain monoamines in human cerebral infarcts. A preliminary study, 532
The capacity for computed tomography diagnosis of cerebral infarction. An experimental study in the nonhuman primate, 275
Cerebral infarction in young adults, 39
Early estimation of extent of the lesion in cerebral infarction by means of cyclic AMP concentration in peripheral venous plasma, 189
Effect of aminophylline on cerebral infarction in the mongolian gerbil, 477
The effect of size, histologic elements, and water content on the visualization of cerebral infarcts. A computerized cranial tomographic study, 407
Evaluation of recent cerebral infarction by computerized tomography, 80
Experimental cerebral infarction. Part 1: production of thalamic infarction in dogs, 211
Experimental cerebral infarction. Part 2: electroencephalographic changes produced by experimental thalamic infarction in dogs, 214

Extracranial-intracranial bypass in experimental cerebral infarction in dogs, 461
A fluorescent histochemical study of changes in noradrenergic neurons following experimental cerebral infarction in the rat, 286
Importance of the hematocrit as a risk factor in cerebral infarction, 369
Intracranial hemorrhage and infarction in anticoagulated patients with prostatic heart valves, 18
 Intravenous glycerol in cerebral infarction: a controlled 4-month trial, 484
Prevention of cerebral infarction in the monkey by omental transposition to the brain, 224
Prolonged induced hypotension in the management of incipient cerebral infarction, 176
Reduction of coagulation factor XIII concentration in patients with myocardial infarction, cerebral infarction, and other thromboembolic disorders, 420
Syndrome of agitated delirium and visual impairment: a manifestation of medial tempo-occipital infarction, 284
The topography of cerebral infarcts, 190
Treatment of experimental cerebral infarction in rats with levodopa or with glycerol, 609
An ultrastructural study of developing cerebral infarction following bilateral carotid artery occlusion in spontaneously hypertensive rats, 290

Infarction, myocardial
Cerebrovascular incidents after myocardial infarction, 281
Combined effects of acute cerebrovascular ischemia and myocardial infarction in arteriosclerotic, male Sprague-Dawley rats, 183
Electroencephalographic prediction of anoxic brain damage after resuscitation from cardiac arrest in patients with acute myocardial infarction, 543
Reduction of coagulation factor XII concentration in patients with myocardial infarction, cerebral infarction, and other thromboembolic disorders, 420
The role of platelets in myocardial infarction, ischemic heart disease, cerebrovascular disease, thromboembolic disorders and acute idiopathic pericarditis, 420

Infusion pump
One year of heparin anticoagulation. An ambulatory subject using a totally implantable infusion pump, 184

Inhalation techniques
Computed tomographic measurement of the xenon brain-blood partition coefficient and implications for regional cerebral blood flow: a preliminary report, 612
Diagnosis of subdural haematoma by computed axial tomography: use of xenon inhalation for contrast enhancement, 613
Improved method for nonimvasive measurement of regional cerebral blood flow by 133Xenon inhalation. Part I: description of method and normal values obtained in healthy volunteers, 195
Improved method for nonimvasive measurement of regional cerebral blood flow by 133Xenon inhalation. Part II: measurements in health and disease, 205
Non-invasive regional study of chronic cerebrovascular disorders using the oxygen-15 inhalation technique, 415
Normal and abnormal patterns of cerebrovascular reserve tested by 133Xenon inhalation, 605
Study of regional cerebral metabolism and blood flow relationships in man using the method of continuously inhaling oxygen-15 and oxygen-15 labelled carbon dioxide, 415
Xenon-133 inhalation method for regional cerebral blood flow measurements: normal values and test-retest results, 396
133Xenon inhalation method: significance of indicator maldistribution for distinguishing brain areas with impaired perfusion. An index for total flow, 57

International Nomenclature of Diseases
AID asked for nomenclature on nervous system disorders. Letter, 406

Intestinal disease
Cerebral involvement with disseminated intravascular coagulation in intestinal disease, 77
SUBJECT INDEX 645

Hemorrhagic complications of cerebral arthritis, 91
Strokes and ulcerative colitis, 605
**Intracranial pressure**
Arterial blood gases during raised intracranial pressure in anesthetized cats under controlled ventilation, 527
Intracranial subarachnoid pressure recording: experience with 650 patients, 81
Systemic vascular responses to increased intracranial pressure. 1. Effects of progressive epidural balloon expansion on intracranial pressure and systemic circulation, 277
Systemic vascular responses to increased intracranial pressure. 2. The ‘Cushing’ response in the presence of intracranial space-occupying lesions: systemic and cerebral haemodynamic studies in the dog and the baboon, 277
The use of a fiberoptic intracranial pressure monitor in clinical practice, 282

**Intranasal procedures**
Subarachnoid hemorrhage following intranasal procedures, 82
Ischemia
Acute cerebrovascular and myocardial ischemia superimposed upon chronically hypertensive and arteriosclerotic male Sprague-Dawley rats, 183
Acute tissue response to cerebral ischemia in the gerbil. An ultrastructure study, 83
ADP-induced platelet aggregation in vitro in serum with ischemic heart disease and peripheral thromboatherosclerosis, 92
Anterior segment ischemia in temporal arteritis, 417
Brain vascularization by transplanted omentum: a possible treatment of cerebral ischemia, 282
Cerebral ischemia induced by bilateral carotid occlusion in spontaneously hypertensive rats. Supra- and infratentorial metabolism and arterial acid-base balance, 92
Cerebral ischemia. I. Current angiographic techniques, complications, and safety, 615
Combined effects of acute cerebrovascular ischemia and myocardial infarction in arteriosclerotic, male Sprague-Dawley rats, 183
Computed tomography and radionuclide imaging in the evaluation of ischemic stroke, 534
Controlled trial of aspirin on cerebral ischemia. Part II: surgical group, 309
Correlation between angiographic findings and the ischemia of head injury, 550
Delayed pentobarbital therapy of acute focal cerebral ischemia, 245
Diffuse cerebral ischemia in the cat: I. Local blood flow during severe ischemia and recirculation, 615
Diffuse cerebral ischemia in the cat: II. Regional metabolites during severe ischemia and recirculation, 615
Effects of phenobarbital in cerebral ischemia. Part I: cerebral energy metabolism during pronounced incomplete ischemia, 327
Effects of phenobarbital in cerebral ischemia. Part II: restitution of cerebral energy state, as well as of glycolytic metabolites, citric acid cycle intermediates and associated amino acids after pronounced incomplete ischemia, 335
Experimental regional cerebral ischemia in the middle cerebral artery territory in primates. Part 3: effects on brain water and electrolytes in the late phase of acute MCA stroke, 387
Experimental stroke in gerbils: correlation of clinical, pathological and electroencephalographic findings and protein synthesis, 155
Free radicals in cerebral ischemia, 445
Holter monitoring in patients with transient focal cerebral ischemia, 514
Indomethacin prevents impaired perfusion of the dog’s brain after global ischemia, 591
Intracranial bypass grafts for vertebral-basilar ischemia, 283
Ipsilateral subclavian to external carotid and STA-MCA bypasses for retinal ischemia, 418
Ischemia-induced seizures and cortical monoamine levels, 527
Ischemic optic neuropathy in cavernous sinus thrombosis, 529
Local glucose utilization in acute focal cerebral ischemia: local dysmetabolism and diaschisis, 277
Microvascular anastomosis for cerebral ischemia in 19 patients: a preliminary report, 538
Modification of acute focal ischemia by treatment with mannitol, 4
Normal serum-cholesterol but low H.D.L.-cholesterol concentration in young patients with ischaemic cerebrovascular disease, 529
Platelet adhesiveness in young patients with ischaemic stroke, 77
Platelet adhesiveness, plasma fibrinogen, and fibrinolytic activity in young patients with ischaemic stroke, 530
Platelet aggregate ratios — standardization of technique and test results in patients with myocardial ischemia and patients with cerebrovascular disease, 409
Predicting risk of ischemic heart disease and cerebrovascular disease from systolic and diastolic blood pressures, 529
Rat brain osmolality during barbiturate anaesthesia and global brain ischemia, 249
Results of microsurgical extra-intracranial arterial bypass in the treatment of cerebral ischemia, 180
The role of platelets in myocardial infarction, ischemic heart disease, cerebrovascular disease, thromboembolic disorders and acute idiopathic pericarditis, 420
Sensorimotor stroke due to thalamicapaculam ischemia, 286
"Stump" of internal carotid artery — a source for further cerebral embolic ischemia, 448
Transient focal cerebral ischemia after extreme exercise, 286
Vascular spasm in cat cerebral cortex following ischemia, 52

**Ikedyl**
The intra-arterial injection of Ikedyl for hyperselective vascular exploration, 180

**Isoproterenol**
Aminophylline and isoproterenol in the treatment of cerebral vasospasm, 81
Isoproterenol and propranolol: ability to cross the blood-brain barrier and effects on cerebral circulation in man, 344

**K**
Köhlmüer-Degos disease
Papulosis atrophicans maligna (Köhlmüer-Degos disease): a disseminated destructive vasculopathy, 607

**L**
Lesion, cerebral arterial
Cerebral arterial lesions resulting from inflammatory emboli, 498
Lesion, hypothalamic
Hypothalamic and myocardial lesions after subarachnoid haemorrhage, 182
Hypothalamic component in pressor response to carotid occlusion in the rat, 104
Lesion, myocardial
Hypothalamic and myocardial lesions after subarachnoid haemorrhage, 182
Lesion, spinal
Epidemiological studies on patients with a persistent vegetative state, 264

** Levodopa**
Treatment of experimental cerebral infarction in rats with levodopa or with glycerol, 609

Ligation, carotid
Carotid artery rupture. Management and prevention of delayed neurologic sequelae with low-dose heparin, 610
Crossed external carotid ligation for giant aneurysms, 614
Extra-intracranial arterial anastomosis previous to carotid ligation. Case report for a cervical internal carotid aneurysm from traumatic origin, 288
Late morbidity and mortality of common carotid ligation for
posterior communicating aneurysms. A comparison to conservative treatment, 276
Planned extra-anatomic cerebral revascularization for carotid artery ligation, 534

Lipids
Biochemical effects of moderate diet and clofibrate on swine atherosclerosis, 608
Diet-induced atherosclerosis and experimental hypertension in stump-tailed macaques (Macaca arctoides). Effects of antihyper-tensive drugs and a non-atherogenic diet in the evolution of lesions, 610
Influence of lipid concentrations and age on transfer of plasma lipoprotein into human arterial intima, 187
Morphological effects of moderate diet and clofibrate on swine atherosclerosis, 610
Serum lipids, platelets, and fibrinolytic activity in cerebrovascular disease, 137
Liver transplant
Acute neurological complications after liver transplantation with particular reference to intraoperative cerebral air embolus, 537

Long-term studies
Eight-year follow-up of experimental carotid-middle cerebral and carotid-basilar arterial bypass grafts and anastomoses, 606
Follow-up results of microsurgery of intracranial aneurysms, 188
Incidence of emboli with cloth-covered Starr-Edwards valve without anticoagulation and with varying forms of anticoagu-lation. Analysis of 183 patients followed for 3½ years, 416
Long-term prognosis in stroke related to cerebral blood flow, 285
The ocular manifestations of Wegener's granulomatosis. Fifteen years experience and review of the literature, 79
Subarachnoid haemorrhage: long-term follow-up results of late surgical versus conservative treatment, 604
Trends in mortality from cerebrovascular diseases in the United States, 1960 to 1975, 549

Lupus erythematosus
Oxygen-15 brain scanning for detection of cerebral involvement in systemic lupus erythematosus, 613
Retinal arterial occlusive disease in systemic lupus erythematous, 179

M
Malformation, arteriovenous
Anatomical grading of supratentorial arteriovenous malforma-tions for determining operability, 180
Arteriovenous malformations of the brain stem in childhood, 175
Cerebral arteriovenous malformations in children, 619
Dural arteriovenous malformation in the anterior fossa, 276
Embolization of an arteriovenous malformation of the brain stem, 81
Intracerebral cyanacrylate: an adjunct in the treatment of spinal/paraspinal arteriovenous malformations, 410
Spinal cord vascular malformations with symptoms during mensturation. Report of two cases, 181
Spinal epidural angiomatos malformations draining into intra-thecal veins, 91
Malignant atrioveget papulosis
Papulosis atrophicans maligna (Köhneiber-Degos disease): a disseminated occlusive vasculopathy, 607
Mannitol
Modification of acute focal ischemia by treatment with man-nitol, 4
Protective effect of mannitol (cont.). Letter, 603
Protective effect of mannitol. Letter, 524
Meningioma
Meningiomas and aneurysms of the cavernous sinus. Neuro-ophthalmologic features, 532

Meninguration
Spinal cord vascular malformations with symptoms during mensturation. Report of two cases, 181
Metabolism
Brain blood flow autoregulation and metabolism during halo-thane anesthesia in monkeys, 412
Brain metabolism and arterial acid-base balance following bilateral carotid occlusion in normotensive and experimental hypertensive rats, 538
Cerebral blood flow and metabolic changes from induction to onset of anesthesia with halothane or pentobarbital, 179
Cerebral blood flow and metabolism during morphine — nitrous oxide anesthesia in man, 78
Cerebral blood flow and metabolism in chronically hyperam-nemonic rats: effect of an acute ammonia challenge, 539
Cerebral blood flow and metabolism in man following cardiac arrest, 569
Cerebral circulation: effect of stimulation and blockade of dopamine receptors, 177
Cerebral circulatory and metabolic effects of 5-hydroxytryptamine in anesthetized baboons, 183
Cerebral ischaemia induced by bilateral carotid occlusion in halothane anesthesia, 412
Continuation of cerebral energy state, as well as of glycolytic metabolism and arterial acid-base balance, 92
Diffuse cerebral ischemia in the cat: II. Regional metabolites during severe ischemia and recirculation, 615
Effect of ornithine alpha ketoglutarate (OAKG) on the response of brain metabolism to hypoxia in the dog, 222
Effects of acute hypertension on brain metabolism in normo-tensive, renovascular hypertensive and spontaneously hyper-tensive rats, 349
Effects of phenobarbital in cerebral ischemia. Part I: cerebral energy metabolism during pronounced incomplete ischemia, 327
Effects of phenobarbital in cerebral ischemia. Part II: res-titution of cerebral energy state, as well as of glycolytic metabolism, citric acid cycle intermediates and associated amino acids after pronounced incomplete ischemia, 335
Metabolic profiles of canine cerebrovascular tree: a histo-chemical study, 165
Study of regional cerebral metabolism and blood flow rela-relationships in man using the method of continuously inhaling oxygen-15 and oxygen-15 labelled carbon dioxide, 415
Time course of the cerebral circulatory response to metabolic depression, 414

Methysergide
Prolonged contraction of isolated human and canine cerebral arteries induced by uridine 5'-triphosphate, 133
Mice study
Effects of reduced regional or body temperatures on responses of pial arterioles, 580
Mitral valve disease
Hemiplegia and the bilowing mitral leaflet syndrome, 613
Strokes: a complication of mitral-leaflet prolapse? 86
Thromboembolic complications after mitral valve replacement with Hancock xenograft, 612

Monkey studies
Blood flow and oxygen consumption of the focally traumatized monkey brain, 92

Downloaded from http://stroke.ahajournals.org/ by guest on November 7, 2016
Brain blood flow autoregulation and metabolism during halothane anesthesia in monkeys, 412
Cerebral blood flow determined by hydrogen clearance during middle cerebral artery occlusion in unanesthetized monkeys, 143
Cerebral blood flow in the monkey after focal cryogenic injury, 509
Comparative responses of the carotid and vertebral arterial systems of rhesus monkeys to betahistine, 382
Diet-induced atherosclerosis and experimental hypertension in stump-tailed macaques (Macaca arctoides). Effects of antihypertensive drugs and a non-atherogenic diet in the evolution of lesions, 610
The effects of sodium nitroprusside and trimethaphan camsylate on cerebral blood flow in rhesus monkeys, 414
Experimental regional cerebral ischemia in the middle cerebral artery territory in primates. Part 3: effects on brain water and electrolytes in the late phase of acute MCA stroke, 387
Internal and external carotid vascular responses to vasoactive agents in the monkey, 416
Local cerebral glucose uptake in awake and halothane-anesthetized primates, 419
Prevention of cerebral infarction in the monkey by omental transposition to the brain, 224
Monoamine levels
Brain monoamine metabolites and tryptophan in ventricular CSF of patients with spasm after aneurysm surgery, 410
Brain monoamines in human cerebral infarcts. A preliminary study, 532
Ischemia-induced seizures and cortical monoamine levels, 527
Studies on the influence of monoamines on the cerebrovascular response to arterial hypoxia, 534
Transitory platelet monoamine oxidase deficit in migraine: some reflections, 186
Ultrastructural evidence for central monoaminergic innervation of blood vessels in the paraventricular nucleus of the hypothalamus, 289
Mood disorder
Mood disorder as a specific complication of stroke, 281
Morphine
Cerebral blood flow and metabolism during morphine — nitrous oxide anesthesia in man, 78
Moyamoya syndrome
Bilateral temporal-middle cerebral artery anastomosis for moyamoya syndrome, 81
Computed tomography in "Moya-Moya": summary of 16 cases, 277
Moyamoya disease associated with aneurysm, 526
Moyamoya disease in children, 530
Multiple progressive intracranial arterial occlusions ('moyamoya' disease), 278
Observations on moyamoya disease: a case treated with superficial temporal-middle cerebral artery anastomosis, 539
Occipital to posterior inferior cerebellar artery bypass surgery, 609
Muscle contraction
Prevention of persistent cerebral smooth muscle contraction in response to whole blood, 472
Myxoma, atrial
Bilateral atrial myxomas with multiple arterial aneurysms. A syndrome mimicking polycystic nodosa, 90
Emboli to the central nervous system from cardiac myxoma. Report of two cases, 279
Left ventricular myxoma. Echocardiographic diagnosis and review of the literature, 279
Nerve conduction velocity
Electrophysiological study of hemiplegia. Motor nerve conduction velocity, brachial plexus latency, and electromyography, 605
Nerve stimulation
Analysis of the effect of bilateral sympathetic stimulation on cerebral and cephalic blood flow in the dog, 29
Effect of sympathetic nerve stimulation on cerebral blood flow and on large cerebral arteries of dogs, 178
Evidence that neural mechanisms do not have important effects on cerebral blood flow, 536
Neurogenic vasodilation of cat cerebral arteries, 541
Neurological syndromes
Neurological syndromes after cardiac arrest, 517
Vessel tortuosity as a cause of posterior fossa cranial nerve syndromes, 411
Nicergoline
Effect of nicergoline on cerebral blood flow, 182
Nitrous oxide
Cerebral blood flow and metabolism during morphine — nitrous oxide anesthesia in man, 78
Cerebrovascular CO2 reactivity: role of a cholinergic mechanism modulated by anesthesia, 160
No-reflow phenomenon
Vascular spasm in cat cerebral cortex following ischemia, 52
Noradrenaline
Barrier and uptake mechanisms in the cerebrovascular response to noradrenaline, 185
Clinical significance of plasma adrenaline and noradrenaline concentrations in patients with subarachnoid haemorrhage, 530
Norepinephrine
The effect of norepinephrine on the spinal cord circulation and its possible implications in the pathogenesis of acute spinal trauma, 186
Evidence that neural mechanisms do not have important effects on cerebral blood flow, 536
Increased sensitivity of the basilar artery to norepinephrine and 5-hydroxytryptamine following experimental subarachnoid hemorrhage, 176
Sympathetic nervous system activity in patients with subarachnoid hemorrhage, 237
Nucleotide, cyclic
Platelet aggregation and cyclic nucleotide phosphodiesterase activity in arteriosclerotic patients, 540
O
Oclusion
Bilateral occlusion of basilar artery branches, 415
Brain metabolism and arterial acid-base balance following bilateral carotid occlusion in normotensive and experimental hypertensive rats, 538
Cerebral blood flow determined by hydrogen clearance during middle cerebral artery occlusion in unanesthetized monkeys, 143
Cerebral ischaemia induced by bilateral carotid occlusion in spontaneously hypertensive rats. Supra- and infratentorial metabolism and arterial acid-base balance, 92
Comparison of noninvasive diagnostic techniques in carotid artery occlusive disease, 78
Critical cerebral blood flow for production of hemiparesis after unilateral carotid occlusion in the gerbil, 175
Dilated episceral arteries — a significant physical finding in assessment of patients with cerebrovascular insufficiency, 42
Doppler ultrasound and supraorbital photoplethysmography for noninvasive screening of carotid occlusive disease, 85
Dose dependency of the post-insult protective effect of pentobarbital in the canine experimental stroke model, 10
Effect of occlusion on large vessels. I. A study of the rat carotid artery, 86
Emergency occlusive techniques, 608
Hypothalamic component in postinsult response to carotid occlusion in the rat, 184
Measurement of mean circulatory filling pressure and vascular capacitance in the rat, 414
Natural history and classification of occlusive thromboartopathy (Takayasu's disease), 408
Occlusion of the intradural vertebrobasilar artery, 532
Pseudo-occlusion of the internal carotid artery, 408
SEM evaluation of endothelial damage following temporary middle cerebral artery occlusion in dogs, 410
The treatment of intracranial aneurysms by injection with a tissue adhesive, 180
An ultrastructural study of developing cerebral infarction following bilateral carotid artery occlusion in spontaneously hypertensive rats, 200
Ocular disease
The ocular manifestations of Wegener's granulomatosis. Fifteen years experience and review of the literature, 79
Omentum
Brain vascularization by transplanted omentum: a possible treatment of cerebral ischemia, 282
Omental transposition to human brain. Letter, 272
Prevention of cerebral infarction in the monkey by omental transposition to the brain, 224
Ophthalmosonometry
The use of ophthalmosonometry in the diagnosis of cerebral artery stenosis, 80
Ornithine alpha ketoglutarate
Controlled trial of ornithine alpha ketoglutarate (OAKG) in patients with stroke, 218
Effect of ornithine alpha ketoglutarate (OAKG) on the response of brain metabolism to hypoxia in the dog, 222
Osmolality
Rat brain osmolality during barbiturate anesthesia and global brain ischemia, 249
Oxygen consumption, cerebral
Blood flow and oxygen consumption of the focally traumatized monkey brain, 92
Cerebral blood flow and metabolism in man following cardiac arrest, 569
Cerebral blood flow and oxygen consumption in the newborn dog, 609
Cerebral blood flow, oxygen utilization, and blood volume in dementia, 185
Experimental head injury in the rat. Part 3: cerebral blood flow and oxygen consumption after concussion impact acceleration, 79
Papaverine
Brief therapeutic report: papaverine prophylaxis of complicated migraine, 177
Experimental cerebrovascular disorders: effects of papaverine and theophylline, 179
Paraplegia
Recovery from paraplegia caused by spontaneous spinal epidural hematoma, 537
Pentobarbital
Cerebral blood flow and metabolic changes from induction to onset of anesthesia with halothane or pentobarbital, 179
Delayed pentobarbital therapy of acute focal cerebral ischemia, 245
Dose dependency of the post-insult protective effect of pentobarbital in the canine experimental stroke model, 10
Dose dependent reduction of glucose utilization by pentobarbital in rat brain, 12
Effects of phenobarbital in cerebral ischemia. Part 1: cerebral energy metabolism during pronounced incomplete ischemia, 327
Effects of phenobarbital in cerebral ischemia. Part II: restitution of cerebral energy state, as well as of glycolytic metabolites, citric acid cycle intermediates and associated amino acids after pronounced incomplete ischemia, 335
Perfusion, cerebral
Indomethacin prevents impaired perfusion of the dog's brain after global ischemia, 591
Xenon enhanced CT for analysis of cerebral integrity, perfusion, and blood flow, 123
Pericarditis
The role of platelets in myocardial infarction, ischemic heart disease, cerebrovascular disease, thromboembolic disorders and acute idiopathic pericarditis, 420
Phenoxymenzamine
Prolonged contraction of isolated human and canine cerebral arteries induced by uridine 5'-triphosphate, 133
Phenylylethylamine
Phenylylethylamine and cerebral blood flow. Possible involvement of phenylylethylamine in migraine, 175
Photonoangiography
The brisk of carotid stenosis versus radiated basal heart murmurs. Differentiation by photonoangiography, 606
Photoplethysmography
Doppler ultrasound and supraorbital photoplethysmography for noninvasive screening of carotid occlusive disease, 85
Physical therapy
How much physical therapy for patients with stroke?, 604
Phystostigmine
Cerebrovascular CO2 reactivity: role of a cholinergic mechanism modulated by anesthesia, 160
Pial vessels
Effects of 5-hydroxytryptamine on pial arteriolar calibre in anesthetized cats, 183
Effects of reduced regional or body temperatures on responses of pial arterioles, 580
Fibrinolytic properties of some optic nerve vessels, 532
A method for continuous monitoring of pial vessel diameter changes and its value for dynamic studies of the regulation of cerebral circulation. A preliminary report, 534
Vasoconstrictor effect of angiotensin on pial arteries, 417
Plasma adrenaline
Clinical significance of plasma adrenaline and noradrenaline concentrations in patients with subarachnoid haemorrhage, 530
Plasma fibrinogen
Platelet adhesiveness, plasma fibrinogen, and fibrinolytic activity in young patients with ischaemic stroke, 530
Platelets
ADP-induced platelet aggregation in vitro in patients with ischaemic heart disease and peripheral thromboatherosclerosis, 92
Antithrombotic potential of dihomo-gamma-linolenic acid in man, 294
Chronic effect of smoking on platelet count and "platelet adhesiveness" in presumably healthy middle-aged men, 409
Comparison of heparin and a semi-synthetic heparin analogue, A. 11. Some effects on platelet function, 421
Further evidence for the role of thrombin in the platelet release reaction caused by various agents, and the nature of biphasic platelet aggregation, 618
Indium-111-labeled autologous platelets for location of vascular thrombi in humans, 618
Inhibition of platelet prostaglandin synthetase by oral aspirin, 417
Platelet adhesiveness in young patients with ischaemic stroke, 77
Platelet adhesiveness, plasma fibrinogen, and fibrinolytic activity in young patients with ischaemic stroke, 530
Platelet aggregability in migraine, 185
Platelet aggregate ratios — standardization of technique and test results in patients with myocardial ischemia and patients with cerebrovascular disease, 409
Platelet aggregation and cyclic nucleotide phosphodiesterase activity in arteriosclerotic patients, 540
Platelet aggregation in patients with peripheral vascular disease, 418
Platelet aggregation in patients with severe atherosclerosis, 541
Platelet changes in women taking oral contraceptives, 77
Platelet coagulant activities and retinal vein thrombosis, 408
Platelet hyperaggregability in young patients with completed stroke, 278
Prevention of persistent cerebral smooth muscle contraction in response to whole blood, 472
The role of platelets in myocardial infarction, ischemic heart disease and cerebral ischemia, 282
disease, cerebrovascular disease, thromboembolic disorders and acute idiopathic pericarditis, 420
The role of platelets in the pathogenesis of thrombosis and hemorrhage in patients with thrombocytosis, 420
Scintigraphic detection of atherosclerotic lesions and venous thrombi in man by indium-111-labelled autologous platelets, 604
Serum lipids, platelets, and fibrinolytic activity in cerebrovascular disease, 137
Spontaneous platelet aggregation in cerebrovascular disease, 540
Stroke platelet and antiplatelet agents in strokes, 403
Studies on platelet plasma membranes. III. Membrane glycoprotein loss from circulating platelets in rabbits: inhibition by aspirin-dipyridamole and acceleration by thrombin, 419
Transitory platelet monoamine oxidase deficit in migraine: some reflections, 186

Pneumography
Complications of cerebral angiography and pneumography, 186

Pneumophlebography
The asymptomatic carotid bruit and the ocular pneumophelebography, 274

Polyarteritis nodosa
Bilateral arterial myxomas with multiple arterial aneurysms. A syndrome mimicking polyarteritis nodosa, 90

Polycthemia
Cerebral blood-flow in polycthemia, 83

Pregnancy
Cerebral ischaemia induced by bilateral carotid occlusion in normotensive and experimental hypertensive rats, 538

Propranolol
Discontinuing anticoagulant therapy in surgical patients with arterial thromboembolism, 84

Prostaglandin
Measurement of prostaglandin E2 in cerebrospinal fluid in patients suffering from stroke, 281
Pathologic findings in the aortocoronary vein grafts. A scanning electron microscope study, 417

Prostaglandins and the arterial wall: an avenue for research in the pathogenesis of atherosclerosis (editorial), 287
Responses of isolated dog cerebral and peripheral arteries to prostaglandins after application of aspirin and polyphloretin phosphate, 490
Vasoactive properties of prostaglandin compounds on the in vitro human basilar artery, 81

Prosthetic heart valve
Anticoagulant therapy and central nervous system complications in patients with prosthetic valve endocarditis, 606
Discontinuing anticoagulant therapy in surgical patients with cardiac valve prostheses. Observations in 180 operations, 423
Incidence of emboli with cloth-covered Starr-Edward valve without anticoagulation and with varying forms of anticoagulation. Analysis of 183 patients followed for 3½ years, 416
Intracranial hemorrhage and infarction in anticoagulated patients with prosthetic heart valves, 18
Late complications of prosthetic heart valves, 608
Prevention of arterial thromboembolism with acetylsalicylic acid. A controlled clinical study in patients with aortic ball valves, 84

Protein synthesis
Experimental stroke in gerbils: correlation of clinical, pathological and electroencephalographic findings and protein synthesis, 155

R

Rabbit studies
Cerebrovascular CO2 reactivity: role of a cholinergic mechanism modulated by anesthesia, 160
Comparison of carotid artery mechanics in the rat, rabbit, and dog, 531

Experimental cerebrovascular disorders: effects of papaverine and theophylline, 179
Experimental cerebrovascular disorders: effects on cardiovascular functions and on cerebrospinal fluid production and constituents with special reference to cyclic AMP, 187
Gonadal hormones and pathogenesis of occlusive arterial thrombosis, 621
Increased sensitivity of the basilar artery to norepinephrine and 5-hydroxytryptamine following experimental subarachnoid hemorrhage, 176
Microradiographic study of cerebral and ocular aneurysms in hypertensive rabbits, 613
Regression of atheroma in the rabbit, 409
Scanning electron microscope studies of rabbit aortic endothelium in areas of haemodynamic stress during induction of fatty streaks, 620

Radionuclide scanning
Computed tomography and radionuclide imaging in the evaluation of ischemic stroke, 534
Computed tomography of intracerebral hematomas. II. Radionuclide and transmission CT studies of the perihematoma region, 174
Dynamic radionuclide scanning in the diagnosis of thrombosis of the superior sagittal sinus, 80
Epidural hematoma of the posterior fossa: radionuclide features, 530
On the theory of an intravenous isotope method for cerebral blood flow measurements, 87
Radioiodinated fibrinogen for clot detection in a canine model of cerebral carotid thrombosis, 541
Re-evaluation of cerebrospinal fluid dynamics after subarachnoid hemorrhage with computed tomography and radionuclide cisternography, 287
Technique for multi-view radionuclide angiography, 366
The validity of an intravenous isotope method for cerebral blood flow measurements. An experimental study, 87

Rat studies
Acute cerebrovascular and myocardial ischemia superimposed upon chronically hypertensive and arteriosclerotic male Sprague-Dawley rats, 183
Brain metabolism and arterial acid-base balance following bilateral carotid occlusion in normotensive and experimental hypertensive rats, 538
Cerebral blood flow and metabolism in chronically hyperammonemic rats: effect of an acute ammonia challenge, 559
Cerebral blood flow autoregulation in the rat, 150
Cerebral ischaemia induced by bilateral carotid occlusion in spontaneously hypertensive rats. Supra- and infratentorial metabolism and arterial acid-base balance, 92
Comparison of carotid artery mechanics in the rat, rabbit, and dog, 531
Dose dependent reduction of glucose utilization by pentobarbital in rat brain, 12
Effect of an acute increase of the intravascular pressure on the blood-brain barrier, 588
Effect of non-respiratory alkalosis on brain tissue and cerebral blood flow in rats with damaged blood-brain barrier, 354
Effect of occlusion on large vessels. I. A study of the rat carotid artery, 86
Effects of acute hypertension on brain metabolism in normotensive, renovascular hypertensive and spontaneously hypertensive rats, 349
Experimental head injury in the rat. Part 3: cerebral blood flow and oxygen consumption after concussive impact acceleration, 79
A fluorescent histochemical study of changes in noradrenergic neurons following experimental cerebral infarction in the rat, 286
Gonadal hormones and pathogenesis of occlusive arterial thrombosis, 621
Hypothalamic component in pressor response to carotid occlusion in the rat, 184
Measurement of mean circulatory filling pressure and vascular capacitance in the rat, 414
The role of hemodynamic factors in arterial wall thickening in the rat, 620
Sequential cerebral biochemical and physiological events in controlled hypoxemia, 183
Time course of baroreceptor resetting in short-term hypotension in the rat, 609
Treatment of experimental cerebral infarction in rats with levodopa or with glycerol, 609
Ultrastructural evidence for central monoaminergic innervation of blood vessels in the paraventricular nucleus of the hypothalamus, 289
An ultrastructural study of developing cerebral infarction following bilateral carotid artery occlusion in spontaneously hypertensive rats, 280

Rehabilitation
Rehabilitation outcome of patients with dual disability of hemiplegia and amputation, 531
Rehabilitation, stroke
Functional status measures in a comprehensive stroke care program, 288
Hospital utilization in the rehabilitation of completed stroke, 93
How much physical therapy for patients with stroke? 604
Medical audit of stroke rehabilitation: a critique of medical care review, 90
Relationship between primitive reflexes in stroke patients and rehabilitation outcome, 256
Stroke rehabilitation. I. Factors predicting outcome and length of stay — an overview, 89
Stroke rehabilitation. II. Guidelines for establishing a stroke rehabilitation unit, 90
Stroke rehabilitation: a family-team education program, 611
Stroke rehabilitation: a reconsideration of some common attitudes, 541
Stroke rehabilitation: evaluation of its quality by assessing patient outcomes, 541
Stroke rehabilitation: maintenance of achieved gains, 90

Retinal arterial occlusion
Acute central retinal artery occlusion and optic disc neovascularization. Occurrence in a patient with carotid artery disease, 529
Retinal arterial occlusive disease in systemic lupus erythematosus, 179
Retinal stroke. Is the patient at risk? 182
Treatment of acute central retinal artery occlusion, 605

Revascularization, cerebral
Cerebral arterial revascularization: the value of repeated angiography in selection of patients for operation, 604
Cerebral revascularization for transient ischemic attacks, 77
Cerebral revascularization: common carotid to distal middle cerebral artery bypass, 540
Planned extra-anatomic cerebral revascularization for carotid artery ligation, 534

Revascularization, myocardial
Vascular reconstructive surgery following myocardial revascularization, 619

Revascularization, posterior fossa
Posterior fossa revascularization: anastomosis of vertebral artery to PICA with interposed radial artery graft, 607

Rheumatoid arthritis
Central nervous system vasculitis in rheumatoid arthritis, 276

Risk factors
 Gonadal hormones and pathogenesis of occlusive arterial thrombosis, 621
Importance of the hematocrit as a risk factor in cerebral infarction, 369
Long term changes in blood pressure and risk of cerebrovascular disease, 319
Predicting risk of ischemic heart disease and cerebrovascular disease from systolic and diastolic blood pressures, 529

S
Scintigraphy
Scintigraphic detection of atherosclerotic lesions and venous thrombi in man by indium-111-labelled autologous platelets, 604
Scintigraphic detection of congenital intracranial vascular malformations, 543
Seizure
Basilar migraine, seizures, and severe epileptiform EEG abnormalities. A relatively benign syndrome in adolescents, 605
Ischemia-induced seizures and cortical monoamine levels, 527
Serotonin
Brain monoamines in human cerebral infarcts. A preliminary study, 532
Cerebral circulatory and metabolic effects of 5-hydroxytryptamine in anesthetized baboons, 183
Effect of topically applied serotonin on local cerebral blood flow, 25
Effects of 5-hydroxytryptamine on pial arteriolar caliber in anesthetized cats, 183
Increased sensitivity of the basilar artery to norepinephrine and 5-hydroxytryptamine following experimental subarachnoid hemorrhage, 176
Pharmacological analysis of 5-hydroxytryptamine receptors in isolated intracranial and extracranial vessels of cat and man, 409
Potentiation and antagonism of serotonin effects on intracranial and extracranial vessels. Possible implications in migraine, 412
Preliminary of the cerebrovascular response to intra-arterial 5-hydroxytryptamine, 531
Transient cerebral ischemia and brain serotonin: relevance to migraine, 177
Transitory platelet monoamine oxidase deficit in some reflections, 186

Shy-Drager syndrome
Cerebral hemodynamics in Shy-Drager syndrome. Variability of cerebral blood flow dysautoregulation and the compensatory role of chemical control in dysautoregulation, 504
Sickle cell anemia
Aspirin, hyperventilation, and cerebellar infarction in sickle cell disease, 407
Cerebrovascular complications of sickle cell anemia, 73
Cerebrovascular disease in sickle cell anemia: a clinical, pathological and radiological correlation, 45
The management of ruptured intracranial aneurysm in sickle cell anemia. Case report, 276
Strokes in children and adolescents, 169
Sinosal disease
Emboliion in sinusoidal disease, 543

Smoking habits
Chronic effect of smoking on platelet count and "platelet adhesiveness" in presumably healthy middle-aged men, 409
Cigarette smoking and HDL cholesterol. The Framingham Offspring Study, 614
Smoking, carbon monoxide, and atherosclerotic diseases, 419
Sodium nitroprusside
Cyanide toxicity and thiosulfate protection during chronic administration of sodium nitroprusside in the dog correlation with a human case, 286
The effects of sodium nitroprusside and trimethaphan camsylate on cerebral blood flow in rhesus monkeys, 414

Spasm, vascular
Brain monoamine metabolites and tryptophan in ventricular CSF of patients with spasm after aneurysm surgery, 410
Cerebral artery spasm. A histological study at necropsy of the blood vessels in cases of subarachnoid hemorrhage, 525
Experiences of surgical treatment of 400 consecutive ruptured cerebral arterial aneurysms, 542
Vascular spasm in cat cerebral cortex following ischemia, 52

Stenosis, carotid
The risk of carotid stenosis versus radiated basal heart murmurs. Differentiation by phonoangiography, 606

### Carotid stenosis and coexisting ipsilateral intracranial aneurysm.

A problem in management, 77

Common carotid artery stenosis due to subintimal hematoma following blunt trauma to the neck. Report of a case, 84

Early restenosis after carotid endarterectomy, 529

Hemodynamics of arterial stenoses at elevated flow rates, 91

The use of ophthalmosonometry in the diagnosis of carotid artery stenosis, 80

Stenosis, subclavian

Cardiac cycle-dependent alternating flow in vertebral arteries with subclavian artery stenoses, 229

Steroid administration

Resolving intracerebral hematoma: alteration of the "ring sign" with steroids, 607

Tolosa-Hunt syndrome. Arteriographic evidence of improvement in carotid narrowing, 533

Stress response

Prognostic value of the stress response following stroke, 181

Stoke

Bow hunter's stroke, 619

Cardiac arrhythmias in acute stroke, 392

Cerebral infarction in young adults, 39

Cerebrovascular disease in sickle cell anemia: a clinical, pathological and radiological correlation, 45

Computed tomography and radionuclide imaging in the evaluation of ischemic stroke, 534

Controlled trial of oranzilene alpha ketoglutarate (OAKG) in patients with stroke, 218

Editorial: aspirin — effective in males threatened with stroke, 295

Editorial: role of stroke in dementia, 1

Effect of DPPD (diphenyl-para-phenylenediamine) on stroke and cerebral edema in gerbils, 480

Experimental regional cerebral ischemia in the middle cerebral artery territory in primates. Part 3: effects on brain water and electrolytes in the late phase of acute MCA stroke, 387

Experimental stroke in gerbils: correlation of clinical, pathological and electroencephalographic findings and protein synthesis, 155

Internal carotid back pressure, intraoperative shunting, ulcerated atheroma, and the incidence of stroke during carotid endarterectomy, 533

Is there a real treatment for stroke? Clinical and statistical comparison of different treatments in 300 patients, 130

Long-term prognosis in stroke related to cerebral blood flow, 285

Low-dose heparin as a prophylaxis against deep-vein thrombosis after acute stroke, 187

Measurement of prostaglandin E2 in cerebrospinal fluid in patients suffering from stroke, 281

Mood disorder as a specific complication of stroke, 298

New classification of stroke: preliminary communication, 412

Noninvasive detection and evaluation stroke-prone patients, 289

Oclusive arterial disease of the child and young adult. Clinical electroencephalographic analysis of 26 cases, 422

Platelet adhesiveness in young patients with ischaemic stroke, 77

Platelet adhesiveness, plasma fibrinogen, and fibrinolytic activity in young patients with ischaemic stroke, 530

Platelet hyperaggregability in young patients with completed stroke, 278

Prognostic factors in the survival of 1,484 stroke cases observed for 30 to 48 months. I. Diagnostic types and descriptive variables, 528

Prognostic factors in the survival of 1,484 stroke cases observed for 30 to 48 months. II. Clinical variables and laboratory measurements, 528

Prognostic value of the stress response following stroke, 181

Regional cerebral blood flow in stroke patients, 181

Sensorimotor stroke due to thalamocapsular ischemia, 286

Stroke associated with carotid endarterectomy, 421

Stroke platelet and ant platelet agents in strokes, 403

Strokes and ulcerative colitis, 603

Strokes in children and adolescents, 169

Strokes: a complication of mitral-leaflet prolapse? 86

Superior sagittal sinus

Dynamic radionuclide scanning in the diagnosis of thrombosis of the superior sagittal sinus, 80

Swine studies

Biochemical effects of moderate diet and clofibrate on swine atherosclerosis, 608

Formation of adenosine nucleotide derivatives in isolated hog carotid artery strips, 184

Morphological effects of moderate diet and clofibrate on swine atherosclerosis, 608

Sympathetic nerve stimulation

Analysis of the effect of bilateral sympathetic stimulation on cerebral and cephalic blood flow in the dog, 29

Effect of sympathetic nerve stimulation on cerebral blood flow and on large cerebral arteries of dogs, 178

Syncope

Swallowing syncope. A case report, 93

Takayasu’s disease

Natural history and classification of occlusive thromboarteriopathy (Takayasu’s disease), 408

Theophylline

Experimental cerebrovascular disorders: effects of papaverine and theophylline, 179

Thromboatherosclerosis, peripheral

ADP-induced platelet aggregation in vitro in patients with ischemic heart disease and peripheral thromboatherosclerosis, 92

Thrombocytopenia

Heparin-induced thrombocytopenia, 535

Thromboendarterectomy

Thromboendarterectomy for total occlusion of the internal carotid artery: a reappraisal of risks, success rate and potential benefits, 34

Thrombolysis

Non-penetrating trauma to the carotid artery with secondary thrombosis and embolism: treatment by thrombolysin, 83

Thrombosis

Antithrombotic potential of dihomo-gamma-linolenic acid in man, 284

Disappearing carotid defects, 258

Dynamic radionuclide scanning in the diagnosis of thrombosis of the superior sagittal sinus, 80

Failure of aspirin to prevent postoperative deep vein thrombosis in patients undergoing total hip replacement, 618

The finding of thrombus at carotid endarterectomy and its relationship to the timing of surgery, 181

Gonadal hormones and pathogenesis of occlusive arterial thrombosis, 621

Hemorrhagic cerebral white matter. Infarction with cerebral deep venous thrombosis and hypoxia, 407

Intracranial venous sinus thrombosis: diagnosis suggested by computed tomography, 619

Iron-acryl composite for stereotaxic aneurysm thrombosis, 78

Ischemic optic neuropathy in cavernous sinus thrombosis, 529

Low-dose heparin as a prophylaxis against deep-vein thrombosis after acute stroke, 187

A model study of why some intracranial aneurysms thrombose but others rupture, 583

Non-penetrating trauma to the carotid artery with secondary thrombosis and embolism: treatment by thrombolysin, 83

Primary cerebral venous thrombosis in young adults: the diverse manifestations of an underrecognized disease, 418

Radiodinated fibrinogen for clot detection in a canine model of cervical carotid thrombosis, 543

Reduction of coagulation factor XIII concentration in patients with myocardial infarction, cerebral infarction, and other thromboembolic disorders, 420

The role of platelets in myocardial infarction, ischemic heart disease, 187

Swine studies

Biochemical effects of moderate diet and clofibrate on swine atherosclerosis, 608

Formation of adenosine nucleotide derivatives in isolated hog carotid artery strips, 184

Morphological effects of moderate diet and clofibrate on swine atherosclerosis, 608

Sympathetic nerve stimulation

Analysis of the effect of bilateral sympathetic stimulation on cerebral and cephalic blood flow in the dog, 29

Effect of sympathetic nerve stimulation on cerebral blood flow and on large cerebral arteries of dogs, 178

Syncope

Swallowing syncope. A case report, 93

Takayasu’s disease

Natural history and classification of occlusive thromboarteriopathy (Takayasu’s disease), 408

Theophylline

Experimental cerebrovascular disorders: effects of papaverine and theophylline, 179

Thromboatherosclerosis, peripheral

ADP-induced platelet aggregation in vitro in patients with ischemic heart disease and peripheral thromboatherosclerosis, 92

Thrombocytopenia

Heparin-induced thrombocytopenia, 535

Thromboendarterectomy

Thromboendarterectomy for total occlusion of the internal carotid artery: a reappraisal of risks, success rate and potential benefits, 34

Thrombolysis

Non-penetrating trauma to the carotid artery with secondary thrombosis and embolism: treatment by thrombolysin, 83

Thrombosis

Antithrombotic potential of dihomo-gamma-linolenic acid in man, 284

Disappearing carotid defects, 258

Dynamic radionuclide scanning in the diagnosis of thrombosis of the superior sagittal sinus, 80

Failure of aspirin to prevent postoperative deep vein thrombosis in patients undergoing total hip replacement, 618

The finding of thrombus at carotid endarterectomy and its relationship to the timing of surgery, 181

Gonadal hormones and pathogenesis of occlusive arterial thrombosis, 621

Hemorrhagic cerebral white matter. Infarction with cerebral deep venous thrombosis and hypoxia, 407

Intracranial venous sinus thrombosis: diagnosis suggested by computed tomography, 619

Iron-acryl composite for stereotaxic aneurysm thrombosis, 78

Ischemic optic neuropathy in cavernous sinus thrombosis, 529

Low-dose heparin as a prophylaxis against deep-vein thrombosis after acute stroke, 187

A model study of why some intracranial aneurysms thrombose but others rupture, 583

Non-penetrating trauma to the carotid artery with secondary thrombosis and embolism: treatment by thrombolysin, 83

Primary cerebral venous thrombosis in young adults: the diverse manifestations of an underrecognized disease, 418

Radiodinated fibrinogen for clot detection in a canine model of cervical carotid thrombosis, 543

Reduction of coagulation factor XIII concentration in patients with myocardial infarction, cerebral infarction, and other thromboembolic disorders, 420

The role of platelets in myocardial infarction, ischemic heart disease, 187
disease, cerebrovascular disease, thromboembolic disorders and acute idiopathic pericarditis, 420
The role of platelets in the pathogenesis of thrombosis and hemorrhage in patients with thrombocytosis, 420
Stereotaxic thrombosis of inaccessible intracranial aneurysms, 279
Strokes in children and adolescents, 169
Thromboembolic complications in coronary angiography. Prevention with acetylsalicylic acid, 417
Thrombosis of the intraorbital veins and cavernous sinus, 85
Thrombosis of the mesencephalic artery. A clinicopathological study of two cases and its correlation with the arterial vasculomotor, 82
Thrombus formation and endothelial alterations in microarterial anastomoses, 89
Ultramicroscopic ulcerations and thrombi of the carotid bifurcation, 274
Thyrotoxicosis
Arterial embolism in thyrotoxicosis with atrial fibrillation, 178
Tolosa-Hunt syndrome
Tolosa-Hunt syndrome. Arteriographic evidence of improvement in carotid narrowing, 533
Tranexamic acid
Effect of tranexamic acid on rebleeding after subarachnoid hemorrhage: a double-blind controlled clinical trial, 174
Prolonged antifibrinolysis: an effective non-surgical treatment for ruptured intracranial aneurysms? 537
Treatment of subarachnoid hemorrhage from ruptured intracranial aneurysm with tranexamic acid: a double-blind clinical trial, 616
Transient cerebral dysfunction
Transient cerebral dysfunction following chemotherapy for osteogenic sarcoma, 607
Transient ischemic attacks
Carotid and vertebral-basilar transient ischemic attacks: effect of anticoagulants, hypertension, and cardiac disorders on survival and stroke occurrence — a population study, 527
Cerebral revascularization for transient ischemic attacks, 77
Clinical and arteriographic comparison of amaurosis fugax with hemispheric transient ischemic attacks, 254
Controlled trial of aspirin on cerebral ischemia. Part II: surgical group, 309
Cooperative study of hospital frequency and character of transient ischemic attacks. III. Variations in treatment, 84
Cooperative study of hospital frequency and character of transient ischemic attacks. IV. The reliability of diagnosis, 421
Cooperative study of hospital frequency and character of transient ischemic attacks. V. Symptom analysis, 421
Cooperative study of hospital frequency and character of transient ischemic attacks. VI. Patients examined during an attack, 422
Cooperative study of hospital frequency and character of transient ischemic attacks. VII. Initial diagnostic evaluation, 618
The finding of thrombus at carotid endarterectomy and its relationship to the timing of surgery, 181
A new look at emergency carotid artery operations for the treatment of cerebrovascular insufficiency, 599
Relevance of duration of transient ischemic attacks in carotid territory, 614
Transient cerebral ischemia and brain serotonin: relevance to migraine, 177
Treatment of transient ischemic attacks, 299
Trial of aspirin during weaning patients with transient ischemic attacks from anticoagulants, 617
The value of carotid endarterectomy in treating transient cerebral ischemia of the posterior circulation, 80
Trauma, head
Compartmental analysis of regional cerebral blood flow in patients with acute severe head injuries, 283
Correlation between angiographic findings and the ischaemia of head injury, 350
Experimental head injury in the rat. Part 3: cerebral blood flow and oxygen consumption after concussive impact acceleration, 79
Extradural haematoma. Report of 132 cases, 617
Non-penetrating trauma to the carotid artery with secondary thrombosis and embolism: treatment by thrombolysis, 83
A sign of subarachnoid bleeding on cranial computed tomograms of pediatric head trauma patients, 416
Strokes in children and adolescents, 169
Vertebrobasilar spasm: a significant cause of neurological deficit in head injury, 526
Trauma, neck
Common carotid artery stenosis due to subintimal hematoma following blunt trauma to the neck. Report of a case, 84
Trauma, spinal cord
The effect of norepinephrine on the spinal cord circulation and its possible implications in the pathogenesis of acute spinal trauma, 186
Hyperemia, CO2 responsiveness, and autoregulation in the white matter following experimental spinal cord injury, 413
Tumor
Intracranial hemorrhage caused by metastatic tumors, 80
Intracranial tumors simulating the presentation of cerebrovascular syndromes. Early detection with cerebral computed tomography (CCT), 283
Spinal cord vasculitis presenting as a spinal cord tumor in a heroin addict. Case report, 410
Subarachnoid hemorrhage due to intraspinal tumors, 536
U
Ulcerative colitis
Hemorrhagic complications of cerebral arteritis, 91
Strokes and ulcerative colitis, 605
Uridine 5'-triphosphate
Prolonged contraction of isolated human and canine cerebral arteries induced by uridine 5'-triphosphate, 133
V
Vascular amyloid
Vascular amyloid in the aging central nervous system. Clinicopathological study and literature review, 276
Vasculitis
Central nervous system vasculitis in rheumatoid arthritis, 276
Spinal cord vasculitis presenting as a spinal cord tumor in a heroin addict. Case report, 410
Vasocostriction
Internal and external carotid vascular responses to vasoactive agents in the monkey, 416
Vasoconstrictor effect of angiotensin on pial arteries, 487
Vasodilation
The intra-arterial injection of Iskedyll for hyperselective vascular exploration, 180
Neurogenic vasodilation of cat cerebral arteries, 541
Vasospasm, cerebral
Aminophylline and isoproterenol in the treatment of cerebral vasospasm, 81
Cerebral vasospasm with ruptured saccular aneurysm, 281
Diagnosis and treatment of postoperative cerebral vasospasm, 177
Die Rolle des postoperativen Hirnengefassspasmus nach Verklippung intrakranieller Aneurysmen. Postoperative vasospasm after clipping of intracranial aneurysms, 542
Effects of procainamide and chloramphenicol on acute vasospasm, 281
Electronic stethoscope for detection of cerebral aneurysm, vasospasm and arterial disease, 177
Experimental cerebral vasospasm: comparison of perfusion deficits with angiography, 288
Intercellular granules and vesicles in prolonged cerebral vasospasm, 412
Prolonged contraction of isolated human and canine cerebral arteries induced by uridine 5’-triphosphate, 133
Prolonged vasospasm produced by the breakdown products of erythrocytes, 89
Significance of vasospasm in the treatment of ruptured intracranial aneurysms, 89
Time course of vasospasm in man, 412
Timing and indication of surgery for ruptured intracranial aneurysms with regard to cerebral vasospasm, 616
Vertebrobasilar spasm: a significant cause of neurological deficit in head injury, 526
Velocity wave form analysis
The use of velocity wave form analysis in the diagnosis of carotid artery occlusive disease, 275
Vertebrobasilar occlusion
Oclusion of the intradural vertebrobasilar artery, 532
Traumatic vertebrobasilar occlusive disease in childhood, 416
Vincamine
The effect of vincamine on the regional cerebral blood flow in man, 612

Warfarin
Intracranial hemorrhage and infarction in anticoagulated patients with prosthetic heart valves, 18
Predicting patients’ warfarin requirements, 187
Thromboembolic complications after mitral valve replacement with Hancock xenograft, 612
Wegener’s granulomatosis
The ocular manifestations of Wegener’s granulomatosis. Fifteen years experience and review of the literature, 79
Women
Mortality among oral-contraceptive users, 182
Mortality among women participating in the Oxford/Family Planning Association contraceptive study, 182
Platelet changes in women taking oral contraceptives, 77

Xenon-133 inhalation
Computed tomographic measurement of the xenon brain-blood partition coefficient and implications for regional cerebral blood flow: a preliminary report, 612
Amaurosis fugax due to isolated atherosclerotic carotid artery disease in a young woman, 422
Basilar migraine, seizures, and severe epileptiform EEG abnormalities. A relatively benign syndrome in adolescents, 605
Cerebral infarction in young adults, 39
Intracranial saccular aneurysms in the first three decades, 608
Normal serum-cholesterol but low H.D.L.-cholesterol concentration in young patients with ischaemic cerebrovascular disease, 529
Occlusive arterial disease of the child and young adult. Clinical electroencephalographical analysis of 26 cases, 422
Platelet adhesiveness in young patients with ischaemic stroke, 77
Platelet adhesiveness, plasma fibrinogen, and fibrinolytic activity in young patients with ischaemic stroke, 530
Platelet hyperaggregability in young patients with completed stroke, 278
Primary cerebral venous thrombosis in young adults: the diverse manifestations of an underrecognized disease, 418
Strokes and ulcerative colitis, 605
Strokes in children and adolescents, 169

Young adults
Amaurosis fugax due to isolated atherosclerotic carotid artery disease in a young woman, 422
Basilar migraine, seizures, and severe epileptiform EEG abnormalities. A relatively benign syndrome in adolescents, 605
Cerebral infarction in young adults, 39
Intracranial saccular aneurysms in the first three decades, 608
Normal serum-cholesterol but low H.D.L.-cholesterol concentration in young patients with ischaemic cerebrovascular disease, 529
Occlusive arterial disease of the child and young adult. Clinical electroencephalographical analysis of 26 cases, 422
Platelet adhesiveness in young patients with ischaemic stroke, 77
Platelet adhesiveness, plasma fibrinogen, and fibrinolytic activity in young patients with ischaemic stroke, 530
Platelet hyperaggregability in young patients with completed stroke, 278
Primary cerebral venous thrombosis in young adults: the diverse manifestations of an underrecognized disease, 418
Strokes and ulcerative colitis, 605
Strokes in children and adolescents, 169
